A BRIEF INTRODUCTION :

Name : Perspectives
Author : H.S.Soran
Published in : 2009
Book category : Electronic
Language : English
Number Of Pages : 156
Number Of Copies : 2000

Note : List of contents is printed at the end of the book

PREFACE

In The Name Of Universal Peaceful Coexistence

This book mostly contains the following items :

- **Articles , views and comments , which I have published in different medias already .**
- **Kurdology issues .**
- **Letters to important personalities and organizations .**
- **Some remarks about my candidacy for Nobel Peace Prize in 2008 , etc .**

As always the time factor is a very important parameter , in order to enable the readers to know when these topics are written and/or published , their dates are indicated . I hope knowing the dates , would enable the readers to evaluate , interpret , trace and judge on respective issues with more justified relevance .

In general , this book is focusing on Kurd , Kurdistan and Kurdish issues.

Hoping to enjoy a world of peaceful coexistence and to realize a real friendship life between all nations of the globe , in particular between Kurds and his close neighbors , i. e Persians , Arabs , Turks , Armenians etc , which are highly respected cordially by Kurds , from all points of view .

Important Clarification : I wrote these views , opinions and comments as an independent writer , affiliated with no political party or organization etc . So , this book must be considered as a personal and independent perspective of respective prevailing issues , aiming to remain in history memory, for future generations judgment etc .

KURD'S ANTHROPOLOGY :

TEHRAN - November 29 , 2007

FOREWORD :

As most of us are aware , nowadays the Kurdish question , stands at the epicenter of world's media news and comments ; consequently a high level of attention is concentrated on the Kurds ; so it is exigent to introduce them to their interested global compatriots, in an correct and unbiased manner.

As you now , Kurdistan is an extensive territory populated by around 50 million genuine Kurds , who are belonging to Arian ancestry . This vast extent of land is located at Middle East , and is divided between 5 countries , namely Turkey , Iran , Iraq , Syria and Armenia . That is to say , they are approximately the biggest nation , without their own independent country and appear as neo colonies .

Initially I shall indicate , from my point of view , in general scientific cognition structure of families , tribes , clans , nations etc , is established on two major following important columns , which are :

- 1- The physical/natural phenomenon , such as physiologic , physiognomic and other heterogeneous physical characteristics parameters and peculiarities , which are mostly created by physical environment , rather than sociological tools , that is to say : the natural character and appearance .
- 2- The non physical aspects , behaviors , customs and human interactions etc, which are customized under the , historic , linguistic , religious , philosophical and other non physical ethnologic parameters .

Up to now , most of scholars researchers and kurdologists etc , have concentrated their essays and analysis on the 2nd item indicated above , in particular occidental orientalist .But comparatively less attentions has been paid , to 1st one . So , in order to fill part of that important gap and enhance the level of kurdology ; I devote this article exclusively to 1st item , i .e to a field study report on "ANTHROPOLOGIC PARTICULARS OF KURDS " , as follows :

A) Skull :

In general , Kurds possess a round and globe- shaped head , as compared with their Fars and Turk neighbors . It has been argued , that this is due to childhood cradle bedding , that is called " Lanik " or " Beshka "

in Kurdish , which shapes the structure of the skull in a more quasi round configuration – not oblong .

B) I Q :

According to normal evaluations of young Kurdish generation and outcome of their examination/graduation records in educational centers , such as high schools and universities etc , they enjoy a high level of IQ potential , which can be compared to that of Jews , except in commercial and economic field .

C) Hair :

Most of the Kurds have black hairs , but it is quite ordinary to see Kurds , with blond or brown hair . Most of black hair Kurds are living in southern sector and others at northern zone of Greater Kurdistan , that is from south to north , the percentage of black hair category is gradually decreasing . It has been expressed , that this condition is due to exposure to sun radiation and temperature level . Hair loss is an epidemic complication , appearing mostly after 30 years of age among the males (it is far more seen in males than females) , and are more frequent between aristocratic families , which is resulting from many different prevailing factors .

D) Facial physiognomy :

Are similar to half part of North Iran, Israel , Republic of Azerbaijan , Turkey , Cypress , Greece , southern Italy , Lebanon , Syria etc . Which can be called Eastern Mediterranean/Middle East category . For example , if you gather individuals from above countries and locate them together ,it is difficult to recognize from the face appearance and understand , who is from where , unless they speak and express themselves by their languages etc .

E) Physical energy :

Due to their hard living environmental circumstances , at all we can classify Kurds as physically energetic and powerful , in average .

F) Psychology :

Due to facts which are indicated in item "E" , their level of physical tolerance/resistance is comparatively high , but you may expect very sharp and swift reaction against any irrationality exerted on them . Generally , they are truthful and loyal , but their extraordinary fighting reputation and warlord nature fame , seems to be exaggerated , by their potential foes .

G) Weight :

Their body weight range , due to ambulatory living style and genetic hereditary circumstances , is not high . You rarely see extra standard obesity among Kurds .

H) Height :

Kurds height range , can be classified as medium ; in general neither so short as Far Eastern people , nor so long as average USA individuals . Normally , as in most parts of the world , males are taller than females .

I) Eyes :

In average most of the Kurds ,have black or hazel eyes ; nonetheless when you move northward in Kurdish populated areas, gradually there you see more percentage of population with blue , green and hazel eyes . However as you know , as a general rule , color of the hair correlates/corresponds with that of eyes and skin . That is : black hair/skin people , in general have black eyes , and vice versa .

J) Skin Color :

It is symmetric with that of hair (item C) , so as I mentioned before , Kurds can be specified as Eastern Mediterranean/Middle East race .

K) Nose :

Mostly is short and small (not oblong) and not with upward projection of nostril point , contrary to Scandinavian people .

L) Mouth :

Mostly somewhat small .

M) Teeth :

As compared with west Europeans , in general their teeth are not very small , with regular configuration and orderly appearance . But , their teeth are comparatively durable and lasting too much . In countryside , you can see many people with natural teeth and no prosthesis even above one hundred years of age ,in sporadic cases - not general .

N) Lips:

They generally have thin lips .

O) Neck :

I have noticed no outstanding special characteristics and discrepancies with other races in this case , except a strange folkloric joke point . It has been said, the plane depression behind the neck , which in Kurdish is called (Qullkeh Drozneh) , that means " lying hole " , in Kurds is more plane and without considerable depression ; and they argue , when this depression is more plane and less deep , the individual is less liar ???!!!! .

P) Voice :

Mostly soft . Generally they are using the lower section of their larynx . You can distinguish between males and females very easily . They have a high ability in pronunciation of different expatriate phonemes .

Q) Age :

As a rough field analysis - not a precise census statistics - , we can estimate it at a mean level of about 60 years . Females age , is in average 10 percent longer than males . Some times , the Kurds survive more in countryside regions than in big cities , even in rare cases 120 years .

R) Pathology :

This item shall be prepared by different expertise physicians . But I can express this obvious positive aspect , that due to racial honesty and religious devotions , almost no AIDS disease has been identified , which is called the 3rd millennium disaster (it means , this phenomena is around zero ?) .

Note : I shall reiterate , that this circumstances , may change from region to region , on the basis of geographical latitudes and longitudes , so it is a general assumption generated in my general field study observation as a Kurd , not a statistical confirmed report . So, we must expect to confront frequently exceptional cases and discrepancies , as in other parts of the world . In the meantime , I propose to professional anthropologists , to prepare a more efficient and expertise extensive essay on this subject .

WHY KERKUK IS KURDISTAN ?

Tehran –February 20 , 2008

Nowadays the Kerkuk issue is an ardent dilemma in Iraq and even at Middle East politics . I have traveled to this town several times , to perform a field study in recent years . First of all ,I shall reiterate , as you know the importance of Kerkuk is in its extraordinary rich oil fields , not in its agricultural , commercial or industrial potentials etc .

In this concise writing, based on my above field study , I point out to some issues , that describes Turkmans and other minorities' circumstances and clarifies Kerkuk is a Kurdish city :

1- Etymological Parameter :

The historic name of Kerkuk oil field region is " Baba Gurgur" or " Baba Grgr " . It is denominated so by local population , in Kurdish history and old folklores . "Baba" in Kurdish means father or Saint ; and "Grgr" means flames or blazes . So this term means " Saint Blaze " . Because when the oil wells of Baba Grgr , were not drilled and oil was not yet exploited , some of these oil field were blazing superficially by random fires . The native Kurds of that old era , thought it is a sacred place and heaven window gap and called it "Baba Grgr "or Saint Blaze .

2- Demographic Parameter :

As this city has no continuous geographical co-juncture with Turkey's mainland , so it is not considered as a Turkman or Turkish town . For example , in east of Tehran there is a town , dominated by Kurds (called Jaban) ,it is not considered as a part of Kurdistan , because there is no geographical juncture between this town and Kurdistan mainland , it means Kurds are not native and have emigrated or deported there from Kurdistan mainland . Similar to Turkmans of Kerkuk who are not native there , rather are emigrated there in Ottoman Empire times, from Turkish mainland or have been sent there as government personnel ,military staff , merchants , craftsmen etc and are remained there . Such thing has been happening in other colonies of Ottoman Empire , like Balkan courtiers etc . From other side , Arab population of Kerkuk is a more new prototype of Turkmans , which mostly are transferred by Saddam Regime , to transform the demographic structure of the town in an Arabism manner . Reciprocally , he has deported native Kurds from Kerkuk by force . I think these issues are so clear to all readers , that needs no more explanation . There are other native minorities in Kerkuk as well , which mostly are Christians . And sometime we can dare to argue , that once they were

main host and majority of the town , but by emergence of Islam , they were diminished to a minority level ?

3- Linguistic Parameter :

When I was in Kerkuk , I realized that nearly most Turkmen and Arabs(except new imported Arabs) , were speaking Kurdish as well as a Kurd , almost without accent . But Kurds did not speak Turkish so ; if they could speak Arabic , it was the reason, that their formal school education and teaching was in Arabic . We can compare it to Paris city in France . As you know , Paris is a French city , but there are a lot of Arabs emigrants there . Most of Arabs speak French as their mother tongue , but French people can not speak Arabic so ; or can not speak Arabic at all , as it is a genuine French city .

4- Turkish intervention :

According to UN charter , Turkey has no right to intervene in Kerkuk , as Kerkuk is formally a city of Iraq , which has its national boundaries and integrity . Even if 100 percent of Kerkuk population was Turkmen , it does not authorize Turkey to intervene there . For example , I was in Istanbul for one year and know this city well . About 2 million Kurds are living there , more than the number of all Turkmen living in Iraq ,but Iraq or Kurdish Regional Government (KRG) are not authorized to intervene there , as it is a town of Turkey .

5- Turkmen Rights :

As a writer without frontier and supporter of all humans rights , I like to point out to this vital obvious issue , that Turkmen as a minority have the right to enjoy their own medias , schools , cultural centers etc (which they have right now) ; but as far as I know there was no independent Turkmen satellite station , compared with Kurdish satellites . So, I hope diligently , the Kurdistan Regional Government (KRG) would establish one for them , in order to enable Turkmen to enjoy their music , folklore and other ethnic rights. KRG has recognized and respected all other minorities rights there , as far as possible .

PS:

However , Turkmen are not Kurdmen , but they are a formal minority in KRG . If R.T. Erdogan was a Kurdish leader in Erbil , he was calling them " KURDMANS " , instead of TURKMANS . who have forgotten their Kurdish language and did not allowed them to speak Turkish at all , because he was anxious , that they will endanger KRG integrity !!!.

But still answer to an important question is pending : Why at time of Saddam's reign, Turkey had not such serious claims and did not implement such interventions in Kerkuk affairs ? .

What is KKT ?.

Tehran – June 10, 2003 .

It has been stipulated repeatedly by many competent researchers and scholars ,that In Tehran , its suburbs and outskirts , there are around one million and eight hundred thousand (1,800,000.-)Kurds , but no field census has been carried out in this regard so far; i .e , it is not verified statistically . However , Tehran is one of those gigantic super-cities of the world, which may have the biggest Kurdish community all over the world, even most probably ,more than Erbil (Helwr) , Amed , Suleimany and Kermanshah . Anyway,the Kurdish inhabitants of Tehran are at least 4 times more than the total population of Malta , which is located in Mediterranean see and is an independent country .

In 1997 , along with a student of Tehran Universities , Mr. Jalal Nuri - that then I knew him simply as Kak Shaho - we talked about this subject that - “ for all of this significant number of Kurds in Tehran, a cultural, social , economic and ... center is desperately required “. In various precautionary meetings with several Kurdish elite and intellectual inhabitants of Tehran , we discussed this issue quite seriously and persistently. Then, after tens of sessions with such interested people ,in 1998 , we were able to establish KKT, which is the abbreviation for Kurdish phrase “Kor-y Kurd-any Taran “ , that means Tehran Kurds’ Association . KKT is a registered NGO in Iran and is recognized on a de jour basis .

KTT Structure:

KKT, is almost the biggest and more serious Kurdish NGO in Tehran , which is managed by its board of directors . The board of directors, consists of seven persons and are elected by the Kurdish community of Tehran . The first term of the of board of directors , expired in November 2002 , when Kurdish community of Tehran , elected a new board of directors , in a free democratic poll. The newly elected persons are as follows , in alphabetical order :

- Dr. Asa’ad Ardalan.

- Dr. Qutbaddin Sadeghi.
- Engineer Jamal Taha .
- Engineer Mozaffar Karimi.
- Mr. H.S . Soran (writer of this article).
- Mr. Jafar Afkhami.
- Mrs. Parwin Karimi .

The board of directors of KKT has supervisors , alternate members etc . In the meantime, KKT has a board of establishers ,who control KKT's performance of duties monthly , in a joint session with the board of directors .

For carrying out its extensive objectives , KKT has selected several committees, such as women's , economical , cultural , judiciary , students' , and sport's committees , etc , which each committee is managed by respective experts .

KKT membership is not confined to a Kurdish dialect, religion, sect , region etc and gender , rather it is the right of all Kurds to become a member or a manager of KKT .Meanwhile , it has a very positive and creative relationship with most NGOs , at Kurdish populated areas in Iran.

KKT is supported by financial contributions of its members and sympathizers, but up to now , it has not received any governmental and/or outsiders' financial helps . In other words , it is a genuine independent NGO .

KKT has performed his objectives in a wide range of spectrums , but as this small paper can not accommodate all of those comprehensive issues , here I only point out to a few items of them – as *a little , from a lot* .

Some Programs ,Which Have Been Achieved By KKT:

1-Organizing and performing 2 big spectacular Kurdish unprecedented festivals in Tehran , called Barau Nawroz (Towards New Year) , in which , Kurdish music, dance , poetry and articles were presented to thousands of audiences .Same program , will continue in the future .

2-Every Thursday of the end of each month , KKT has organized and performed attractive Kurdish cultural evening gatherings, which will be continue in the future regularly .

3-The sport's committee of KKT , has carried out several sports' programs , such as mountain tours and promenade plans , which shall be extended gradually .

4- Reception and hosting of local and expatriate guests .

5- Organizing the Kurdish language teaching and Kurdology training classes on a regular scale , in its central office, in Tehran .

6- Organizing the Kurdish teaching classes , in several universities of Iran .

7- Holding Kurdish music training classes .

8- Holding handicrafts production training classes .

9- Holding calligraphy classes .

10- Extending arbitration services in special necessary circumstances , in such a manner that sometimes KKT has successfully tried to solve significant individual and social problems in the Kurdish community .

11- Developing efficient relationship between Kurdish and non-Kurdish communities , on a positive scale .

12- Participation in tens of seminars , conferences ,gatherings etc on local and international level .

13- Holding appreciation ceremonies for Kurdistan celebrities such as :late Mr. Baba Mardulh Rohani and Dr. Braym Yunesi .

14- Printing a special Kurdish calendar, with KKT brand .

15- Organizing and performing splendid festivities on the occasion of birthday anniversary of Prophet Mohhamad .

16- Many other items , which can not be described in the framework of this concise briefing .

The principal goal of KKT, in accordance with its articles of constitution is to develop and promote Kurdish culture, language , poetry , music , economy etc., as well as other aspects of the Kurdish society ; which without a widespread actual support of all respective Kurds , the achievement of these outstanding vital goals, is unfeasible .

Translation of a poem of mine from Kurdish language :

**“I” am a single person , my place is” tiny “,
The success angel underestimates “ me “,
When ”I” unite with “you” and change into “ we ”,
Reason regards me as a great hope .**

The Situation Of Kurdish Community At Tehran .

Tehran - December 10, 2006

Prelude :

Now at Tehran, the gigantic capital city of Iran and its extensive outskirts , there are a great number of Kurds , approximately more than 2 million . From the total inhabitants of the city , which is roughly estimated at 12 million , from each 6 person , one is a Kurd . They have very close relations and strong ties with each other . Most of these Kurds , have immigrated here , in last hundred years { my father , who was working at Tehran in 1910 , told me that at that time , scarcely you could find a Kurd in this city } .

Tehran Periphery :

The most important old periphery towns of Tehran include : Karaj , Shahriar , Rubat Karaim , Hashtgerd , Varamin , Rudhen , Bumhen and some new outskirts townships { Shahraks } , which are mostly constructed in last fifty years in a more modern and up to date style , such as Pardis , Banafsheh and tens of others . A lot of Kurds live at this Tehran outskirts as well .

Kurdish Settlement :

As a classic demographic law , most of the Kurds at Tehran area, are living at the western part of this district . This demographic law is prevailing at the most of the world . Namely , when from a country mainland , the people of some areas are emigrating to a big city at the same country , mostly they settle at that part of that city , which is the entrance of their region to it . In this manner , most of the Kurds at Tehran , are settled and living at the western part of the city and respective outskirts , which are considered as gate way of Tehran for most of the Kurdish regions ; of course there are many exceptional cases , where Tehran Kurds are displaced and consequently live at other parts .

Kurdish Language And Religion Groups :

Almost there are a heterogeneous mixture of most Kurdish dialects , sub dialects , religions , sects and groups . But , most of Tehran Kurds are Shiite or Sunni . The Kurdish dialects in Tehran can be classified quantitatively as following : Goran(Kalur , Hawram , Lak) ; Soran ; Lur ; Krmanj (Badin) etc . You scarcely can find a Zazaki or Shabak Kurd here . Most Krmanjs have immigrated from Khoran and Urumieh region .

There are a lot of Ahlehaq Kurds at Tehran, which are sometimes wrongly misunderstood as Aliullahi !!! They have strong affiliations with Ahlehaq Turks, at Rudhan area , east of Tehran . Rarely you can find a Christian, Izedi or Zoroastrian Kurd at Tehran , but there are a considerable number of Kurdish Jews , who have originated from Kurdish areas of west Iran .

Culture :

Most Tehran Kurds , have diligently preserved their Kurdish genuine culture , in particular their language . At the time of Shah, there was a weak trend of Kurdish self-assimilation at Tehran , in which some exceptional families showed little interest to transform their children into Persian genus , but now fortunately after the Iranian Revolution , from 1979 onwards , that trend has been reversed and they are trying to recover their partly lost Kurdish identity . The Kurds have kept their own religion as well . You can not find any considerable number of converted people . Kurdish cloth and dressing are highly respected . At work and public places , socially it is hard to work with Kurdish dress , but in holidays , festivities , weddings and private gatherings ,it is highly favored , in particular by women . Kurdish language is not only extremely respected by Kurds themselves , it is entered into Tehran culture , too . Persian (Fars) families love too much Kurdish names , specially they choose it for their baby girls . In particular they prefer those names , in which there are letter { jh } , like Rojhin , Jhino etc . Any way , in general in Tehran , Kurds are considered as a progressive , modern and intellectual race . There is no barrier in marriage , Kurds can marry with all Muslim sects and other races , but to marry a non Muslim spouse , she or he must first be converted into Islam, first . Most sects and religious groups have their own mosques at Tehran , except Sunnis , which will include Sunni Kurds as well . In Tehran there is no formal primary or secondary school for Kurdish . But there are some Kurdish Language courses , at Universities on de facto basis ,mostly established by Kurdish students . There is a Kurdish Language class at Tehran Kurds Society , called KKT .

Economy :

In general we can say , that at Tehran , the Turkish minority is the economist predominant body ; Persians (Fars) are main political and administrative masters and Kurds reserve a large angle of cultural wheel . That is , Kurds possess a moderate economic field margin . They do not play an important role , in grand Bazar of Tehran . But a considerable number of them , are fruit and vegetable merchant .

Repatriation:

There is no considerable trend of repatriation . That is , rarely you can see any Kurd to return to her or his native town, to live there again permanently . Because there is a severe shortage of jobs , in Kurdish areas, otherwise most of them dream about it .

Organizations :

There are very few Kurdish organizations , institutes and societies at Tehran . Tehran Kurds Society , or KKT , is one of these organizations . It is an NGO , established around 10 years ago . According to its articles of constitution , its main field of duties is : social , cultural and humanitarian jobs . It has a rental old office , at the Navab Corner , Urumieh Sharghi St , Tehran , phone 0098-21-66931909 , which is open in the evenings only , except on Fridays . KKT now is intending to purchase a new building and move there duly – it is collecting the donations for it . You also can help them right now . KKT is holding Kurdish festivities , seminars , conferences and gatherings frequently and is practicing as an active Kurdish center . Another Kurdish organization at Tehran is Tehran Kurdish Institute , which is active in cultural , social and other related fields . Kermansah Home , is another Kurdish NGO , which mostly focuses on the Kurds of Kermanshah and southern part of Kurdish populated areas of Iran . There are other NGOs , like those of Lurs, Hawaramn etc and other specialized ones , which it is better to be discussed in a detailed special separate report .

Relation With Other Races :

Generally , the Kurds of Tehran have a very good relation with all Tehran society , including Farses , Turks , Arabs , Turkmans , Baluchs , Gilakis etc . In fact , there is no racial discrimination or segregation at all , at public places , street and city quarters . Example : If a Kurd applies for a job at a non governmental company , firm or shop , in most cases the employers prefer to employ the Kurd applicant , but unfortunately in governmental organizations , the case is severely reversed .

In fact , Kurds have a very excellent friendly relation with other inhabitants of Tehran , on inter-communal level . They love peaceful coexistence and respect all cultures and religions of the world .

50 million Kurdish Terrorists Or 50 million Terrorized Kurds ?

Tehran- April 19 , 2008

As a free Kurdish writer , without affiliation to any political parties , groups etc , my human conscience has induced and mobilized me to write this concise writing , in which I try honestly to evaluate the terms , which are used by USA government etc , about Kurdish leader Abdullah Ujlan (APO) , in which unjustifiably they condemn and classify him as leader of a terrorist group , for which he is detained in Emirali Island by Turkey for several years .

But , every day we see millions of Kurds , who are supporting this man in street demonstrations at Kurdistan areas and all over the world . As a rough and non statistical calculation , we can estimate ,that almost nearly all 50 million Kurdish people all over the globe are supporting this leader and ask Turkey seriously to release him immediately from jail .

Now , this question will be raised by human common sense : How it is possible to condemn and accuse 50 million people as terrorists ? While , terrorist has a political and linguistic meaning : Terrorist means a person , group etc , who terror and/or terrorize the peaceful population , are performing suicide and other kinds of assassinations , occupy others territories by force , make street looting , exert miscellaneous horrible actions against a society , perform massacres and explosions , genocides and other types of annihilations/cleansings etc . While followers and/or enthusiasts of APO , which are estimated to be around 50 million people over the globe do not possess any of those particulars , which are required to identify them as terrorist !!! They are peaceful people .

Quite contrary to above false denomination , which is initiated and forged by Turkey , this name and title is appropriate and suitable for Turkey himself , because as we now (in addition to other catastrophes imposed on Kurds elsewhere in other countries) ,Turkey has committed following acts :

- 1- They have massacred millions of Armenians .**
- 2- They have terrorized around 20 million Kurds in Turkey .**
- 3- They have chemically bombarded Southern Kurdistan , in Qendil Area , in so called Iraq territory .**
- 4- They have and still are trying to perform racial cleansing of 20 million Kurds , in East Anatolia .**
- 5- They ridiculously claim , around 20 million Kurds in so called Turkey , are those Turks ,who have desperately forgotten Turkish language and are genuine mountainous Turks .**
- 6- A lot of other ridiculous and ferocious issues .**

As a free writer defending the human rights/standards of all 7 billion population of the globe , I ask the international organizations , such as UN , EU etc to investigate this issue , and to find out really whether around 50 million Kurds are terrorists or terrorized victims ? And ultimately I propose the USA , to change his attitude toward leader APO and his 50 million followers or enthusiasts in Kurdish populated areas and abroad . This bias attitude by USA , will harm and endanger his interests and prestige all over the world . Any census and fact finding action sponsored by UN , will authenticate and prove my above explanations and results in compromising and attracting 50 million Kurds along with other honest non Kurdish people of the world by USA .

DYNAMIC SIMILARITIES BETWEEN KURDS AND “ ABORIGINES ”

October 29, 2004 .

The metaphoric and controversial term “ ABORIGINE “ is applied linguistically to native and genuine population of some of those regions , which are now physically , forcibly and permanently occupied by their former remote colonialist imperial powers , on de jour basis { fore example : in Australia } .

From other hand , around 50 million native population of Great Kurdistan , which was mostly occupied in recent centuries by so called Islamic Otman Empire , after the dramatic collapse and political disintegration of that satanic Empire , was intentionally divided between 5 countries and still is a political and geographical part of those states , which include : Turkey , Iran , Iraq , Syria and Armenia .

The Kurd population of above mentioned countries , hold multilateral dynamic similarities with said aborigines , because in their ancient ancestral homeland , they are deprived of practicing equivalent rights with the occupying majority ; for example they are in principle deprived of holding first rank governmental careers and their language , culture as well as their customs are under various severe case by case discrimination , segregation and oppressive restrictions etc . Even in Iraq , after the fall of Saddam , the Kurds were deprived from holding first

rank governmental positions , such as presidency and prime ministry posts .

In a recent article , I have read that the Australian aborigines are demanding for some kind of self rule and autonomy in their traditional homeland ; but it is stubbornly rejected by Central Australian Government . It looks like the same situation of Great Kurdistan . Meanwhile it is quite ridiculous , that they could not enjoy the right of getting self rule and freedom in their ancestral and native home , from the Australian emigrant occupiers .

Another Alternative To Ease Tension In Iraq :

Tehran – December 12, 2006 .

The catastrophic tension , anarchy and turmoil , currently prevailing at Iraq in the context of a hidden civil war , is a potential threat to world peace ; in particular for Iraq's neighbors and Middle East . This undeclared civil war , may ignite the sparkles of an uncontrollable Third World War fire , which might be of nuclear nature ; and exhaustingly devastating . Nevertheless , this is the dynamic obligation of any individual to look and find her/his own practical alternative to extinguish this ravaging fire .

From my own perspective, there is the following alternative as well :

" As we know , Iraq is categorically divided in three distinct and different areas, which are as follows : North , South and Center . Northern area of Iraq enjoys a prosperous Kurdish de facto federalism , administered by Kurds themselves and is quite safe ,so requires no emergency precautionary measure in this respect.

Southern area is mainly administered by British forces ; and enjoys a comparative peace , which is almost at an acceptable level . For example

there is no terrible number of skirmishes , explosions and suicide attacks at Basra , which is a large Arab provincial capital . But the central part of Iraq , which includes Baghdad, is blazing inside a hell epicenter , including terror , assassination , hijack and all different tools of civil war , which is mainly administered by US forces . While Iraqis shall appreciate US role in exterminating the Saddam despotic regime ; unfortunately in last 2 years , US administration has demonstrated a considerable inefficiency in keeping the expected security and eradicate the anarchism in this central region of Iraq . Now as another alternative , it might be justifiable to shift these administration axles , i .e to assign the authority of central areas to British forces ; and delegate US troops to southern region of the country – of course some of them along with coalition forces , can remain at central part , to help the British administration . This shift of administration areas , may ease the tension considerably and save the Iraq .

Remarks : In Armenia , exceptionally , the Kurds have mostly enjoyed more cultural freedom ; and have suffered from less racial discrimination .

TURKEY HAS ALREADY ATTACKED AND INTRUDED KRG !!!

Tehran - October 20 , 2007

Above unexpected "article title", may be quite surprising for most readers , but in fact , it is seen and/or heard by majority of us , indirectly or even directly , confessed by Kurdish authorities , so is considered as an undeniable reality .

In order to avoid dissipating the precious time of diligent and savant readers, by repetitive arguments , I very briefly remind them , that even some KRG high ranking authorities , have confirmed repeatedly , that some Turkish troops are already stationed there from relatively long time ago ; and in recent days , in most of respective news bulletins , we have seen and heard , that KRG's territory is attacked by Turkish artillery shelling etc , even they demonstrate such shelling and attack scenes , in TV and other media reports etc . So , by analyzing and briefing the above news , which are officially verified by KRG authorities , we are sure that " **TURKEY HAS ALREADY ATTACKED AND INTRUDED KRG !!!** " .

As an independent and unaffiliated commentator , I deem the KRG authorities are seriously expected , not only to prevent Turkey to expand its previous mischief and malicious intervention , but also to close the old Turkish bases there ; and to retaliate any artillery or whatever attack , on KRG region , by any possible defensive means .

50 million Kurds all over the world along with nearly all the rational population of the globe , at 6 continents , will support the legitimate rights of Kurdish leaders , to expel those foreign aggressors ; and stop military daily routine attacks at Kurdistan.

What logic and philosophy , judges that PKKs who are genuine defensive Kurds , shall leave KRG soil which is part of Great Kurdistan , but Turkey's malignant army, must stay there ? If , in fact in Turkish (Turkland's) parliament , there are 80 Kurdish parliamentarians , why they allowed the Turkish parliament , to approve this ridiculous bill to intrude and attack KRG unanimously ? Why so called central Federal Republic of Iraq must unite with Turkey against PKK ? , Why Turkey and other neighboring countries shall have military bases there , why King (President) B. Asad is allowed to intervene and support such jungle ratification ? And many other questions , which are the token of Turkey's fascism nature , that require very serious and perhaps obligatory Kurdish sanguine reaction . This is a significant

dilemma , which challenges the political fate of 50 million Kurds , at the commencement of 3rd millennium .

An Open Letter to President Obama

Sunday, 07 June 2009

To: His Excellency Mr. B. Obama , President Of United States Of America , White House , Washington DC , USA .

Dear President Obama ,

As a writer and human rights activist without frontier - of Kurdish origin -, I listened to your comprehensive , eloquent and rhetoric speech diligently from BBC TV , delivered at Cairo University , Egypt , on Thursday June 4, 2009 , which was cheered by frequent ardent applauses of a comparatively welcoming and enormous audience .

In the your elaborated speech , while talking about Muslims' communities from Morocco to Indonesia and heterogeneous ethnic and religious minorities relations and fates , including Jews etc ; unfortunately you forgot or ignored the Kurds and Kurdistan region issue , which is approximately four times greater than Israel plus Palestine , together ! .

Because your important mission was principally considered as an serious step , towards improvement of universal democracy , religious peaceful coexistence , and human rights promotion etc ; you were eagerly expected by common sense , to address the Kurdish issue and Kurds as well , which they were persistently massacred , jailed , tortured , discriminated and displaced in the course of their long history , like Jewish people ?

Furthermore , while you were talking about Iraq , you accentuated on " United Iraq " , while as you are aware , after the collapse of Saddam , this country is officially declared as " Federal Iraq " , which consists of two greater ethnic nations , i .e. Arabs and Kurds , along with several smaller religious and ethnic minorities of Muslim and non Muslim groups .

I like to remind your Excellency , that at the time of coalition forces invasion of Iraq , led by USA , which resulted in collapse of Saddam's despotic regime , Kurds were the most close , sincere , cordial and active

allies of coalition forces , especially USA and played a vital significant role , in eradication of Saddam's despotic regime . So , they expect US government , not to underestimate Kurds in his calculations and not to consider them as a counter balance , in Middle Eastern sensitive political scale .

In conclusion , I reiterate and remind "Iraq is officially a Federal State " . From other hand , in general , your Excellency shall include nearly 50 million peace-loving Kurds , at your democratization and peaceful coexistence agenda plan , which are deprived from their own independent government and almost most of their legitimate rights .

I await your encouraging answer on this subject and am sure , without solving the Kurdish issue democratically and peacefully , Middle East region will remains in continuous turmoil .

AN ENORMOUS DISCRIMINATION AGAINST KURDS

June 30 , 2009

As we know , Kurds are native inhabitants of Middle East , who are living there for thousands of years continuously and consistently. According to rough statistics , the number of Kurds at their historical homeland(Kurdistan) , amounts to approximately fifty million (including some one million diasporas , dispersed all over the world) .According to above approximate estimation of their population number , we can declare they are among the biggest nations of the world , who do not enjoy their own sovereignty and independent state ; consequently against their national aspirations , they are distributed mainly among five countries . So , judging on common sense and human conscience basis , we realize that they suffer an enormous political discrimination , which has resulted and still continues to result in heterogeneous fatal catastrophes and numerous annihilations , for example the chemical bombardment of Halabja , which on the scale of vast general devastation , sometimes has been considered as FIRST HEROSHIMA or the worst ferocious man made catastrophe of recent times , over the globe.

Now on the basis of above and following undeniable facts , I reiterate that a big and unexpected discrimination is implemented against Kurds . For example , at the same region of the world , there are more than 20 independent ARAB countries , some of them only possess a population of two million people , but Kurds with an approximate total population of fifty million , do not have a single independent country . On this basis , if UN is a pragmatist and real United Nations and advocates the right of nations , shall address this critical issue seriously and provide a practical solution to treat this tyrannical discrimination along with the cooperation of other respective international institutions and organizations etc .

Humanism and Animalism :

Tehran – February 4, 2008

In most countries and regions of Mother Earth , we are a considerably ashamed to confess, that we are humans and belong to this dangerous species of creatures called" MANKIND " , which are spread all over the globe . Because in fact we are embarrassed by observing heterogeneous MAN'S brutal and savage interactions and behaviors , on this basis we are obliged to confirm unwillingly , that :

At present era , in most circumstances , at some locations of the globe , actually animal community is far more innocent , than human society !!! Here, in order to introduce a few examples of this situation , I point out to some cases about human and animal comparison :

- 1- Animals are not massacring each other , on such a wide scale , as compared with man .
- 2- In general, animal are more free than man .
- 3- Animals do not use deterrent atomic , hydrogen and laser bombs etc.
- 4- There is no segregation and racial discrimination among animals ,
- 5- There is no sex discrimination between them .
- 6- Elephants of India (for example) , have no privilege over African counterparts .
- 7- They have not created such catastrophes as world war 1st , 2nd etc .
- 8- There is no various ,different manufactured GODS and religious superstitions between them .
- 9- The color of skin is no privilege .
- 10- There are no War lord Pacts such as Atlantic , Cento , ex Warsaw etc .
- 11- They have no Ministry Of War .
- 12- The animals have not established artificial borders , for example a dove can fly from any so called country to another, without passport or visa pass etc .
- 13 - You have never seen a goat(for instance), to kill neither another goat nor a human being.
- 14 - Rarely it has been heard ,that some exceptional animals would kill a man.
- 15 - Are so civilized , that they do not recruit any police at all .
- 16 - They do not claim any affiliation to any prophet , which is considered as an antagonism parameter and rivalry by humans , to embattle and explode each other by suicide devices etc .
- 17- They exercise no so called tactics and politics(lies) , instead of it, truthfulness is prevailing .
- 18- They have a very smaller share in environment pollution and world ruining process .
- 19- No animal is obliging any other animal to abandon its language or its culture .

- 20- Animals are not getting bribes and create scandals .
- 21- In stead of false democracy , they practice natural regular law .
- 22-If humans do not repress and massacre them ,they are more prosperous than man .
- 23- They are not obliged to work in 3 shifts to afford their life .
- 24- They are naturally more clean and net .
- 25- No animal commits suicide .
- 26- They need less medical care .
- 27- There is no racial , religious or ideological war between them , for example never the turkeys of the world , have declared war against nightingales .
- 28- They feel less stress and anxiety .
- 29- They execute a more frugal life and are less expensive .
- 30- Probably , they suffer from less pathologic problems .
- 31- As last point , I say : No one can claim that has known a beast/animal as ferocious and dangerous as Saddam etc , from dawn of history !!! . Do you know ?

But , animals possess many other privileges .

Let us try to improve the morals of human society , too ; in order to be entitled to call us the most honest creature .

Kurdish Archeologists' Patriotic Duty

Tehran - Nov. 17, 2006 .

As we know , in great Kurdistan , there are numerous valuable monuments and historical sites , which their history are going back to thousands of years ago, like Taqwastan and Bestun in Kesrmashan , Takht-e-Suleiman near Takab , Zewieh at Saqiz region and other places at five parts of divided Kurdistan .

All monuments and archeological locations , are considered as historical documents , in particular such items as : parchments , cenotaphs , epigraphs and other inscriptions . That means , by translating and interpreting those items , we can trace the path of our history and can discover our identity in the ruins of ancient buildings , memorials , castles and fortifications etc .

Unfortunately , so far we have delegated this important missions - i .e translation and interpretation of these historical documents - to so called expatriate orientalist , which is not considered as a justified step . In Kurdish language there is an old proverb , which says : " You only shall catch snake by other's hands " . Based on this proverb , we should not convince ourselves by such translations etc . One may say , at that time there was no Kurdish archeologist to do this job for us , read those ancient alphabets and understand those old languages ; and this might look true for that time .

But now, we have numerous graduated archeologists and/or ancient languages linguists , who based on their education and experimental backgrounds , can translate and interpret those inscriptions along with the ancient scripts and tell us the relevant facts honestly .

For example , they can tell us : who was reigning at Erbil from 6 thousand years onward and was the Kurdish emperor of this Kurdish metropolitan city ; what is written on the Taqwastan inscription and who was the Kurdish king here . As a historical hypothesis , any King , Sultan and Amir , which is a persistent permanent resident ruler , is of same race and language of the city , in which he rules . Example : Julius Cesar was a Roman , Napoleon Bonaparte was a French and George Washington was an American citizen . Resident rulers differ with colonialist ones . We can assume , that for example, Khosrow Parwiz at Kermashan , was a Kurdish King and Shrin a Kurdish Queen , as their ancestor was a Shwankara Kurd , at Shiraz called Babak { Bauk } and the first King of Sasanides (Sasanian) dynasty was called Ardashir Babakan .

(Note: The founder of Baban dynasty at Suleimani , was also called { BEBE or BABE } , which means father in Kurdish , later took the plural form and became BABAN , which means fathers .

So, we can be suspicious of previous translations and we have the right and reason , to look for the facts , which more probably are hidden from us and discover the artificial things which are forfeited instead .

Consequently , Kurdish archeologists are expected to retranslate and reinterpret those historical items precisely as they are , and rectify the biases therein .

50 MILLION KURDS , ARE NOT AN OPPORTUNISTIC BALANCE HAMMER .

May 3, 2005 – Tehran

The ancient and inherited motherland of Kurdish people { KURDISTAN }, or better to say {KURDLAND} , which is located at the epicenter point of Middle East - a major populous state-less nation of the world , with approximately 50 million homogenous population - is both geographically and demographically about five times greater than the Republic Of Lebanon .

The political destiny of these truthful and virtuous people , has been manipulated in a discriminatory and unjustifiable manner , at least throughout the recent centuries , by respective contemporary oppressive super powers , in such a wrong fashion , that in most significant historical opportunities , their fidelity and humanism attitudes have been exploited in a deceptive atmosphere or better to say , they only have been assigned with the role of a randomized opportunistic balancing hammer or capacity of a second grade citizen of the world .

The Kurds , according to UN Charter , international regulations and human rights criteria etc , have asked and are asking fervently for their broad and full legitimate rights , at international arena , that consists of a genuine and full scale independence , which they have been deprived from it emphatically , up to now .

In a summarized phrase , “ Kurds themselves already are a major and determining weight factor on multilateral global scale balance , they do not allow anymore to be misused as an opportunistic balancing hammer against anyone - they have their own important political weight on the global scale , preserve it and optimize its utilization , only in their own favor “ .

What Baked Beans , Is Baker Baking In His Bakery !

Tehran – December 26, 2006

As we are aware , Mr. Baker , a senior member of Iraqi Study Group , has concocted an irrelevant delineation , with collaboration of Mr. Hamilton , and has submitted it to US government , for easing the Iraqi tension .

As you perceive , this approach is very sketchy , in particular those clauses , which are dealing with Kerkuk city , article 140 of Iraqi Constitution and Kurdistan in General . Even , this report has been composed without any serious attention to Kurds and Kurdistan . It is prepared inside so called Green Zone ; and without visiting the Kurdish areas at all . Most important , in this project , they have recommended to reengage the Saddam's ousted entourage in the administration of Iraqi affairs !!! .

At the first glimpse , one might presume , that this US veteran statesman and his team are making ordinary human mistakes and such cases are probable in connection with all human decisions and/or calculations .

But regarding this bias report , our common sense is encouraged by Ma'ariv's comments, a prestigious newspaper of Israel , to make other more justifiable interpretations . As reportedly Ma'ariv has commented , Mr. Baker had a close and sincere relation with Saddam's notorious regime , before its collapse and even has received astronomic amounts from his clique in the form of presents , gifts and modern bribery .

Based on above explications , it is virtually necessary for US government , to investigate the Ma'ariv's comments (to which in Iran I have no access) , in order to verify the facts – and if the outcome of investigation proved positive -- to find out what baked beans is Baker baking in his bakery , and subsequently sell the Kurds , for those putrefied grains to whom ???

A Lamentable Open Petition To Mr. Ban Ki-moon , UN Secretary General .

TEHRAN - Dec 22, 2007

His Excellency , Mr. Ban Ki-Moon ,

We , approximately are 50 million Kurds , living in Middle East region , from prehistoric era times , in the occupied Kurdistan Land , which has been our hereditary mother land forever . But we, suffer from heterogeneous suppressions , that almost could be categorized as " ethnic catastrophes " , ranging from frequent racial genocides , chemical bombardments , indiscriminative massacres , compulsory expulsions and several types of fatal annihilations , which almost are recorded at UN and other international body's archives .

Due to its emergency situation , I confine this petition to occupied Kurdistan of Turkey :

A part of Kurdistan , has been occupied by Turkish Government unjustifiably , which has an approximate population of 20 million and a surface area which is nearly as extensive as Syria and Lebanon together . But unfortunately , these 20 million Kurds are nearly deprived from almost all human rights , their leader (Mr Apo) is jailed ; and even they are executed , jailed , tortured and denied their existence as a Kurd . Rather , the Turkish Government claims ridiculously, that they are Turkish mountainous Kurds !!! , but are too unfortunate and forgot the Turkish language !!!

Due to an extensive suppression and multilateral pressure , a lot of so called Turkish Kurds , have emigrated abroad and dispersed all over the world as a significant Diaspora , in several countries . For example , in Kurdish Regional Government (KRG) in Iraq. But the Turkish Government pretending , that they are attacking Turkey from Iraq , have bombarded these so called Turkey Kurd refugees , by around 100 airplanes , starting from Dec 16 , 2007 regularly up to now , which in addition to these refugees , which Turkey claims baselessly belong to a Kurdish party , a lot of local residents are killed , injured or made homeless .

I (H.S. Soran) , as a Kurdish writer without frontier , that belong to no political parties and organizations in the world whatsoever , request your High Excellency , as UN secretary general to delegate a fact finding mission over there very urgently ; and after verification of my explanations , take necessary steps , to stop Turkish fatal military aggression and simultaneously protect those local Kurds , which are living in their own homeland residents , at southeastern part of so called Turkey , against Turkish ferocious oppression , otherwise a catastrophic genocide is underway in Turkey , which can be compared with that of Armenians there around 90 years ago , for which you are responsible to handle and prevent it ; because the world inhabitants recognize you as Secretary

General Of United Nations to defend nations , not United Governments . We , Kurds are approximately the most populous stateless nation of the globe , and from every 120 people in the world , nearly 1 person is a Kurd . In the meantime , Kurds are looking for a peaceful coexistence with all neighbors , in particular Turkish people and respect all .

So , we are expecting your justified and legitimate support and assistance . I diligently request your Excellency's office , to provide me with an encouraging written response , via my above email .

Thanks too much for your prompt attention to this humanitarian subject .

Leter To Reputable Klawrojna Electronic Newspaper .

Tehran , January 18, 2007

Attention: Mr. Saqi Barzani , Editor-In-Chief .

On the occasion of third auspicious anniversary of your successful operation ; as a persistent writer of English articles for Klawrojna , I cordially felicitate you , your assiduous personnel , diligent intellectual and artistic contributors as well as enthusiastic audience network worldwide .

As Klawrojna headquarters is located at the MAIN GEOPOLITICAL MONITORING EPICENTER of turbulent globe , and has an English section as well , I think its English writings apply a momentous impact on the current Middle East tsunami development , which certainly will have a determinant gradual effect on shaping of a GREAT KURDISTAN and recognition of KURDS , not before long .

It is great .

Formation Of A Kurdish Secular State ,Is An Effective Counterbalance

October 5, 2004 .

As we observe ; an outrageous scale of terrorism , insurgence , skirmish , violence and disobedience , are only some of the negative daily repetitive incidents, in most parts of Arab populated areas of Iraq , in such a formidable extent , that it has seriously paralyzed the normal life , in respective affected regions .

Consequently , fulfillment and realization of a nationwide free and democratic homogenous election , in this plight-stricken country , in near future , is far from reality . And unavoidably , Iraq is moving toward the brink of a complete perilous anarchy and civil war , at an uncontrollable speed and with an accelerated velocity .

From other hand , at the Kurdish populated areas of Iraq , life is fairly quiet and normal , where there are no insurgence , war or disorder at all . If in some few rare cases , there were unexpected terrorism operations , in fact it has leaked out from turbulent neighborhood Arab populated areas .

In result , especially at this very significant passage of time , disintegration of Iraq , complete devolution of its Kurdistan and formation of an independent Kurdish state, are considered as a must , because :

- 1- Formation of an independent state of Kurdistan , at Iraq , helps in controlling and extinction of the blazes of terrorism , war and anarchy in the rest of this country ; because , Kurds have practically demonstrated their multifunctional positive and efficient capacities in last decades ; so their independent presence , at this scene , can have an effective physical and moral impact .
- 2- An independent Kurdish state , can be utilized as an useful counterbalance , for normalization , stabilization and amelioration of current political situation , both in Iraq and Middle East turmoil arena .
- 3- Re-creating and realization of an unified stable Iraq , from existing heterogeneous antagonist communities , such as Sunni Kurds , Sunni Arabs , Shiite Arabs , Sunni Turkamans , miscellaneous Christians etc , is only a hallucination and utopianism romance .
- 4- This week , the people of Iraqi Kurdistan , by their unanimous extensive mass demonstrations , have expressed their absolute desire to have an independence state of their own , once again . So, formation

of such an independent state , is concretely considered as a justified democratic move .

- 5- Various statistic facts tell us , that formation of a Kurdish State , contributes to enforcement and enrichment of secular diplomatic camp of the world , which is considered as a positive political development .

So , hesitation in forming an sovereign and independent Kurdish state , is only waste of precious time , at a critical moment .

DUCK CHICKS SHALL REMAIN DUCKS :

May 23, 2004 .

Adaptation from Kurdish Folkloric Poetry .

An old woman , placed some hen eggs along with duck eggs , under her hatching hen , by mistake .

When after some weeks , all the chicks were hatched out , due to their specific natural character and discrimination implemented by mother hen , the duck chicks abandoned the mother hen immediately and in order to survive , they began to swim inside a deep water pool ; but the hen chicks, gathered around the mother hen off-shore , with ardent enthusiasm and enjoyed their genuine normal life .

When the mother hen observed this catastrophic natural circumstances , she abandoned the duck chicks; too , for ever .

Then the duck chicks realized , that they must insist on remaining ducks for ever , otherwise with a mother hen etc , they will be deprived , oppressed , discriminated and annihilated completely .

This is a precious lesson , extracted from the social science book of ducks

ELECTION AFTER SELECTION !!!

Tehran - June 26 , 2005 .

Most of us , around 15 million genuine and native Kurds , in Eastern Kurdistan region , living inside present political boundaries of Iran , were observing ninth Iranian presidential election last week , from a special remote perspective .

Now , after termination of elections and closing of ballot boxes , I like to pinpoint only some significant and vital deficiencies of this election , which prohibited me from voting and from an virtual participation :

- 1- I urgently expected to have at least some Kurdish candidates , representing the views , aspirations and attitudes of about 15 million Kurdish population , which is more populous than Lebanon ; but unfortunately there was not such an expected opportunity for us , because all Kurdish candidates were deleted from the respective list on a predetermined basis .
- 2- Either I did not know the authorized and registered candidates well or I did not approve them at all .
- 3- The remaining authorized and registered candidates were selected in advance by an authoritative monopolized body , so there was no point in electing after selection .
- 4- As according to Constitutional Code of Iran - I and all my traditionally Kurdish Sunni compatriots - , are deprived restrictedly from getting the position of Iranian presidency , so automatically we are out of this monopolized selective loop .

I hope desperately , in the next rounds of Iranian elections , (in addition to solving the most basic and important problems of Kurds in Iran , which due to its wide range of aspects , can not be formulated in this concise writing) , the respective authorities would provide us with democratic and equal conditions , for realizing an efficient and equitable election here , which is our right .

To: United Nations Office , Tehran .

Tehran – 15.-3.2003 .

RESOLUTION OF TEHRAN KURDS' ASSOCIATION, IN CONNECTION WITH THE INVASION POSSIBILITY TO IRAQI KURDISTAN, BY TURKEY'S ARMY .

In this critical circumstances , which prevails in the region , while war has spread its dark shadow over Iraq , for disarming Saddam , one of the most tyrant regimes of our ear , we are deeply concerned about the possible unjustified invasion of Iraqi Kurdistan , by Turkey's army , under vague , provocative and unlawful pretexts .

As you know , this district is out of Saddam's control for nearly a decade and at all has nothing to do with Baghdad ferocious regime . So , based on humanitarian principles , as an NGO , we believe , such invasive attack by Turkey' s army , which is against all prevailing national and international regulations , violates all limits of human rights and dignity ; in addition , it causes miserable extensive destruction and unrecoverable devastation and results in an overwhelming , general human catastrophe , in Iraqi Kurdistan .

Based on above humanitarian facts , we as a NGO , request to send this resolution to The United Nations respective headquarters , in order to prevent Turkey's army from this unjustified invasion .

Tehran Kurd's Association (Community) .

ENCOURAGING SIGNS OF INNOVATION AND GROWTH IN HAWLER :

TEHRAN - June 23, 2007

As I have been frequently invited to attend seminars, celebrations and meetings to Hawler ; sporadically I have presented guest lectures at Salahaddin University , and recently I have been elected as member of Kurdish Academy Of Science , there ; consequently in last 15 years, I have visited this city so often . My last trip to Hawler took place at April 2007, for attending a festival called " President Qazi Mohammad's Festival " , which was sponsored by KRG .

On my trips to Hawler over the last fifteen years, I have noticed more and more encouraging signs of urban development progress, such as new buildings and construction projects. The city is growing at an amazing pace.

When I first visited Hawler 15 years ago, it was still a deserted and war torn city. Many areas were devastated and the future was dark . Today there is a growing feel of optimism. For example , some of new features of the city include:

- 1- Dr. Sami Abdurrahman Park, which covers a huge area of land and contains many recreation centers etc .**
- 2- Sheraton, Khanzad, and Avesta hotels etc .**
- 3- Many attractive super stores, including New City center .**
- 4- Many newly paved streets and bridges.**
- 5- New hospitals and medical centers.**
- 6- Hawler International Airport.**
- 7- Cleaner streets and a more awareness of environment protection.**
- 8- Zagros satellite TV station.**
- 9- Kurdish Academy of Science.**
- 10-Kurdistan University.**
- 11-Many modern housing complexes, etc .**

There are many more examples of the rapid process of modernization, being achieved in the Kurdistan region. The area has undergone an incredible transformation. If you've never been in Kurdistan it's time you do it. Proverb" Seeing is believing , but touching is another thing ."

Actually , Erbil (Hawler) is another Iraq and I can propose to change the phrase " Iraqi Kurdistan" , to " Iraq Of Kurdistan " .

KEY PREREQUISITES FOR ADMISSION OF TURKEY IN EUROPEAN UNION

October 8, 2004.

In his week , after a comprehensive deliberation , European Union (EU) announced his decision to resume assessing the possibility for admission of Turkey , as a democratic member of that Union .

Certainly , there are many prerequisites for Turkey , to adapt its undemocratic laws , regulations and political culture to those prototypes , which are schematically prescribed by EU , for its future members, that they must be considered precisely in this strict evaluation process .

But , far from that continental diplomatic forum , I (as a Kurd) , from other part of Great Kurdistan (Kurdia = Kurdea) , introduce some appropriate key parameters to EU, in order Turkey can acquire necessary democratic conditions and get EU's full registered membership :

First of all , the falsified name of Turkey , shall be changed ; because "Turkey " means **TURKLAND** (Turkia) . And as nearly 20 million of that country's population are Kurds , so this term is not a factual and democratic term , i. e . this word dynamically jeopardizes the rights of its Kurdish community and stresses on its Turkish hegemony characteristics . Perhaps a suitable alternate name for next Turkey , is **TURKOKURD REPUBLIC** .

In the process of this indispensable assessment , a free and nationwide referendum shall be carried out in this country , asking the Kurdish population , if they prefer a political disintegration of Turkey and /or their devolution ; or rather they wish to continue remaining as part of a

totalitarian Turkish state . Such a referendum , shall be monitored and endorsed by independent and authentic trustworthy international supervisors , which are assigned bilaterally .

All types of segregation , shall be eradicated in this country , for example: political , cultural , economic , social and other discriminations .

Turkey must and must confess explicitly , that “ in that country there are around twenty million genuine Kurds , which are originated there , are not emigrants , not mountainous Turks and are not of Turkomongol tribe all , rather they are of Arian race , which from anthropological point of view ,is completely heterogeneous with Turks ” .

They must confess , too ; that “ twenty million Kurds and in particular their popular leader , Abdulla Ojalan (APO) , are not terrorists ; rather they are genuine and honest freedom seekers , who are fond of a peaceful coexistence with Turks , but were obliged to struggle for getting their legitimate rights ” .

Further more , as a concrete recommendation , I suggest the rights of Turks and Kurds in Turkey can be defined in the same manner as the rights of French and Flemish communities are defined in Belgium , which is a significant member of EU already .

And they must release APO and other political detainees immediately .

These are the main keys , to decrypt the conflict cipher in the Turkey's admission process at Eu .

Fascism Climax

Tehran –Feb. 17, 2008

In 1981 , I was in Istanbul for carrying out a self sponsored Kurdology scientific research program , but in fact it turned to be a Turkology program , because even the word "KURD" was completely forbidden and its pronunciation was a political offense !!! . While in Turkey of that time, there were at least 10 million Kurds living (now in 2008 , they have reached around 20 million) , I was not able to find a single Kurdish , letter , pamphlet or book in all Istanbul libraries to use them as my research material . The Kurdish music was completely forbidden, too and Kurdish culture was deplorably suppressed .

One evening , I , along with three of my Kurdish friends from Iran , intended to spend a night in a cabaret , at Istanbul sea beach area . At this cabaret ,there was no Kurdish music at all , so we were only obliged to listen to Turkish and European music and entertainment programs.

Naturally we were speaking in Kurdish with my friends together . Side by side our table , there was a man of around 40 years , with a western style costume . He was dining alone , and asked us in a fluent English : " what language are you speaking ?" We answered , that we are talking in Kurdish , then he asked some non-political common questions about the Kurds . We answered to his questions without hesitation and frustration . He said , that I am an American citizen and am driving to Damascus , Syria by my car . Can you guide me somewhat about the roads , distance , direction etc ? We said , that we have not driven at that direction ,are not familiar with that road and have no experience in such kind of trip to Damascus .

However, he ate the dinner very quietly , said goodbye and left the cabaret , without telling more .

Surprisingly , after half an hour , same man returned with a van , and a team of MIT(Turkish secret police) personnel . They asked us : " take out your weapons and explosives etc and raise up your hands immediately " . In this instance and situation , we realized this man who introduced himself as an American national, was a MIT secret agent . While round the cabaret eating table , we were speaking in Kurdish (our mother tongue) , he had reported our act(crime!!!!) to his office , so they came to arrest us for speaking in Kurdish language (mother tongue) . Their van was a formidable ambulatory mobile jail , with very small micro dark windows and almost all complicated jail equipments , including handcuff, torturing devices etc .

They insisted to take us to a local political stationary jail , but we resisted and told them , that we are not a citizen of Turkey , have Iranian visitor passports and showed them our passports. In the meantime , we

explained to them : in Iran it is not forbidden to speak Kurdish and talk about word " Kurdistan " , even we have a province called Kurdistan . We are not a Turkish national , so you have no right to arrest us for speaking Kurdish , which is our mother tongue .

When they were assured that we are not a Turkish national and not threatening Turkish security by speaking Kurdish language ! , they freed us , otherwise we should confront severe political prosecution and punishment .

This is practice is considered as " Fascism Climax " in third millennium and a shame for all humanity .

KURDS' FEDERALISM IS PROCRASTINATION OR A MILESTONE TOWARDS INDEPENDENCE ?

Tehran - January 9, 2007

Kurds all over the Middle East , whom are unjustifiably distributed among Turkey , Iran , Iraq , Syria and Armenia upon the collapse of Ottoman Muslim Empire (which was considered as a Kurds' political Big Bang), have their own fervent revived patriotic aspirations . Their ambitious aims , are linguistically described in such peaceful and nice terms as : Independence , Federalism , Autonomy , Self Rule etc , for which they have sacrificed substantially . Even in most cases , they were and are utilized as political and tactical counter balances , by super powers and local governments , for this pretext .

Always this is a serious question " if Kurds use Federalism and other above similar terms , as a procrastination or as a vivid goal towards real independence, which is a final salvation apparatus for easing their long sufferings and deprivations ? " .

Empirically , the experience of last century shows , that Federalism , Autonomy , Self Rule , and similar alternatives , are not practically implemental at this part of the world , due to the culture and framework of respective governments systems , who are occupying Great Kurdistan territory . For instance , yet the Iraqi Arab high ranking officials decline

do call this country " Federal Republic Of Iraq " , but they call it " Iraq " . " No rooster can lay eggs " . In last one hundred years , those mentioned rights have been granted to Kurds only on paper and in words etc in critical conditions , for cheating them and impairing their historical opportunities . For example in Iran and Iraq . But those promises were never realized and remained as Kurds' disturbed golden dreams .

Based on above explanations , amusement with such above fabulous terms and dreams , are considered as procrastination for attainment of Kurdish rights and achievement of their goals .In other words , it is a kind of time wasting . But if Kurds all over the world , in Particular Iraq , are aware of this fact and they use such terms and phrases , as a compromising milestone towards complete independence , it is quite justifiable . In this case and if it is so , all respective planning parameters , shall be drawn and take into consideration accordingly .

Unconditional and complete independence is the only efficient and practical alternative for Kurdish question ; not Federalism , Autonomy , Self Rule and similar approaches .

Facts About Kurdistan : Defragmentation or Fragmentation ?

TEHRAN : 24.10. 2007

In this concise article , I honestly intend to expound some critical esoteric points about the Kurdistan territory , which might lead to acquaint non-Kurdish readers , to discover the actuality and facts about Kurdistan , a geographically integrated country , which is extraneously partitioned between Turkey , Iran , Iraq , Syria and Armenia .

This region is a historical country , which has enjoyed efficient independence from the dawn of human history (for example the great Kurdish kingdom , 27 centuries before , headed by King Diako , whose capital was not too far from present Erbil , the capital of current Kurdistan Regional Government "KRG") . But unfortunately simultaneous with Persia and many other Near and Middle Eastern countries , also Kurdistan has been assaulted by Arab Islamic invaders from Arabic Peninsula , in 7th century A.D , and has been occupied by Arab paramilitary regiments , in the name of God , while we know God is not an Arab .

Upon the collapse of the occupied countries , including Kurdistan , and after the decease of Prophet Mohammad , primarily they were ruled by Umayyad Caliphate Dynasty , whose preeminent figure "Yazid" , did same man slaughter of today , in Kerbela , Najaf and other cities of Arabic Iraq . After them , Abbasid Caliphate ruled for around half a millennium in occupied countries and Kurdistan etc from Baghdad ; then after their fall and assignation of last Caliph called " AL-Mutasemubella " (First Benbella) by Hulako Khan , the Mongol Emperor at Baghdad , again Kurdistan fell under the reign of their religious heavenly heirs , i. e Ottoman Caliphs for around another 500 years , which was administered from hundreds of religiously corrupted mosques of Istanbul . When Western scholars were founding the fundamentals of modern science and technology , Caliphs were promoting fairy tale miracles and ridiculous superstitions .

But in first world war (which I call it Kurdish Political Big Bang) , Ottoman Caliphate Empire was attacked and conquered by Western Powers , then in fact whole of Great Kurdistan integral territory , which then was part of Ottoman realm (except a small part in Iran) , was fragmented , like contemporary Soviet Union ; and along with other colonies of Ottoman Empire , Kurdistan was also freed from formidable religious joke of Ottomans .

As a misfortune for Kurds , despite other fragmented parts of Ottoman Empire , such as Jordan , Lebanon , Syria , Saudi Arabia , Egypt and other countries of Northern Africa , Albania and other Balkan countries etc , the Western Conquerors , did not like to establish an independent Kurdistan state , while its surface area and population was nearly 5 times more than Jordan country ; rather they divided Kurdistan between Turkey , Iran , Iraq , Syria and Armenia , or better to justify , they transformed Kurdistan to a political counterbalance , in order to be used it in emergency conditions .

Now , when Kurds at any part of their fragmented and occupied mother land try to defragment (reunite) their fragmented land and wish to establish a legitimate country of their own , they are irrationally called separatists or rebels , but in fact they are defragmenters and

devoted members of Kurdish National Salvation Army –, separatists and rebels are the occupiers of divided Kurdistan .

Heterogeneous Terrorists

Monday, 16 February 2009

For nearly a decade, US forces assisted by their numerous military allies, have invaded Middle East in apparent pursuit of terrorism. This is a complicated political task and military operation , which requires an extensive analysis by specialists and experts . Nevertheless , I do not concentrate on this topic and leave it to be handled by respective professionals .

But , I like to concentrate on another dirty kind of terrorism , which is quite apparent and widespread there ; and does not require any complicated justification , counter justification and heterogeneous strategic , historic and political calculation . It is extremely a simple and straight forward issue :

As you know, a high percentage of opium plant (khashkhash) and other narcotics production fields are located at Afghanistan and it can be categorized as first country in this dangerous agriculture or better to say mischievous trade at least at Middle East. I am sure this type of so-called agriculture and ugly business , is more harmful , fatal and terrorizing than present contemporary Taliban terrorism . If classic terrorists demolishes New York Trade Center Buildings , opium and narcotics producers along with their affiliated drug traffickers network , ruin and spoil the world population's dignity , soul , moral , health and even economy, in their favor .So, this universal type of terrorism is more dangerous than self exploding , suicide bombing and so on , which might kill a limited number of innocent people .

Let me to say ,this is better for US and his allied forces in Afghanistan, to eradicate this dangerous plantation and trade business , prior to other terrorisms. This needs a more easy operation . That is : to level and ruin opium and other narcotics plantation fields and instead of it, begin to cultivate and harvest necessary and useful grains , cereals , oil seeds , gardens , fruits etc ; then the next campaign against dangerous normal terrorism , will be more easier, more justified and more practical .

How those opium and other narcotics producers can convince their conscience , to do this unclean job , which jeopardizes the whole humanity, from other hand they persistently claim their sincere devotion to GOD ? What kind of GOD ?

Civil War Has Started In Iraq

Tehran –December 4, 2006

The " Civil War " is a ferocious and malignant phenomena , in such a menacing extent , that sometimes its upshots and aftermaths are more devastating than those of formidable typhoons , ravaging earth quakes , roaring hurricanes and other major catastrophes , which are mostly referred to as "force major " or " Act of God " .

The most fatal and threatening aspect of the Civil War , is the fact that mostly the majority of combating warriors are within the same vicinity and they are always the citizen of same country , so they have a prompt mutual access to war arena and skirmish tools and can harm each other very easily . It is not like inter-national wars . They do not need to cross the frontiers and spend so much time to reach the battle zone ; sometimes the combat front is at same building , village , town or surrounding areas and they can disguise themselves in different manners . So , such type of fighting can be more destructive and devastating than inter-national ones .

Now , such a frightful situation is prevailing in some parts of Iraq and aggravates progressively .No one can ameliorate or at least mitigate this unprecedented tension . There are three major ethnic and/or religious rival groups , along with their dynamic and potential sympathizers and even practical sponsors in the neighboring countries, Middle East and all over the world . These three groups are somehow hereditarily and historically antagonist with each other , Sunni with Shiite , Arab with Kurd, Kurd with both and vice versa . After the breakage of Saddam's dictatorial chain , which was holding the security of their society firm , all these three rival groups are free , taking revenge and are seeking for more authority etc . This circumstances has

absorbed some vicious and notorious terrorist gangs , like Al-Ghaideh etc , and has transformed Arab populated part of Iraq into a hell of smoke , gunpowder and fire . Every day , tens or sometimes hundreds of Iraqis are killed , massacred or hijacked . The humanity and civilization , is under barbaric and terrifying threat of dirty groups , volunteers of death and ultra savage suicide .

In fact and by all strategic standards , this is a notorious civil war , even more dreadful than the famous civil war of United States . Tactically some leaders , politician , analysts or commentators, do not dare to confess , that this is a civil war and do not confirm either , that civil war has started already , but in fact it is .

As the Middle East region , is the crisis epicenter of the world - Afghanistan , Palestine , Lebanon and Iran are in a turmoil situation themselves - the atmosphere of this civil war , is extremely inflammable . Any delay in extinguishing this fire , will ignite the dynamite of Third World War , probably with nuclear weapons .

IRAQ'S TOTAL DISINTEGRATION IS , IS THE BEST PRESENT AVAILABLE ALTERNATIVE

TEHRAN - 30 .9. 2007

Very recently , US Senate , has approved a controversial bill to implement the partition of Iraq , into three separate federative regions . As readers of my articles may recall it , at least for about last two successive years or so , I am advocating persistently the full disintegration of Iraq .

Approval of said rational bill by US Senate , is considered as a positive and effective step forward toward prosperity of Iraqis , but does not look quite sufficient ; because , federalism configuration for Iraq , is not an efficient formula ; rather it will be far more better for the Iraqi people , if this country is completely divided into 3 genuine separate and demarcated independent countries ; namely : Kurdistan Democratic Republic (KDR) at north , where the country is dominated by Kurdish ethnic majority ; Iraq Central Republic (ICR) at central and eastern areas of Iraq , where Sunny Arabs are a predominant ; and Iraq Southern Republic (ISR) at south and east of Iraq , where Shiite Arabs , are a majority .

There is no real need whatsoever , to interconnect and fasten these three antagonist geographical sections to each other ; they are ethnically , culturally and religiously heterogeneous . That is , they have no physical and metaphysical strong attachments together , rather let me to remind it frankly , that there are even negative or even hostile hidden and apparent interrelations , in particular between Sunny and Shiite Arabs , for around 1.5 millennium , which can not be eradicated so easily .

In other words , a complete disintegration of Iraq (not federalism) , will be the best practical alternative solution to stop suicides , lootings , skirmishes , disaster and other adversary interactions , which has converted Iraq into a red lake of blood and a black swamp of war . We have such fruitful disintegration experience at ex Yugoslavia , so the necessary steps shall be taken before long .

Let me add , the original configuration of present Iraq , had been a terrible mistake , which has been committed after the collapse of Ottoman Empire and the first world war . May be the dividing powers of that post war era , such as Great Britain etc , mistakenly have thought , that all Iraq is populated by homogenous Sunny Arabs , and they can have a peaceful coexistence . Or they have implemented this tricky tactic , to create permanent chaos and unrest according to a previous elaborated plan ?

H.S. Soran's Message To KOSOVO NATION .

Tehran - Feb 16, 2008

PRESTIGIOUS KOSOVO NATION ,

As a Kurdish penman and supporter of all nations' rights throughout the globe , I evaluate and consider your proclamation of an interdependent state , as a necessary and legitimate approach , which is highly appreciated worldwide by human community . In this splendid and gallant event , I congratulate your nation cordially and hope , all occupied nations of the world , could make such a brave and legitimate move ,that is already authenticated and endorsed in UN's Human Rights Charter and get their independence .

I wish you success .

Why USA is extending his stay in Iraq ?

Tehran - January 16, 2008

USA participation or better to say USA leadership in demolishing Saddam's dangerous military machine and dismantling his barbaric cruel administration , is still considered as a general positive step , by all justice and peace lovers of entire globe.

But, USA army yet is in Iraq along with coalition forces , Iraq is transformed into a modern colony , in which neocolonialism regulations are completely prevailing . When USA is asked " why he is not leaving Iraq, even after

Saddam's collapse"? , the answer is " We are staying to protect this country from enemies , in particular , the neighbors who consider Iraq , as their potential foes and real threat to their security" .

As we know , currently Iraq at least nominally includes 3 so called federative parts : Shiite Arabs , Sunni Arabs and Kurds . And according to US pretext objective for more staying in Iraq , any portion of 3 above areas must be under protection of USA and he must prevent any of them from foreign aggression .

But , unfortunately we observe , that from December 2007 ,Turkey is bombarding and shelling the Kurdish part that federation regularly , under unjustified and irrational pretexts ; killing and injuring the civil people discriminately ; ruining houses , schools , hospitals and making harassment for the population etc . If Iran or Syria were attacking the Arab parts, USA was so quiet ?

If USA is staying in Iraq to protect this country , he must confront Turkey and prevent him from committing these devastating acts .If Turkey has a reasonable reason and justification , he shall sit round a table with he representatives of USA , UN , Federal Government Of Iraq and Kurdish Regional Government(KRG) and settle the problem by peaceful dialogue, not bombs and missiles .

If USA is not interested to prevent Turkey , so we can have two following assumptions:

- 1- USA is not staying at Iraq to protect peace and prevent aggression in this country, especially at KRG ; or
- 2- KRG is an independent region , neither under the vain management of Iraq nor under the desperate sponsorship of USA .

Then it can be assumed , that USA is only willing to stay there to get the astronomic figures of funds obtained from oil revenue and utilize other heterogeneous interests .

Now , the only alternative left for Kurds is to abandon and resign from all positions , which are elected for or assigned to them in so called Federal Republic Of Iraq in Baghdad etc . And continue their traditional struggle for real and genuine independence , before it is too late . In last 20 years , at least 30 countries became independent . Why Kurds are not entitled to have it ? .

Otherwise Turkey might surprise them overnight to extend his military operations , by violating and occupying Erbil , Kerkuk , Suleimanieh etc , trespass and ignore Kurdistan at all , as is reflected at Turkish leaders speeches frequently .

Time is the most precious parameter of life .

Kurdistan Regional Government (KRG), A Successful Symbol In Middle East .

Tehran - 05.03.2003

In these days , world community is focusing on Iraq in General and on Kurdistan Regional Governments in particular . As we know, in almost all international , continental , middle eastern and regional media , Iraqi regime is introduced and recognized as a harsh sample of oppression , despotism , backwardness and all other negative characteristics of a tyrant regime in the world.

As we know , unfortunately in present international terminology, the word Iraq and its geographical boundaries, apply not only to that part of Iraq , which is under the control of Baghdad central government , but also to the northern part of Iraq's map, called " Kurdistan Regional Government (KRG), which itself is demarcated in two separate North and South self-ruled zones , where some kind of a very prosperous de facto governments are existing for the last decade and there , the facts and realities are far more different from that of Iraq, which is under the rule of Saddam Hussein .

Mixing these two genuine different issues , which are quite separate from each other , is a big unforgivable mistake . Now, in order to provide a report on the successful and prosperous conditions, prevailing in KRG district , I point out to some facts, which as a non-Iraqi citizen , I have observed there in November 2002, during my visit. .

While the general situation in Baghdad controlled district is dramatically catastrophic , in KRG region , the situation is quite prosperous and developing , which hereunder I highlight some of its main points :

1-In KRG region , a nice pluralism democracy is prevailing , which in Middle East countries , is a unique and rare one . For example in this district , I have reckoned around 30 political parties , with very different ideologies and policies . Nearly each party , has its own publishing media and unlimited liberty of speech .

2-Despite the majority of Middle East countries, in KRG district, there are no torture , annihilation , intimidation , human humiliation , racial discrimination and despotism . Almost at this district , the capital punishment is practically outlawed and rights of minorities are respected .

3- In KRG controlled zone, during a short period of one decade , an outstanding economic development has taken place , in such a way, that now

its standard of living is far more high, than in neighboring countries , such as mainland of Iraq , Iran and Turkey . This region is really developing very fast , in many fields , including reconstruction , road making , communications etc .

4- From cultural and scientific point of view, it has achieved an outstanding progress . Now there are at least 3 internationally authorized universities, academies , tens of cultural and artistic centers etc .

5- Standard of national security , as compared to other countries in the region, is far more high .

Now , with regard to above facts , it is a dramatic error , if we bind the fate of this prosperous and democratic region, to that of corrupt and barbarous regime of Baghdad and to ignore all its achievements in last decade . For attacking and removal of Saddam , it is not necessary to ruin and destroy the outcome of 10 years painstaking effort , excellent achievement and efficient success of these two Kurdish regional governments – this would be a terrible political and historical mistake , which can exert a fearful negative impact on various parameters of life in the region . Moreover, it will be a very big unforgivable sin !

USA Shall Protect Kurdistan Skies, Against Turkish Attacks

TEHRAN - December 28 , 2007

AS we are aware , USA with diligent collaboration of Kurds and Coalition Forces, deposed Saddam's barbaric Regime , which is considered as a positive and humanitarian achievement , in particular by Kurds , which were the main victims of that ferocious dictatorship catastrophe .

Simultaneously , in order to break Saddam's resistance , USA demolished and disorganized the ex Iraqi Military machine completely , which was comparatively a frightening and powerful one in the whole region .

Now , in December 2007 a few years after the fatal collapse of notorious Saddam , Turkish post fascist government , pretending they are fighting P.K.K

organization , has commenced a devastating and indiscriminate bombardment of Kurdish Regional Government (KRG) , which still is irrationally categorized as a de jour part of so called Iraqi Federal State , by using around 100 bomber and fighter planes , on such an extensive scale, which killed several people , injured many individuals , slaughtered a lot of livestock destroyed many of region's infrastructure etc, in which a lot of local population , including children and women are made homeless and took desperate refuge, at the surrounding areas in this jack frosty winter weather of Kurdistan mountainous climate .

In the meantime , P.K.K origin and organization , is centered at southwestern so called Turkey . Nearly every day we see and hear in different medias , that Kurdish population of so called Turkey , at nearly all respective cities , villages and country side of Turkish Kurdistan, are holding extensive demonstrations and protests in support of P.K.K , these vast support of P.K.K , has even extended to Istanbul , Ankara and most Turkish Turk cities as well . In brief , if Turkey is looking to find and prosecute P.K.K supporters , the epicenter and permanent residence of nearly 20 million of P.K.K. loyal supporters is located in Turkey itself , not in Iraq . So , that is only a mischievous plan organized by Turkey , to turmoil and destabilize the KRG , not P.K.K . Because , Turkish authorities are suffering from a sadistic hatred and paranoid chronic Kurdophobia . From other hand , if they are looking for common terrorists , they shall come to Arab portion of Iraq , which is considered as main nest of terror and chaos and most secure stabilized headquarters of Al-Qaideh , not to KRG , which is the most peaceful part of Iraq and even of Middle East . Up to now , P.K.K has announced unilateral ceasefires every where frequently , expressed their wish for a peaceful coexistence , but Turkey authorities continues to defy it as medieval warlords .

In these strange circumstances , while USA is the exclusive landlord and occupying authority of whole Iraqi soil ,including KRG , this is considered as his major duty to prevent the Turkish bombardment and infantry incursion into KRG , by his giant swift reaction air force , which are stationed in military Iraqi and Gulf bases . From where, in 5 minutes they can reach Turkish aggression zone at KRG , start defensive operation .

Anyway , USA terminated Saddam genocides and aggressions in KRG , but this sad practice has been replaced by Turkish intervention , which Kurds expect USA , not only to prevent it immediately , but even stop helping turkey by rendering intelligence strategic surveillance assistance . If Saddam was not overthrown by USA , Turkey was not daring to commit this barbaric and miserable aggression . so : USA Shall Protect Kurdistan Sky Against Turkish Attacks ; And This Is One Of His Important Distinct International Obligations .

KURDS DEMONSTRATED THEIR ABILITY

Tehran - December 2, 2006

Middle East , the turmoil epicenter of the world , is the focus of many heterogeneous issues , which attracts the diligent attention of all the citizens of micro global township . One of these issues is the existence of Kurds , the biggest stateless nation of the world , which are the ancient and genuine inhabitants of these region from prehistoric eras .

As we see , Kurds achieved no political gain in comparison with their neighbors , such as Arabs , Turks and Persian in recent history , and always they remained as a second citizens of the country , in which they live . There are controversial justifications in this regard , in particular by Kurds' enemies , by which they blame the political failures of Kurds , as the reason of their lack of administration , political potential etc .

But in fact , now with the emergence of new opportunities for Kurds , in last 14 years at present Iraqi part of Kurdistan , the circumstances have proven otherwise refute these claims . That is , at a chaotic country like Iraq , the Northern part of that country , which enjoys a Kurdish administration and possesses a semi independence rule , has proved to be more democratic , peaceful and prosperous region , than the civil war stricken areas which are populated and managed by Arabs . Even , we can say this tiny Kurdish state , is far more democratic and tranquil than Lebanon , Palestine and some other neighboring countries .

Bases on above justifications , we can hope seriously that a future great Kurdistan independent country , would be a prosperous prototype of peace , democracy and advancement in all Middle East .

So , let us say sincerely , that **KURDS DEMONSTRATED THEIR ABILITY .**

KURDISH FAITHS , UNDER THE TRIBULATION OF ALIEN RELIGIONS

Tehran – Nov 17 , 2005

Note : This article , does not imply my religious affiliation , rather it is a patriotic and realism analysis .

Not only the Kurdish self rule , Kurdish politics , its political leaders and other Kurdish elements are severely oppressed by their expatriate , alien and imported counterparts , but the genuine Kurdish religions are also tribulated under the imposed heterogeneous theologies .

For example , there are two leading genuine and native Kurdish faiths , which both have originated in Kurdistan { Kurdland = Kurdia } , namely IZADY and AHL-E-HAQ religions , which are ferociously attacked by other religions :

IZADYS enjoy an ancient and nice Kurdish faith , which goes back to pre-Christian era . Now , their old shrine is located , at LALASH village , in so called Iraqi Kurdistan , not too far from Mosul city . Its followers are mostly spread in North , North West and North East regions of Great Kurdistan , with some scattered immigrant colonies in Europe and America . No precise statistic on the exact number of their population is at my disposal .

AHL-E-HAQ religion has originated in southern part of Great Kurdistan and now , SULTAN SAHAK'S holy mausoleum is located at the edge of Sirwan river , on the motor road , which links Paveh to Nousud , at Kermanshahahan General Govenorate , in Iran . Sultan Sahak was a Kurd prophet , who introduced this religion to his people . Followers of this religion , currently are living in Kermanshah , Ilam , Lorestan , Bumehen/Rudehen in Tehran Province , West Azerbaijan , East Azerbaijan and Mazandaran , in Iran . Some are living in Turkey and Iraq , too . This Kurdish faith , has been exported inside Arab and Turk communities , as well . Those Turks , in Iran , who have adopted this religion , are called GORAN . There is no precise statistic about the number of AHL-EHAQ followers , at my disposal , either .

But unfortunately , these Kurdish faiths , like all other Kurdish communities , philosophies and perspectives , have been invaded by alien ones , in the long course of history . Their leaders are prosecuted , their belongings are confiscated , their culture is interfered and their religion is sabotaged severely , in such a way , that IZADYS shrine community have took refuge in elevated mountains in Lalash at a remote area , in order to survive and still , they are stationed there .

AHL-EHAQ , faith had a similar situation . It is continuously usurped , sabotaged and invaded by neighboring religions , their leaders have been executed , their possessions confiscated and its followers have been deprived from many social rights , in their native homeland .

CONCLUSION :

If these Kurdish genuine faiths , were protected and safeguarded ; and if it was able to develop and expand without alien intervention , certainly it could proceed in its expected evolutionary course and could demonstrate themselves , as an efficient tool , for securing self rule and independence , for their beloved country , THE GREAT KURDISTAN .

SEVEN MAJOR KURDISH ASPIRATIONS

Tehran – OCT 16 , 2005 .

At least in five recent successive decades , some earnest and ardent political movements , have attracted the keen attention of the world , among which I can point out to Kurdish , Palestinian , Kashmiri and Bask issues , as most applicable instances .

Of course , in this relation , every nation and each question has its own particular incentives and aspirations , which needs a pertinent analysis , that is not in the scope of my present succinct writing .

But , as a Kurdish national – from my actual point of view , and based on recent factual events and respective history , I point out to seven major Kurdish aspirations , which are considered as passionate stimulus , to develop and enhance Kurdish struggles , uprisings and revolutions , as follows :

- 1- Having their own independent country .
- 2- To have universal equality .
- 3- To enjoy their language and culture .
- 4- To have a peaceful coexistence .
- 5- To prevent their repeated national genocides and oppressions .
- 6- To get full UN membership .
- 7- To enjoy expected development and progress .

Kurdish nation , with a genuine population of around fifty million , which is approximately one hundred times greater than Republic Of Malta , wishes to realize at least seven above aspirations , which all are conforming with the scope of UN charter on human rights .

But when this most important stateless nation is deprived from its eminent and appropriate rights , and his peaceful repeated demands on this subject , are ferociously suppressed by occupying governments and are negligently ignored by UN , what is the best next alternative for Kurds , other than a peaceful and persistent endeavor , which in most cases is converted to physical encounter , by other parties , without his intention to do this ?

As a member of global human society and a non-Kurdish national , in what way can you help the Kurds , in getting these legitimate rights , which is considered as your humanitarian duty ?

Kurds diligently wish progress , prosperity and well being for all nations , tribes , clans and households of the world , in particular for his neighbors .

A BIG BANG IN KURDISH HISTORY

Tehran – September 17 , 2005

Most of about fifty million genuine Kurds , who are unjustifiably and irrationally divided between five countries { Turkey , Iran , Iraq , Syria and Armenia }, along with other significant colonies of emigrant Kurds , who are dispersed and took refuge randomly at five continents of the world , are consistently complaining about this tragic situation and consider this terrible phenomena , as an international and global tyranny against their intellectual and historic race , which is the most populous state-less nation of the world . The roots of this malignant pathology , originates in a political BIG BANG , that has resulted in disintegration of GREAT KURDISTAN ; and consequently is labeled more than a national catastrophe for Kurds .

Now , in this brief explanation , I try diligently to provide a concise historical analysis about the causes of this political big bang , which can be summarized roughly with astronomical one , that separated constellations , galaxies , suns , planets , moons and satellites etc and created the dark celestial vacuum :

As a matter of undeniable fact , in the era of Ottoman Turk Empire of Istanbul , almost the majority of Great Kurdistan was under ferocious yoke of Ottomans , who oppressed and occupied this vast region of Middle East , for several centuries, In The Name Of God , The Compassionate The Merciful ...!!! If sometimes , part of Kurdistan was occupied and ruled by Farses (Iran) , it was a temporary and transient situation .

Like most religious regimes of history , Ottomans were considered as holy representatives and locums tenses of Poor Innocent God , and no Muslim subject (slave) has dared to express his/her protest or dismay , which was equal to his/her execution , decapitation , hanging , stoning to death etc .

Anyway , in World War I , so called Ottoman heavenly regime , was defeated and ousted by non-Muslim European countries and Ottoman oppression yoke was crushed down completely . Due to this political Big Bang , caused by Ottoman regime fragmentation , dozens of nations got their independence , but Kurds stayed in a political dark vacuum up to now .

The coin of this historical event , had two important diverse faces for Kurds :

- 1- A positive face , that was the product of collapse of Ottoman Islamic dictatorial regime , which could be harvested in favor of Kurdish case and establishing a Kurd Government (s) , like Arabs managed it .
- 2- A negative face , that was the real disintegration of occupied Great Kurdistan , which resulted in terrible fragmentation of our homeland .

Conclusion :

- A- The positive face of this event , was not exploited by Kurds in an optimal manner ; so instead of establishing a Kurdish Rule ; once more they were colonized , in a different and worst way .
- B- The negative face of this event , was the worst . Because , instead of being the colony of a single power , Kurds were divided among five heterogeneous powers , which encountered them with more difficult challenges . That is : Obtainment of independence , internal self rule , autonomy or federalism etc , was comparatively far more easy , from a single government than getting it separately from five central governments .

In Brief :

Collapse of Ottoman Dictatorial Islamic Regime , was not in favor of Kurds and can be considered as a major factor in hindering the Kurds , in getting their independence or any kind of internal self rule .

Proverb : By collapse of Ottoman Regime , Kurds {came out from a hole and fell down in a deep well } .

Kurdistan Artificial Boundaries Are Another Berlin Wall

Tehran - September 28 , 2007

In 1960s , I had an unexpected unique opportunity , to collaborate with Ethnological Department (Volkekunde Abteilung) of Frei Universitaet , West Berlin , Germany in Kurdology science . Most of the targeted mission comprised a comprehensive field study at Kurdistan areas , but occasionally I had the possibility of visiting West Berlin , on generous invitation of Professor Dr . Wolfgang Rudolph , who was the supervisor of our ambulatory scientific expedition .

At that extraordinary post war era , which was almost a decade after the termination of World War II and Hitler's catastrophic defeat , Germany was a war torn and devastated land , occupied in a hostile and extensive military operation , by 4 conquering powers , namely : Soviet Union , USA , UK and France .

At all corners of that country , occupiers' military garrisons were mobilized .

Berlin air travelers from Western world , were confined to fly exclusively by Pan Am , BOAC , Air France And Lufthansa Air Lines to Tempelhof Airport of Berlin ; that is, other flights were forbidden . There was a ground corridor to drive to Berlin from Western Germany , too ; because this city was located inside East Germany .

Professor Dr. W. Rudolph was residing and working at West Berlin , so as I have indicated above , sporadically I was visiting that odd city . Even sometimes I was going to his home , as a very welcomed guest . Later I compiled a concise book in German language together with him, about the Kurds , which was ultimately translated and published by Dr . Naji Abbas Ahmad in Kurdish . I do not remember exactly Dr. Rudolph's domicile address , but can guess it was not too far from renowned Brandenburg Gate . At that time , I was extremely diligent to visit the Berlin Wall , which was constructed by occupying powers , to divide two parts of Germany , that is West Germany which was occupied by Western allies and East Germany , occupied by Soviet Union .

At the Western part of divided Berlin , the Western occupiers had constructed special wooden platforms just at the vicinity of the Wall , some 3 meters high from ground level , to enable the Western world people to see East Germany - may be to realize , - as compared with West Berlin , how undeveloped is it ; i. e. mostly for political propaganda purpose . But such platforms were not erected at Eastern side of the Berlin Wall (refer to the picture) .

Occasionally I was climbing upstairs , sitting on that wooden platforms and dreaming about my maternal & paternal brother Dr. Ali Galawej , who was living at Leipzig city , at other side of Germany and Eastern Block for 4 decades . It was a fabulous reality .

At that time , I was witnessing and observing the anxious Western Germans , who also were coming over that platforms , expressing their utmost disgust and ravaging annoyance , exasperation and fury for partitioning disaster of their adorned mother land , paradoxically some of them , were crying , roaring and knocking on wooden platforms by their clenched fist , in such a severe manner , that their palms and fingers were bleeding from acute injuries . In fact, some became unconscious and fell in deep anesthesia condition .

Any way , in the course of steadily moving wheel of time , by exerting their utmost political , military , economic and other potential tools etc ; the all Germans were able to ruin , demolish and exterminate this cursed super artificial Wall and reunite the whole Germany . Now , Germany is neither divided nor occupied , it is a free , developed and independent nation . Once after a decade this reunification , Dr. Freitag , the German ambassador at Iran , invited me for reunification anniversary festivity , which was celebrated at his residence , at Pull-e-Rumi , Tehran , for an evening gala , when I had recited this interesting anecdote for him in brief .

Similar to Germany - Kurdistan region , after the enormous Political Big Bang at First World War , resulted from disintegration of Ottoman Islamic Caliphate

Rule (most of great Kurdistan region were situated under their administration) , was divided and partitioned by 5 invisible walls, called international boundaries , which are delineated by 5 local governments.

Kurds are diligently willing and have seriously decided to remove those political partitions (boundaries) in a legal and democratic process – like Germans did it , under the auspices of United Nations and other international respective bodies etc , and strongly condemn the erection of a ridiculous new concrete wall , which its rumors have been spread in recent months . Between these partitions (walls) , federalism , autonomy, decentralization procedure etc do not secure the Kurd's legitimate rights . Kurdistan is entitled to enjoy full independence and international equality , like other countries .

PS: I recommend you , to visit the Berlin Ethnological Museum , where we have deposited the collection of our above mentioned field research findings , in Kurdistan .

I present this symbolic poem to my suppressed compatriots , who are suffering under the most fierce tribulation of Kurdistan oppressors , in particular , those who are living in Altash Refugee Camp , for almost two successive decades :

H. S. SORAN.

KURDISH REFUGEE GIRL :

Embracing the phantom of gentle sensations ,
Her heart is knitting the silky dreams ,
Defenseless against rebellious NATURE ,
In chilling JACK FROST and hot sunbeams .

Paraphrase :

In this realism poetry , I have tried to depict the catastrophic moral and physical circumstances of a Kurdish refugee female infant , that during her stray , she has lost the road , missed her parents and is waiting in uncertainty , at an abandoned desert .

Tehran – May 9, 2004

H .S . SORAN .

THE KURDISH ISSUE

October 10, 2003

In recent years, particularly after the military intervention of United States and its allies in Iraq of March 2003, the Kurdish issue has attracted the most keen international attention of the people all over the world ; i.e. there

are a lot of people , who are generally acquainted with the Kurdish issue , but they like to know more about the Kurds and their homeland .

As a genuine native Kurd, who am engaged in Kurds and Kurdistan matters for about half a century, I try to answer to such probable questions about the Kurds briefly , in order to fill up such kind of informative gaps :

- **What is the total population of Kurds all over the world ?**
It is not verified precisely through statistics; but their number is almost estimated at around fifty million.
- **Where is the geographical homeland of the Kurds?**
Their traditional homeland is situated inside the present political boundaries of the following countries, respectively on the basis of number of the Kurds , living there :
 - Turkey .
 - Iran.
 - Iraq.
 - Syria.
 - Republic Of Armenia .
 Meanwhile, there are some dispersed colonies of the Kurds in The Republic Of Georgia and Central Asian countries. Also a lot of Kurds , have emigrated to Europe, America and Australia mostly in last 30 years.
- **What kind of political structure they are preferring ?**
As far as I have realized, almost the great majority of Kurds are interested in full independence and they strive to establish a republic of Great United Kurdistan State; which this utopia can be verified by a general referendum.
- **Political geography ?**
As the Great Kurdistan region is in general divided between five countries, so there is no distinct and unique political administration process ; every part of divided Kurdistan is managed in accordance with the political process and method of the central government of that respective part , except in Kurdish autonomous region of Iraq . In Great Kurdistan , there are more than 300 cities, towns and townships , among which , these are approximately ten bigger ones : Amed , Kermanshah , Sileimani , Hauler, Karkuk , Sena , Dihok , Qamishlu , Erzurum and Ilam .
 - Natural geography?

In the Kurdish populated regions of the world, there is no easy access to open sea, which has resulted in a considerable isolation and political restriction for the Kurds, in the course of history .In general , Great Kurdistan can be defined as a mountainous attractive area of nice landscapes and plains , which are decorated by following picturesque mountains : Azmar , Shaho , Dalanpar , Dalahu , Agry , Ararat , Qandyl , Bamo , Zagros , Pyramagrun etc . These are some rivers of the Great Kurdistan, too : Siruan , Ze , Furat , Dijla , Araz , Kalue , Gadar , Qzl Wazan , Jaghatu , Tatahu , Gauaro , Jhauaro , Lauen , Sarogh , Sarshyu , Saqiz , Mirade , Sablagh etc .

- **How they look at the humanitarian issues?**
They dislike aggressiveness and believe in human equality, freedom and peaceful coexistence. They respect others' rights diligently.
- **Kurdish poetry ?**
They have a rich and dynamic poetry, both of classical and new style, in poem and prose field. They possess an extraordinary reach folklore, too. These are three famous Kurdish patriotic poets : Ahmad-y Khany , Qaney Mariuany and Hemn .
- **Political history :**
They have a long , bright and humanitarian history . It is highlighted by era of Emperor Dyako , King Mahmud of Kurd {after the first world war} ; Peshaua Qazy Mohamad , the president of Kurdish republic 1946 and president Mustafa Barzany , the national hero of contemporary Kurdish political movement etc . Now , there are two regional governments in the Iraqi Kurdistan , which are practicing a limited self rule , since 1991 .
- **Kurdish calendar :**
Now It is year 2703 . For example today is 27.06.2703 Kurdi.
- **Language ?**
The Kurds speak Kurdish language, which is a significant one , in Arian languages family . Kurdish has several dialects and sub-dialects itself. The Sorani dialect, which belongs to southern and central parts of greater Kurdistan, is written in Arabic alphabet , but Badini dialect , which belongs to northern Kurdistan, is written in roman alphabet . Kurds in Armenia, write their language in cyrillic scripture .

- **Religion :**

The Kurds in Great Kurdistan , have several religions, which some of them are originated in Kurdistan and others are imported . They are as follows:

- Izadi religion : This is a genuine Kurdish faith , originated in Kurdistan and is older than Christian religion. It has a special Kurdish alphabet . Their religious book is called Mashaf-a-Rash(black book).
- Ahl-i-Haq religion : This is also a genuine Kurdish faith more old than Islam . This religion has been exported inside other nations by Kurds , for example some Turks and Persian have been converted to this religion .
- Islam : Both Sunny and Shiite . The majority of Kurds are Muslim.
- Christian : There are few Christians , too ; which mostly are Catholics .
- Zoroastrians : Before conversion to Islam , most of the Kurds were Zoroastrians . Still some Kurds practice this faith; but this religion is reviving among the Kurds rapidly, now .
- Jewish : There were a lot of Kurdish Jews in Great Kurdistan , who had Jewish religion ; but most of them have emigrated to Israel ; though some of them are still in Kurdistan . It is not clear for me, if these Jewish Kurds , were of Hebrew race or were Kurds from beginning ; but almost all of them could speak both Hebrew and Kurdish languages efficiently . Some Kurdish Jews had converted into Islam ; who are called Nomusulman (new Muslim) and living in Kurdistan.
- In Great Kurdistan , there are Armenians , Assyrians and Caldeans as well , but they are not of Kurdish race . Armenians are of Arian race. Assyrians and Caldeans are Samis .

- **Occupation :**

Agriculture is the significant occupation of most of the Kurds ; however there are a lot of people who are busy in business , teaching , medicine , manufacturing , different crafts , arts and animal husbandry as well .

- **Economy :**

Due to a rich deposit of the oil in Karkuk , Khanaghin , Naft-e-Shah , Taqtaq and even Sheno , this country can be classified as a rich one ; not to mention agricultural , animal and other mineral wealth .

- **Cultural restriction :**

In most parts of Great Kurdistan , formal education in Kurdish

has been and still is forbidden and Kurds are officially educated in the language of the respective central governments, which are almost Turkish , Persian , Arabic and Armenian .

In Iran, teaching and writing of Kurdish on a private and non official level , is not forbidden ; but despite the lawful authorization of Iranian

Constitutional Act , there is no official education of this language . In Iran , there are some limited and orientated radio and TV broadcastings in Kurdish along with some Kurdish publications , but there is no Kurdish daily newspaper at all .

In semi-independent autonomous region of Iraqi Kurdistan; from 1991 on , there is an adequate ample space for education in Kurdish ; and in fact there is no restriction on this language and Kurdish culture in this part of Kurdistan . Here, the Kurdish language and culture is boosting; even they teach Kurdish at three universities , at the doctorate level . Even before 1991, when Saddam's regime was ousted on a de facto basis in Iraqi Kurdistan, the Kurdish language was enjoying more freedom , than in Iran , Turkey and Syria.

In Turkey, the case is completely worst. The Turkish government, even denies existence of nearly twenty million Kurds in Turkey , at all .They have ironically defined and specified the Kurds as mountainous genuine Turks , who have forgotten Turkish and have learned Kurdish, by some unfortunate accident !!!???

In Syria , too ; Kurds are not permitted to learn and develop their mother tongue and culture systematically and officially .

In Armenia, with far less Kurds , they have enjoyed more cultural freedom ; in such an extent , that from 1920 to 1980 , though their number are nearly one hundred times less than the number of the Kurds in Iran , they have written and published approximately fifty times more Kurdish books and publications , than in Iran . They have a radio broadcasting station in Kurdish, too ; for around last forty years .

However , the Kurds worldwide, are striving and struggling to acquire more and more cultural freedom , particularly in teaching , learning and promotion of the Kurdish language .

- **Kurdish music ?**

Kurds possess a rich classic and traditional folkloric music ; and recently they are engaged in pop music , too . These are three famous contemporary Kurdish singers : Late Mr. Ali Mardan , late Mr. Hassan Zirak and Mr. Nasser Razazi , but there are a lot of other qualified and celebrity singers , too .

- **Kurdish Dance :**

Kurds admire dancing too much . Traditionally, they dance in circles , catching each others hands and if possible , they prefer mixed dancing of men and women together ; accompanied by Kurdish music and songs . The Kurdish dance circle , rotates anti clockwise . Some scholars have said, that Kurdish dance, mostly is interpreted in a metaphoric mute expression of political protest and gesticulation .

- **Kurdish Clothing :**

There are abundant different traditional Kurdish clothes, in the various parts of Great Kurdistan ; but in general , Kurdish men 's wear is baggy and wide ; while women's are very fantastic and dramatically nice , which safeguards both their strict tradition and romantic beauty . Most of the Kurds prefer to wear Kurdish clothes ; unless in circumstances , where they are obliged to cope themselves with the expatriate environment .

- **Kurdish Psychology :**

In general the Kurds are polite, honest, sincere and they admire fidelity , but if they are humiliated or disregarded, they might get overexcited promptly . Most of them admire bravery and are good forgivers.

- **Kurds 's voice tone :**

Most of the Kurds, in particular those of Iran, have a comparatively low level of voice tone in serious speaking, as compared with Persians - for example . A scholar has indicated , that some Kurds are speaking with the lower section of their throat .

- **Women's role in Kurdish society :**

In traditional Kurdish culture, women had a significant role in the family life ; even sometimes , there had been a matriarchal familial system , but after conversion of Kurds , from Zoroastrian faith to Islam , this matriarchal power , has been overshadowed by Islamic patriarchal principles .

- **Anthropology Of The Kurds .**

They belong to Arian race, which have a very close anthropological kinship with Persians, Daries, Balouches, Gilakis , and Ordus .

- **Intellectualism :**

Most of the Kurds admire science , technology , culture and arts too much ; and have struggled to enhance their intellectual level in such an extensive scale in last decades , that they have changed their pastoral society of the first half of 20th century , to an intellectual life system ,

which has convinced some scholars to say, that “ in the Great Kurdistan , an intellectualism renaissance has started and is continuing with a rapid speed “ .

P.S: With regard to above facts and based on international political trends , a more prosperous life is foreseen for the Kurds, in the very near future .

KURDISH LANGUAGE IS NOT AN IRANIAN LANGUAGE

Tehran - July 8, 2004

In some significant cases, there is a confusing mess in the actual cognition and real understanding of The Kurds , by other nations of the world , in particular by linguistic circles of European and Transatlantic countries , which is partly due to a misinterpretation and/or malapropism of the words .

For example , we observe frequently , that some linguists there , refer to Kurdish Language as an Iranian Language , which in fact , this strange hypothesis is not matching with the prevailing reality .

What is Iranian Language ?

In general , up to end of Qajarieh era and beginning of Pahlavi dynasty , Iran of today was referred to as “ PERSIA “ , which means FARSLAND or country of Farses . Even , in the literary eloquent masterpieces of these four leading Persian poets , i.e. Sadi , Hafez , Maulawai and Nezami , you can not find the word “Iran “ at all . While they have used other geographical terms very frequently , such as Fars , Turkistan , Baghdad , Bukhara , Yaman , Sham , Tabriz , Iraq , Shiraz , Hindustan , China , Samarqand and tens of other geographical places . This circumstance affirms my view , that even at those poet’s days , the word “Iran” was not in use . If another Persian poet , Abulqasem Ferdowsi has utilized the word “Iran “ , in his Shahnameh , this was an antonym of word “Turan “ , not country or land of Persia .

When some linguists who are inspired by indirect political spur , claim that Kurdish language is an Iranian language , it is a total counterfeit . Because Kurdish language is older than the new political word of “Iran “ , emerged in the beginning of 20th century .

Kurdish language is an Aryan tongue , and a sister language of Tajik , Gilak , Baluch etc . It is the mother tongue of Persian (Farsi) , because Kurdish is older than Persian . One can’t imagine that the Persian Language , from Shiraz even plains has entered the impassable ragged and rocky mountains of Hauraman , Barzan , Qandil , Agri etc . So, Persian is the same old Kurdish language , which is mixed and consequently deformed by the intrusive entry of the frequent invaders

and occupiers of Persia , such as Greeks , Tatars , Arabs , Mongols , Russians and Turks etc .

So, Kurdish is not an Iranian Language , rather it is AN ARYAN ONE .

Kurdish Rebels Or Kurdish Salvation Army ?

TEHRAN : November 9, 2007

Certain political language sabotage makers or better to say , some linguistically orientated politicians , commentators , reporters , news agencies etc , not only divert and transform the course of actual news , issues , sentences , phrases , words or even, the political terminology ; but even by intention and mischievously , misinterpret and misuse them , in order to justify their malignant attitudes and malicious goals .

To provide an typical and vivid example : Some of them surprisingly introduce gentle butterflies in shape of vicious crocodiles and innocent lambs as wild Alpine wolves . About which , the great poets and leading intellectuals of our global society , have composed efficient paradigms and metaphorical verses . For instance , I point out to a superb and eloquent poem of Alfonse De La Martine , the French scrutinizer poet , called : (Wolf And Lamb) !!! In which , he quite symbolically explains , that when a wolf decides to slaughter a lamb, the beast expresses many false thing , to justify its criminal act ; ultimately it kills the lamb and eats it .

Nowadays , this terminological distortion , is concentrating on Kurds , which are approximately the biggest populous stateless nation of the world , and are forcefully divided between many countries ; thus deprived from most primary human rights , freedom and political integrity .

Unfortunately , some world media , political gangsters called statesmen/women , and so on , unjustifiably use the denomination of KURDISH REBELS , which means the Kurds , who are making rebellion , i e. are anarchists , make terror or malicious agitation !!! . This word is

unmercifully used , as the Kurdish activists , who are almost struggling peacefully , must be called KURDISH SALVATION ARMY , not REBELS . As they are confining their efforts to get freedom , peaceful coexistence and human rights for 50 million of their Kurd compatriots .

Real rebels are those , who have occupied Kurdish land , forbidden their language , humiliated their culture , executed their compatriots , jailed their peaceful activists , confiscated their property , deported them from their traditional land , transformed them to contemporary Diaspora , bombarded them chemically more fatal than Hiroshima (for example Halaja) , carried out heterogeneous annihilations on them , including 10 kinds of (-cides) , such as genocide . Above mentioned bodies are official rebels . Kurds are real and innocent liberators .

PS : To cure such pathological phenomenon , instead of present false name of UN , an humanitarian organization shall be established , to treat the pains and injuries of the nations (people) , not to side the governments , which are mostly illegitimate and unlawful .

Kurdistan Region , A Laboratory For Pilot Testing Of Chemical Weaponry

Tehran - June 20 , 2008

(Anniversary Commemoration of Sardasht Chemical Bombardment)

As a writer without frontier - but of Kurdish origin , three years ago , I had an exceptional opportunity to carry out a relatively general field study of Sardasht Chemical Bombardment and its fatal aftermaths . This bestial bombing was committed indiscriminately by Saddam's savage horrible regime , in June * 27 , 1987, during Iran/Iraq futile conflict , in which Kurds had no role in igniting its cursed fire .

Sardasht is a charming small size mountainous township , located at Iran/Iraq geographic border , at Northwestern corner of Iran , with famous wild black grape vine yards and romantic superb landscapes , among which the Shalmash Waterfall , is an outstanding and elegant natural

symbolic phenomena , that attracts thousands of tourists in spring and summer season each year . Among many ardent and devoted patriotic personalities of these town , we can typically point out to late Mulla Awareh , who was a talented , high ranking and popular Kurdish poet and Peshmarga (liberator) , that has been executed by Shah's Panfarsism regime , in late 60s treacherously .

This Sardasht bombardment was carried out at day time by Saddam's army , and its attacking epicenter was exactly the middle square of the town , called Sarchaweh . There was no military garrison or any similar fortification at this location , i.e. they had chemically bombarded a pure civilian population . For example only a household , called Vahidi family , suffered around seven casualties and/or dangerous injuries . In this super barbaric bombardment , which was a continuation of animosity Kurdish genocide by Saddam and completion of Halabja catastrophe , thousands of civilians were martyred , handicapped , crippled or seriously injured or made homeless .

Besides visiting the respective martyrs' cemetery there and pilgrimage to their mausoleum at town outskirts , I saw many crippled persons and injured ones , which still are suffering from serious pains and chemical aching .

Besides this lamentable situation , I was told that this devastating bombardment had an deterrent impact on feminine and masculine birth rate ratio and resulted in a high and abnormal cases of abortion, too .

The native people said , that in general this bombardment had a deteriorating and destructive implication on natural environment , human life , plantation circumstances , animal kingdom and agriculture etc severely ,which it is necessary that its aftermaths be evaluated and analyzed by different teams of experts precisely , in particular its long term dangerous ones , such as its cancerous genesis , nervous pathology etc on future generations .

I must emphasize on this shocking fact , that besides Sardasht and Halabja , which we call them Kurdistan Hiroshima and Nagasaki , tenth of other civil small communities are bombarded chemically in Kurdistan , at Iran or Iraq geographical domain , for example Qalache village near Mariwan etc .

But this ferocious process , which is still continuing , has transformed Great Kurdistan (Kurdish populated areas of Middle East) to a Laboratory For Pilot Testing Of Chemical And Extraordinary Hazardous Weaponry .

As an example , I point out to rumors of a possible chemical bombardment made by Turkey , at QANDIL Mountain environment in Kurdistan Regional Government (KRG) district , Iraq , which is mainly populated by civil Kurdish community , in beginning of 2008 , for which unfortunately up to now, I had no opportunity to visit the region and make a field survey

similar to those I made at Halabja and Sardasht ; but as far as I have seen on prestigious TV news screens , in result of Turkish government's suspicious bombardment , those small lambs and goat kids , which were sucking their mothers milks , were intoxicated and perished in groups immediately. Even parent animals , which were grazing at those intoxicated pastures , were died in herds ; that is indication of a possible chemical pollution ,made by Turkey's bombardment .

So, I propose to respective international responsible authorities , to commission expert teams to visit the bombardment site before long and try to prevent any catastrophic long and short term outcomes , which can be transformed to another Halabja and Sardasht ; and if respective investigations proved to be positive , exert their best effort to minimize its dangerous impacts .

In the meantime , now when coincides with the anniversary commemoration of Sardasht chemical bombardment , I reiterate my deepest condolence and sorrow to the family of the martyrs . And I thank the Kurdish students of Esfahan University , in Iran who hold an anniversary gathering to commemorate that catastrophe , in particular I appreciate the head of Kurdish Students Society at Esfahan University , Mr. Jalal Hajizadeh and his diligent classmates , who organized that commemoration gathering for Sardasht Chemical Bombardment - along with Anfal and Halabja Kurd's genocide, which are carried out in Iraqi occupied Kurdistan , in last 3 decades .

A serious question from Mr. Ban Ki-moon the UN secretary general : If Kurds are selected as laboratory mice , for testing the performance of new chemical and other hazardous warfare?

But dear Sir! Kurds have demonstrated explicitly that are genuine lovers of universal peaceful coexistence , equality and justice . They shall not be used as laboratory mice .

Note: some are citing bombardment has been carried out in June 28 ?

TURKEY'S KURDOPHOBIA IS A MALIGNANT PSYCHOPATHIC COMPLICATION

Tehran – Nov 22 , 2005

Not only some individuals are suffering from physical and mental syndromes , but sometimes tyrant regimes and their obsolete leaders are also chronically infected by heterogeneous viruses , which such complications are considered as a malignant psychopathic ailment .

One of these severe cases , which is considered as a symbolic example of such a terrible disorder , is the chronic Kurdophobia , which is infected the total biological structure , metabolism situation , brain tissues , cardiac system , soul and subsequently the thinking process of Turkish leaders , whom are unjustifiably governing a vast area of Great Kurdistan in Turkey , that is historically owned and populated by approximately 20 million genuine Kurds .

The Turkish Kurdophobia , can be classified in two following principal categories :

- 1- Actual fear .
- 2- Hallucination .

Actual fear of Turkish regime , has its roots in an Arabic proverb , which says : { A treacherous person , is afraid } . It means , Turkey's fear from Kurds , is in this fact , that they were and are oppressing the Kurds , in a ferocious manner without discrimination continuously , so always they are afraid of their revenge . Turks' fearing in this respect is quite justifiable and nevertheless , this phobia is bothering their physical life and sleepy conscience persistently , in such a manner , that it has been transformed to the most internal problem of Turkey and a dreadful nightmare .

The hallucinous fear of them , as it appears from its denomination , is quite baseless and unrealistic . This type of Kurdophobia is mainly based on this wrong concept , that if Kurds become independent and powerful , both inside Turkey and outside it, they are a potential danger for Turkey and jeopardize their existence , safety , welfare etc . But according to reliable pages of history and Kurdish behavior/culture records , this anxiety is only a psychopathic hallucination , because Kurds , as ancient and immediate neighbors of Turks , have proved in the long course of their history , that they are fond of democracy , peaceful coexistence , mutual friendship and amity ; and despite numerous

instances of Turks' racial cleansing , massacre , torture and discriminations against Kurds , there is no negative record and black point , in the Kurdish side of neighborhood relation and for sure , the history will be repeated . Kurds will not and can not change their behavior , culture and human character , not only towards Turks , but in connection with all their neighbors as well .

Conclusion :

As a Kurd , we respect good neighborhood relation with Turkey's Turks , we are looking for a peaceful coexistence with them ; and in fact we expect same from them , without unjustifiable Kurdophobia and strange hallucinations of their imposed leaders . We must have **TURKOPHOBIA** .

KURDS , JEWS AND ARMENIANS

Monday, 09 February 2009

In this concise analysis I try to point out to some parameters , which have resulted in deprivation of Kurds , to possess their self rule and independence :

Foreword :

As you might know , Kurds , Jews and Armenians are three old nations , originated at Middles East region . While roughly the number of Kurds exceed about 40 million , Jews are estimated to less than 10 million in Middle East and Armenians even are estimated to be less than Jews all over the world?. Altogether Kurds mostly are nominally of Islam faith (while they possess other oldest and native religions);but Jews are almost of Hebrew(Jewish) religion and Armenians are almost thought to be of Christian faith . Jews and Armenians soil , altogether are less than present native homeland of Kurds , which is called Kurdistan .Both Jews and Armenians, now enjoy full independence at their countries respectively called Israel and Armenia , but Kurds currently are without an independent country , consequently are divided among 5 countries : Iran , Iraq , Turkey , Syria and Armenia , and an Diaspora of around 3 millions dispersed in 6 continents , particularly Europe . The most common historic similarity

among them , is they have suffered ferocious genocides in history; for example Jew's genocide by Nazi Regime in Germany ;Chemical bombardment of Kurds at Halabjeh and Armenian Massacre at present Turkey , committed by Ottoman Turks .

Now, after the above brief introduction of those three nations , I try to list the causes , which have deprived the Kurds from enjoying their legitimate rule and become independence , while Jews and Armenians are not so :

1- Because for last 14 centuries , Kurds were of Islam faith . Anytime they tried to have their independence , Islam caliphates and rulers , used Islam religions as a political hammer and crushed their legitimate demands or even their uprisings . If they were Zoroastrians as before Islam era , certainly they were able to launch their religious counter logics and get their independence . As a symmetric issue, I point out to Persians(Farses) , for about a millennium they were suffering under the same religious hammer , but while they changed their faith to Shiite faith (a reformed Islam belief) , from Islam orthodoxy Sunny faith ,they were able to recover a little and established their independent country again , whilst still they are somehow under the influence of this powerful political hammer, from different perspectives.

2- Because Kurds lacked political strategies and had no considerable systematic long term plan .

3- Kurds have suffered from a general internal antagonism phenomenon .

4- They had almost no strong international coalition , i.e they had almost no sincere friends .

5 – Their geographical location was extremely unsuitable , in particular they have almost no sympathetic neighbors or super powers to support them cordially .

But if I summarize it in a sentence , I think if Kurds did not convert from Zoroastrianism to Islam or had kept another native and genuine religion of themselves , such as KAKAISM or IZADISM , now they had their full independence .Proof : Before conversion to Islam , they had their great Kingdom.

Note : This article is only a neutral analysis of political facts and their respective outcomes . It does not try to support or reject any religious idea . Religions are personal matters .

KURDS' SEVEN MOST SIGNIFICANT EXPECTATIONS FROM INTERNATIONAL AUTHORITIES

Tehran - Oct.24 , 2006

In order to alleviate Kurd's present chronic sufferings comparatively , at least the following emergency treatments , are highly advocated :

1- The United Nations and other world authorities shall carry out a field referendum , under their strict supervision and sponsorship , all over the Kurdish populated areas of the globe , on a probable political devolution task and ask the Kurds : if they prefer to enjoy their own independent state or yet they wish to continue to be part of another country . If they voted for separation , the international authorities , including UN , superpowers and relevant circles , shall perform it ; and provide the Kurds with independence gift and/or anything they vote for themselves .

2- The international authorities must not presume or assume Kurds , as Turk , Persian , Arab or Armenian individuals , the colonial powers , who are currently occupying the respective parts of Great Kurdistan . Rather , they shall recognize them as Kurds , a separate nation , with a different psychology , culture , history and human aspiration .

3- The United Nations shall not act as United Governments apparatus , toward Kurds ; rather UN shall recognize Kurds as a separate nation with legitimate rights and shall protect them against any oppression and/or subsequent multilateral discrimination .

4- If we assume the world population to be six thousand million people { 6 billion } , and while Kurds are estimated at around fifty million , so by this rough calculation , from every 120 individual of the globe , one is a Kurd . It means : $6,000,000,000.- : 50,000,000.- = 120$. So Kurds shall be allowed to enjoy their legitimate rights from universal resources and facilities on the basis of above ratio , i. e 1 from each 120 .

5- Before establishing a genuine independent Kurdish state , the international authorities including UN and superpowers etc , shall protect the Kurds against any violation and aggression .

6- Kurds shall be allowed to have a seat at UN , to protect their legitimate humanitarian rights . This point looks quite licit , because currently , there are many micro and medium size nations , who have a seat at UN , while they have a population less than 10 percent of Kurdistan , the ancient homeland of Kurds .

7- An international committee shall be incorporated at world level ,

consisting of effective, appropriate and intellectual bodies of miscellaneous nationalities , called Kurd's Rights Protection Committee { KRPC } with sufficient powers of authority performance and practice , to protect and sponsor the Kurdish vulnerable case , at all parts of the world .

Otherwise , we shall expect seriously the repetition of terrible fatal catastrophes such as : Halabjeh chemical bombardment in Iraq , Kurdish total denial and their systematic racial genocide at Turkey , gradual ethnic melting and discrimination at Iran , as well as their progressive disappearance in Armenia , along with demographic dispersion/degradation in the form of Kurdish Diaspora all over the world etc .

KURDS AND EAGLES :

Sept 3, 2004

When we look at the Kurd's demographic displacement diagram precisely , at least in recent centuries , as a consistent and regular routine , they have evacuated vast agricultural plains and large fertile fields and have ascended to uncultivable highlands , elevations and mountainous vicinities . I, e . Kurdish demographic movement trend , has been geographically climbing upward .

As a schematic paradigm , in preceding centuries , the following towns were a genuine fatherland domicile and pure habitation homeland of Kurds : Khoy , Binaw , Malkani , Hashtaro and Duawan (Mianduab) .

Note : My supporting evidence to authenticate this statement , is the following etymological backgrounds of those locations respective denomination , in Kurdish language .

- 1- **Khoy** : In Kurdish language it means “ salt “. This town is situated at the eastern coast of Urumieh Lake , which has a strong saline water . So natural vast salt fields are abundant at its beaches .
- 2- **Binaw** : It means “ water terminal “ . This town is situated at the southern coast of Lake Urumieh .
- 3- **Malkani** : It means “ big basin-shape pottery dish “ , for making dough (floury paste) etc . This town is the producing center for clayware and pottery .
- 4- **Hashtaro** : It means “ eight rivers “ . In this extensive flat surface area , eight rivers and major streamlets are flowing down , mostly from Sahand Mount. Even , Sahand itself , means “ chilling cold “ .
- 5- **Duawan (ex Mianduaw)** : It means “ mesopotamia or more precisely two rivers “ , because it is located betwixt two rivers Jaghatu and Tatahu .

As you realize , five above terms are absolute Kurdish expressions , but those places now are considered as pure Turkish (Azary) towns . Because these names are Kurdish , it is apparent that their previous population were Kurd ; as Kurds had no influence or authority in naming the towns and geographical locations of other nations remotely - like nowadays .

But surprisingly , almost all the Kurdish population of those towns , gradually left those prolific and fertile places , which are the best agricultural and horticultural locations of Kurdistan , under multilateral pressure of neighboring aggressive nationalities and central governments and retreated to elevations , saturated by skyscraping rocks , precipitous cliffs , ragged mountains , and undulating hills at the lower eastern foothills and outer skirts at northern axis of Zagros mountain range , which are far less fertile , cultivable and accessible .

When we study the animal psychology , we can establish parametric behavioral interrelation and symmetric lines between human beings and most animals . For example its has been rumored , that “X “ human race is similar to “ fox “ ; “Y” race is similar to “wolf “ ; “Z” race to “donkey ” ; another ones to “ arctic bear “ and some others to “ camel “ . But in this context , Kurds are more similar to EAGLE (The Glorious King OF Mountains) . .

In general , The Kurds , like Eagles , underestimate settling in low positions , plains or depressions , rather they prefer to fly above zenith altitudes and perch on mountain peaks , rocky precipices , upland vertexes etc . The prime mover of this tendency is , that they have grandiose ambitions , they hate humiliation , admire freedom and avoid suppression . So , when their entity and honesty is threatened

by moral and physical extraneous annihilation factors , they choose between honesty & infamy ; glory & disgrace ; magnanimity & dishonor .Then to secure the best nice selections of human moral standards ,they choose the positive parameters , tick first alternative of above pair choices and delete all negative ones from the life list , at any paid price .

But nowadays , when Kurds have settled and well established in their high appropriate right positions , they have unanimously and decisively decided to be as eternal , resistant and enduring in their beloved and sacred homeland , as glorious and colossal magnificent mountains of GREAT KURDISTAN , meanwhile they are safeguarding and protecting their present survived plains and level lands diligently , from above , in particular, the vital lucrative flat oil fields of Karkuk ; they do not abandon this real utopia and do not take refuge in mountains again . Last In , First Out!

Life is a nice campaign to secure the prestigious survival .

KURDS ARE NOT NOMADS ,THEY ARE CIVILIZED UNVOLUNTARY EMIGRANTS.

July 1, 2004 .

When last time I visited United States ,I stayed in the outskirts of Baltimore , in State Of Mary Land for approximately a period of one month .

In order to continue my research on my “ Kurdish Bibliography Project “ , I was visiting some libraries there , such as Ernest Pratt Library in Baltimore , Library Of Congress , in Washington DC , etc .

I was quite surprised , when I observed in some books which were published in the USA , it was indicated that “ KURDS ARE A NOMADIC PEOPLE ...!!! “ . Unfortunately , I saw some similar expressions in general knowledge books, too . In addition to this issue , still now , in some USA and European encyclopedias and reference books (even in on online ones) , such similar false details are indicated about the Kurds .

As a Kurd , I like to clarify, that at present time (2004) , almost all the Kurds are settled , they are living in big cities , towns and villages and there is no general nomadic life in THE GREAT KURDISTAN , except very

little groups of sheep and goat owners , dispersed sporadically in some remote areas , who are less than half percent of the total population , i. e. approximately 99.5 percent of the Kurds are not nomads and they have never lived in the tents etc . For example , there are more than 10 cities in different parts of Kurdistan , in which around one million people or less are living ; such as : Erbil , Kermanshah , Ilam , Duhok , Amed , Sanandaj , Suleimany , Van , Zakho , Mahabad , not to mention around 200 medium size populated towns and tens of thousands of prosperous villages .

I hope seriously , that the USA/European publishers and writers would pay their diligent attention to this significant issue and to improve the texts of such erroneous books , in order to match with the current prevailing demographic realities in THE GREAT KURDISTAN and to avoid such important sociological misinterpretations .

Meanwhile , I request all my sympathetic compatriots who are living in USA and western countries , to coordinate their efforts in improving such ironic undesirable manipulation of realities .

Conclusion:

This is a misunderstanding . Kurds are not nomads , if you see they are wandering all over the world , they are civilized involuntary emigrants , who are frequently expelled from their native homeland forcefully , either directly or indirectly

KURDS' LEGITIMATE DEMANDS

October 30, 2004

As you are aware , KURDS are one of more genuine , significant and populous nations in the Middle East region , which from old prehistoric ages , possessed their own particular homeland , language and culture , at this distinct location of the world and have lived there , in a persistent , continuous and uninterrupted manner , which the remains of available historical monuments in { Zewyeh } Saqiz , Takht-e-Suleiman { Afshar } , Erbil Castle and tens of other important locations , are supporting this statement . From other hand , the old presence of Kurds at this geographical location , has been confirmed and verified by world's historians and orientalist , which for example , we can point out to Herodot , Xenophone { the Greek historians } and tens of other world's leading orientalist .

So , we realize that , Kurds currently with approximately 50 million population , at their native and old ancient fatherland , i. e . at Great Kurdistan { Kurdia } region , are a well known and historic nation , which in general , they are nearly five times bigger than an average size Middle Eastern country . From other hand ; according to United Nations Charter and Declaration Of Human Rights , every human being and nation , enjoy particular rights , both at his ancestral homeland and at world level , which the most outstanding and highlighted passages of these context can be refined as follows :

- 1- Right of choosing his destiny .
- 2- Right of expression of free speech and opinion .
- 3- Right of free practicing his language , culture and customs .
- 4- Possessing the equal rights with other nations of the world .

As you know , Kurdistan { Kurdia } or Kurds' traditional and main homeland , is an en bloc land ; and from geographical point of view , possesses an unique shape and condition . But , unfortunately the orientated discriminative policies of some world powers , has resulted in such a tragic outcome , that this en bloc and compact land, has been divided between several countries in an unjustified manner and consequently , this right-seeking and freedom-loving nation , is deprived from the most of his legitimate rights .

The Kurds only and only are demanding their legitimate rights and they wish at the small village of millennium 3 , at least can enjoy 4 above mentioned privileges , which include : right to choose their destiny , free expression of speech and opinion , utilizing their language and cultural freedom as well as equal rights with other nations of the world .

In the course of history , it has been experienced and realized , that in the Kurds's character and mentality , there is no tendency toward racism and imperialism .A Kurd do not deem himself as superior or privileged over other nations , he respects the culture , language , customs and religious believes of all the people of the world , in particular that of his Persian , Armenian , Arab and Turk neighbors . He denounces oppression of other nations ; and sincerely believes , that all the nations of the world , must enjoy equal rights and privileges and determine their destiny , themselves .

So , this is the moral duty and humanitarian obligation of all freedom lovers , elite and scholars of the world , of every race and religion , that by choosing a rational, logical and appropriate approach , assist the Kurds in this peaceful and humanitarian process ; and by performing this nice action , register their name , with precious letters of wisdom and love , at

the historic documentary pages of contemporary era ; and by adopting this appropriate and nice approach , denounce quasi Chengiz , Hitler and Saddam cursed doctrine of a few unreasonable people , who deprive Kurds from their legitimate and incontestable rights or sometimes , misuse Kurds at the political arena of Middle East , as counterbalance for their unblessed political purposes .

HOW KURDS SHALL REACT TO TURKISH INVASION?

Tehran –February 28 , 2008

In most catastrophic circumstances of life , explanation of pain , ailment , tyranny and propagation of their news in media, is extremely vital and paves the road toward its prevention or even treatment . But always the most important phase of reaction is to find a prophylactic method or at least a treatment to cure or at least block its advancement and progression .

As all of us have heard in different news medias , Turkish government has attacked Kurdish Regional Government (KRG) , from air and ground ferociously in recent days . For any reason and from any perspective , such inhumane barbaric incursion, is condemned by all humanitarian and international regulation/standards and there is no rational justification for this despotism practice .

As I said before , for catastrophic events , prophylactic and/or curative treatments is required , otherwise , if we only convince ourselves with the explanation of the problem , it has no positive impact , except wasting of time etc .

For this reason , I , as a single drop of human community ocean , suggest my treatment proposals , in order to prevent and stop this tragic event :

- 1- In Turkey , there are around 20 million Kurds . 10 times more than Kosovo , which has declared its independence recently . So , I propose to them , at least to react in closing all shops, enterprises and any type of business at least for one day . All sit indoors and do not go out .
- 2- After one day of total above strike , commence extensive demonstrations , at all Kurdish populated areas .
- 3- Kurds , who are living abroad , start extensive demonstrations , in front of Turkish embassies and international organizations .
- 4-All Kurd soldiers and officers who are serving in Turkish army as conscripts , desert and avoid this war with their Kurdish brethren and sisters.
- 5- KRG , similar to Kosovo must threaten to declare unilateral independence . Why not ? KRG is bombarded and attacked. Turkey is expected to attack Kerkuk and ... For what reason Kurds need such a useless Landlord , like Baghdad ?!!! They have no serious

sympathy at this extraordinary invasion catastrophe , even they might have taken part in this plot treacherously with Turkey !!! .

- 6- In all other 4 parts of Kurdistan and Diaspora , Kurds shall take appropriate steps to condemn it .
- 7- KRG , shall report this as a petition to UN , EU , Arab League , Muslim league etc , open a file to inform them and ask for their urgent action .
- 8- Kurds shall inform all population , of small universal village about this aggression, at all six continents .
- 9- Boycotting Turkish products .
- 10- Cancel all existing contracts with Turkey
- 11- Change KRS's course of political stance somehow , and orientate it East ward . Replace thierTurkish contracting partners , by eastern ones , for example China .
- 12- Ask Interpol to arrest Turkish leaders , who are taking part at this fearful scenario .
- 13- Ask for compensations .

PS: Turkey is not exclusively fighting for pursuing PKK Kurdish freedom seekers in KRG , every day nearly millions of Kurds are demonstrating at occupied Kurdistan of Turkey , to support PKK and their leader A. Ujalan(APO) , which is in detention . If Turkey is looking to eradicate Kurdish freedom fighters , it must begging from Amed , Van , Shirnak , other cities inside the country and even Istanbul, not from KRG etc , which is a Turkish town with daily Kurdish demonstrations . Turkey is trying to weaken or occupy KRG , in particulars the oil fields of Kerkuk . So Kurds , in particular the Kurdish leaders must realize this unfriendly intention . Kurds are not Warlords , they are only eager diligently to have peaceful coexistence and equal rights , with all their neighbors including Turkey and expect same from others mutually . Kurds are not created as permanent second rank citizens and eternal subordinates .

NECESSARY REFORM IN KURDS' APPROACH

Tehran: October 11 , 2007 .

PRELUDE :

Kurdish proverb : Friends are those who cause you to weep for your actual negative points , but enemies are inducing you to laugh at your hidden misery .

As we now , Great Kurdistan Region , which is located at controversial war torn Middle East epicenter , is said to be the biggest and most ancient stateless ethnic community of the world . According to a rough evaluation, its total inhabitants, which are estimated at approximately 50 million , are living at their genuine ancestral home land , from antiquity era and since old prehistoric ages . From another parallel paradox , for example, Great Kurdistan area is as vast as nearly 5 times bigger than Republic Of Austria , which is an independent and prosperous country . Now , in order to avoid the Kurds to continue suffering current multilateral discriminations and deprivations , I like to make a concise and descriptive analysis from heterogeneous perspectives , regarding the reasons of Kurd's present deplorable situation and pinpointing the bottle necks of their political deprivation :

1- NATURAL CAUSE :

- (a)- Lack of considerable access to international water ways and free navigation .**
- (b)- Medieval culture of some surrounding neighbors .**
- (c)- Comparative dry climate and insufficiency of precipitation , in most of its areas .**
- (d)- Comparative scarcity of extensive fertile plain farm lands , as compared with high percentage of its mountainous areas .**

2- CULTURAL CAUSE :

- (a)- Moral loyalty , which is a fatal political phenomena .**
- (b)- Extreme egoism , which sacrifices the nation at self's altar .**
- (d)- Extraordinary optimism , which results in dramatic deceptions .**
- (d)- High degree of honesty , which intoxicates the diplomacy practice .**
- (e)- Extreme politeness in international interactions , which is considered as an ethics surplus .**
- (f) – Individualism tendency .**

- (g)- Underestimation of political opportunities .
- (h)- Weak feminine profile .

3- RELIGION CAUSE :

- (a) – Extreme influence of political Islam, which has resulted in suppression of Kurdish patriotism feeling .
- (b) – Lack of necessary general secularism .
- (c) – Possession of heterogeneous religions , believes , sects etc ; which has interfered with national unity and solidarity .
- (d) – Wasting extravagant time and funds , for worshiping purpose , more than which is required by religions principles themselves , (e. overspending in it) .

4- ETHNIC MALICIOUS BEHAVIORS :

- (a)- Adhering to superstitions .
- (b)- Traditionalism .
- (c)- Lack of team work collaboration .
- (e)- Xenophile character .
- (d)- Conceit .
- (f)- Deserting the town cross roads and transferring political vehicle to mountains .
- (g)- Underestimation of economics and monetary issues .

5-LACK OF INTERNATIONAL SUPPORT :

From other hand , the international bodies , in particular United Nations Organization , Amnesty International And Human Rights etc , have overlooked and/or neglected the Kurdish issue . While approximately from each one hundred living human being , one person is a Kurd , they are reduced to political light counter balances , at the world arena , for emergency scales uses , and get no actual considerable support .

CONCLUSION:

Based on above heterogeneous realistic explications , which have resulted in current misery and deprivation for Kurds ; especially in lack of independence and multilateral underdevelopment , there remains no alternative for this nation , except to make a reform in their miscellaneous hereditary behaviors and tactics , which mostly are considered as expired political parameters .

From other side , international organizations are expected to revise their traditional underestimation approach toward the Kurdish issue , otherwise these big . innocent , honest and ancient people , will continue to suffer under political occupation ; chemical bombardment ; suicide explosion ; tremendous expulsive exodus ; frequent invasion ; repetitive displacement ; ferocious depression ; deplorable genocide ; cultural assimilation ; racial eradication ; discriminative deportation ; adversary emigration ; catastrophic starvation ; spreading epidemics ; and ultimately total annihilation , as before during previous successive centuries .

For example , currently Turkey is preparing his army seriously to invade south of Kurdistan free region . Why ?

In this regard , Kurds are looking for international supportive action practically , not by political maneuvering announcements .

PS: All damaging points , indicated above , indicate and testify the honesty of Kurds behavior and culture , and are appreciable ; but unfortunately do not match with modern world politics and diplomacy practice of today .

KURDS' POLITICAL TSUNAMI

Monday, 25 May 2009

Sporadically , we hear that at certain regions of the globe , some areas are inflicted by a type of daunting and devastating natural/geological phenomena, called TUSINAMI , which the most recent catastrophic case , was that of south east Asia , some years ago.

During such disasters , the world's most important aid organizations are deployed and mobilized , to do their best in the field of food distribution , rehabilitation and health care of respective deplorable affected native inhabitants and healing their enormous losses and injuries . Of course such helps and world aid programs , are extremely necessary and are considered , as a super humanitarian salvation service .

But , besides such natural/geological disasters and catastrophes , there are political TSUNAMIS as well , that mostly are ignored or overlooked by the world community , which could be evaluated as more threatening than natural/geological Tsunamis etc .

For example , approximately there are fifty million Kurds , originated and permanently settling at Middle East region , roughly 10 times more than Lebanon's population , which are affected and inflicted by a sever and cruel political Tsunami , that is : They are deprived from their own independent political authority , are divided among five countries , are mostly without their human rights , not recognized by UN and most of other world official bodies etc . From other hand , they have experienced the most fatal and devastating aggressions and depressions in recent history , such as chemical and microbial bombardments, cluster bombing , forceful displacement , ethnic and cultural annihilation , heterogeneous genocides and so on , which most of them are well known and verified by authentic organizations of the world , so there is no need to repeat them again for you .

But , unfortunately despite the world authentic bodies' verification and confirmation of said plights directly or indirectly , no effective and serious step has been taken , to heal or at least ease these political Tsunamis effects , which are more devastating than natural/geological ones . From other hand , Kurds have shown in the history , that they are the most peaceful nation of the Middle East and are diligently looking to have close friendly ties with their neighbors and rest of the world , by enjoying the equal rights .

So , Kurds' Political Tsunami , shall be treated and attended by whole world urgently . This is a genuine humanitarian mission .

To: His Excellency Mr. G. W . Bush , President of Unites States of America

Dear Mr. President ,

We deem it quite necessary to attract your kind attention to following significant and vital points :

Necessarily as a short prelude we remind , that we Kurdish people are living in our divided ancestral KURDISTAN motherland in Middle East from prehistoric eras , which it is geographically more larger than Syria , Lebanon and Israel together; and demographically nearly 50 million Kurds are living here , as biggest stateless community of the world .

We Kurds at all occasions have actually shown that respect USA government and its population practically . We sincerely think , that USA is our respectable friend in the world . In particular , we appreciate USA for his diligent and perseverant assistance , in eradication of ferocious and tyrant Saddam Regime , the Kurds' potential dangerous foe .

But in fact we do not expect USA, to replace deposed Saddam regime with Turkish Regime, which is not a better one ; and by no means expect you to consider PKK organization as your Enemy . When we see these unexpected gestures , our judgment about USA necessitates a probable revision .

Dear Mr. President , in fact PKK is neither your enemy nor a terrorist terrorist group . PKK has exerted his genuine peaceful endeavour to obtain equal rights, democracy and freedom for 20 million Kurdish people living in Turkey ; and ultimately they had provided a project in 7 points, to solve their nation's problems with Turkish government quite peacefully . In the meantime , USA should not overlook this fact , that Turkish Parliament in 2003, did not accept to let US army pass through Turkish soil to Iraq, but from other hand , our compatriot Kurds and Pshmerga force , were fighting side by side Coalition and US forces to break Saddam's iron wall .

Now , Turkish military airplanes are bombarding your Kurdish friends at Kandil District , in North Iraq continuously , in which a lot of Kurds are killed , injured or fled from their demolished homes . Please help us , in stopping this barbaric bombardment promptly .

However we have a question " Why you think ,that PKK is your enemy ?!". This obvious question is asked by Kurds all over the world . Our own answer is : It is by no means justifiable to classify PKK organization as terrorists or your enemy . Neither PKK nor Kurdish people have never committed any negative action against USA . They consider your country as their good friend and expect your mutual loyalty .

Copy : Mr. D. Cheney, USA Vice President .

We are waiting for your response,

With best Regards

KURDS AND LOS ANGELS IRANIAN TELEVISIONS

November 12 , 2004.

There are around 25 satellite television broadcasting stations outside Iran , which designate themselves as Iranian televisions and are labeled by IRAN acronyms , that mostly are located in Los Angeles , California , USA ; or at least in Iran , they are erroneously called Los Angeles TVs .

If we demographically estimate the total population of Iran , at 75 million , around 10 million of them are certainly living in Ilam , Lurestan , Kermanshahahan , Kurdistan , West Azerbaijan and Northern Khorasan provinces etc , which are predominantly inhabited by Kurds . It means , approximately 13 percent of Iran is populated by Kurds .

Most of these 25 television stations , are broadcasting on 24 hour basis ; i. e. in average , { 25 x 24 } television programs are broadcasting from these stations , which amounts to 600 hours per day , and unfortunately all of them are exclusively in Persian { Farsi } language .

If in fact they are Iranian televisions , 13 percent of their programs is the share of Iranian Kurds , which amounts to 78 hours per 24 hours . But unfortunately , they have no single hour program in Kurdish and even for other nationalities of Iran , like Turks , Arabs , Turkmans , Baluches etc at all . Once a television watcher was telephoning one of those TV stations , asking them to provide Kurdish songs – the TV speaker answered him very generously “ Oh ! yes sir , of course we will play the music of every brave tribe in Iran !!! . Bravo man ! You call 50 million Kurds , as a tribe !!!” . Kurds are a great nation , five times more than Austria , what strange kind of tribe you mean ? .

By above analysis of those obvious facts , we conclude, that this is not an equitable distribution of cultural facilities among Iranians . As I have hinted above , Iranians are not exclusively Persians { Fars } , rather there are Kurds , Turks , Turkmans , Arabs , Baluches , Armenians , Assyrians etc , who comprise about 60 percent of Iran and all of them have their particular language , culture , folklore , tradition and ambitions , and naturally they are not willing to be melted and homogenized in their esteemed official Persian language .

While respecting the language and culture of all nationalities of the globe , in particular those of my esteemed Fars neighbors , I { as a Kurd from Iran} , expect them to devote appropriate and suitable independent program shares to Kurds as well as to other nationalities , who are living inside Iran . I am sure this issue is the view point of most of non-Persian Iranians . In the small terrestrial village of 2004 , we can not and

shall not overlook or trespass others rights . If some of those televisions are among Iranian opposition fronts and are thinking about a more democratic future in Iran , how can they manage it with such a discriminative strange paradoxes of perspective ? This is a serious issue .

Mankind Shall Learn Peaceful Coexistence From Animals

September 23 , 2008

In 1970s I had an exceptional opportunity to spend some of my rare leisure time , at Holland Park , London , England , located at High Street Kensington , just opposite Earls Court Road .At first glimpse , one might deem this park's denomination is affiliated to Netherlands (Holland) country , but it is not so . As I have read in said park's historic records and anecdotes , it belonged to an English aristocratic authority , who

according to his written will , this park has been donated to London city municipalities .

Holland Park is a classic , natural , picturesque large garden , populated by old trees . This park has almost no leveled or plain surface , rather it is full of small hills and tiny miniature valleys , which resembles a minimized natural forest at Zagros mountain range . In this park , several species of heterogeneous birds were living : Hundreds of peacocks , pigeons , pheasants , swallows , Turkeys , nightingales , doves , hens , storks , ducks , pelicans etc .

They had an attractive peaceful , hygienic and healthy life . There was no police at all , despite this fact , during this field study of one month , I saw no slaughter , genocide , assassination , dispute , war , skirmish , fighting and antagonism trend among them . For example , Turkeys which are supposed to be of Turkish origin , despite their relatively bold larger bodies , did not impose their " Gable Gable" language on small nightingales . There was no racial and religious discrimination/segregation , all of them were living in a peaceful and friendship environment according to rules and regulations of Universal Creation System , so they had no miscellaneous imaginary strange gods . They did not require any type of weaponry , if fact there was an automatic and voluntary disarmament . From other side , I rarely saw a seriously ill or suffering bird , in particular there was no depression at all , all were chanting/singing in their languages and according to their racial culture , particularly at dawn ,all were performing their own chorus without the permission of others , especially the small nightingales were performing such orchestras , which you could not hear such an elegant performance at Albert Hall concerts or Vienna Philharmonic orchestra .

I compared our human catastrophic life environment with their civilized and peaceful community and uttered this impressive sentence at a monologue : Mankind Shall Learn Peaceful Coexistence From Animals .

“ Weapons Of Mass Destruction ” In Iraq - An Absolute Requirement Or A Notorious Political Duel ?

July 16 , 2004

Approximately , more than one year after the elapse of auspicious downfall of Saddam’s ferocious and reactionary royal republic in Iraq , yet some “ BIG AND TALL “ birdbrain West European politicians , who erroneously assume themselves as an inarguable token of utopian democracy in the world , are hesitantly scrupulous about the existence of mass destruction weaponry , in Saddam’s bloodcurdling terrible arsenal and sometimes , their stupendous approach , is echoed by other opportunity exploiters of the West Europe arena and Transatlantic election campaigners !

Nowadays , the issue of finding mass destruction weapons in Iraq , has actually transformed into a grotesque topic and a delusive , but rotten trenchant sword for playing the outdated political duel and sometimes as an archaic election campaign tool . But ,we are confident and they themselves know , too ; that Saddam himself was the most fatal and pernicious weapon of mass destruction in the human history , who overshadows any “ Weapon Of Mass Destruction “ .

Here , as an epitome ,I only point out to a few instances of Saddam’s acts of mass massacre , murder , carnage and destruction , during decades of his illegitimate rule in Iraq , as an evidence and testimony of my above statement :

Barbaric chemical bombardment of Halabja , which resulted in the death of around 5,000 Kurds as well as injury and crippling of thousands of them and a huge infrastructural and environmental devastation of the region etc .

Anfal (annihilating) tens of thousands of Kurds systematically , including many Barzani and Faili Kurds etc .

Ruining thousands of Kurdish villages .

Execution , torture and imprisoning thousands of Kurds and other innocent Iraqis .

Disappearance of thousands of Kurds and other immaculate Iraqis .

Chemical bombardment of Sardasht town and Mariwan region , in Iranian Kurdistan , which resulted in killing , injuring and paralyzing thousands of inhabitants, there .

Military aggression on neighboring Iran in 1980 , killing around one million people , paralyzing thousands of Iranians and inflicting an enormous general destruction and damage .

Military intervention in neighboring Kuwait , occupying this sovereign

country and killing/imprisoning thousands of people along with infliction of heavy losses .
 General eradication of democracy in Iraq and imposing the rule of terror and horror .
 Total bankruptcy of Iraq economy and Iraqis' life .

With regard to above terrible unprecedented crime records , seeking for so called “ mass destruction weaponry ” in Iraq , is looking like a risible humor and strange ridiculous fun , created by political duelists !!! “ ; because Saddam himself already was the most fatal weapon of mass destruction .

From other hand , those impudent Saddam sympathizers consistently express their readiness to take part in the lucrative reconstruction effort of Iraq . Now , one outstanding question is here : “ If Iraq is not destructed and demolished , in what reconstruction process they will take part ? “ .

Certainly , an extensive reconstruction effort shall be devoted to Halabja mustard-gas-bombarded area , another to rebuilding the Kurdish depopulated villages and so on ; so , who caused this mass destruction catastrophes ?

EXPLOSIVE LAND MINES AT SARDASHT AREA , A GREATER THREAT THAN CHEMICAL BOMBARDMENT .

Last week , I was invited to attend the anniversary of SARDASHT CHEMICAL BOMBARDMENT , which was carried out by Sadam's despotic regime before .

While at Sardasht town , as a popular writer and poet , I was welcomed by a vast majority of population , for which I thank them cordially . During my three day stay there , I attended several gatherings and NGO

meetings , in which I was delivering my speech and we were talking about relevant issues of that region, with the people .

Among many other serious problems and obstacles , I realized that now the issue of explosive land mines , which were planted there , during Iran/Iraq war , is far more dangerous and menacing , than that of respective chemical bombardment , because the serious chemical bombardment was occurred once , but danger of land mines is a daily dangerous realistic story . For example , they showed a teenage boy shepherd to us , that he was crippled by passing over a land mine recently ; and both his lower members were semi amputated . Of course this case was not alone , rather hundreds of such catastrophic cases were happened in last 20 years and still it is continuing drastically .

The people of Sardasht were expressing their utmost anxiousness , regarding the presence of thousands of land mines , which are still uncollected/undiffused and are a big threat for entire population . So , I like to reflect their problem , to national and international community , in order to coordinate and mobilize a comprehensive effort , for clearing those cursed mines , which are considered as their most potential hidden foes not only at Sardasht , but most areas of Great Kurdistan .

From other hand , I request the people of the world , in particular those who are comparatively effective in this field , to launch a universal struggle against utilization of land mines , in any circumstance , condition , location and time - and for any reason .

Looking forward for a better world , without land mines .

DEAR Mr. KUFU ANNAN ! DO YOU RECOGNIZE 50 MILLION DEPRIVED KURDS AT ALL ?

Tehran , Aug. 8, 2004 .

As per its explicit fundamental axiom , United Nations Organization , is a cosmopolitan multinational organ , institutionalized principally for actual recognizing , protection and realization of all global NATIONS' rights indiscriminately , without focusing and accentuated emphasis on their race , religion , origin , etc ; in such a manner , that an aborigine from Australian midland wild bushes , has the same equal human rights and privileges of a senior diplomat , originated in Manhattan district , New York , USA .

According to irrefutable sociopolitical codes , The Kurds are one of significant primeval nations of the world , possessing all relevant defined characteristics and particularities of a genuine potential nation , which include (1) a unified language ; (2) a special culture; (3) an en bloc father land , and (4) a reputable glorious history , with an approximate population of 50 million , which for example , it is nearly 100 times bigger than the independent Republic Of Malta , both demographically and geographically . In the meantime it is necessary to note , that from every 100 person of the world population now , nearly 1 person is a Kurd .

As a schematic and symmetric comparison , we know that there are tens of Arab independent countries in the world , with same qualitative particulars of Kurds , i. e : unified language , culture , joint boundaries and historical background . For these Arabs , it was definitely better to have only a single country . But in a big contrast , surprisingly there is no single Kurd independent country all over the world . From other hand , existence of an independent Kurd state is a vital prerequisite for Kurds' survival , while existence of so many different small and big monoracial and monocultural Arab countries , such as Lebanon , Syria , Iraq , Yaman , Qatar , Dubai , other United Arab Emirates satellite mini states , Bahrain , Kuwait , Saudi Arabia , Libya , Egypt , Tunes , Morocco and other African Arab countries , with equal anthropological particulars , are considered as a distinct source of political instability and multilateral confusion , which not only jeopardizes the global security , but it is not in favor of the Arab world , too .

Simultaneously , we (Kurds) , not only possess no single independent state on the entire glob , as far as I know , the term " Kurd and Kurdistan " , is not registered or even hinted implicitly in the United Nations books , papers , annals, registers , documents , etc . While the majority of Kurds wish to have an independent country , which certainly it is their legitimate right .

Expectedly , this grave statelessness circumstance , has resulted in creation of tens of formidable catastrophic tragedies for Kurds , which are culminated by :

- 1- Chemical Bombardment of Halabja , that is internationally termed as “ First Hiroshima “ - not second .
- 2- Mass ethnic massacre , torture , and imprisonment .
- 3- Expulsion and mandatory dislocation of millions of Kurdish diaspora , dispersed all over the world desperately , as political/humanitarian refugees and wanderers .
- 4- Imposing superfluous bilateral regional wars on them , for example Iran/Iraq war , in which thousands of Kurds were killed , wounded or made homeless .
- 5- Giving them the irrelevant title of “ terrorist “ , in an inequitable manner .
- 6- Because Kurds have no Kurdish passport at all , the Kurdish Diaspora , scattered all over the world , are not officially recognized by respective authorities as Kurds . For example, it has been said , that The United Nations Food Program , is distributing the food ration among the Kurdish refugees , in the name of Iraqis (Arabs) !!! . This emphasizes , that the Kurds are not even entitled to be recognized as refugees .
- 7- Other prominent dynamic threats to Kurds , which are leading to their total racial cleansing and annihilation , etc .

As you know , an important chapter of the UN charter, entitles every NATION and each individual of the world , to decide on the form and structure of their fate and destiny , so the most rational and appropriate approach for treatment of this calamitous tragedy of the Kurds , is to establish an independent Great Kurdistan Government , comprising all parts of this divided nation , as it is desired by an overwhelming majority of all Kurds , already .

Dear Mr. Kofi Annan ! Do you know these tragic facts ? Do you recognize 50 million deprived Kurds at all ? So , what ?

TURKEY CONSIDERS KRG AS NEXT CYPRUS

TEHRAN : OCTOBER 19, 2007 .

This is an internationally familiar epigram " History Repeats" . And now , we are at the challenge of such a dilemma crossroad , concerning the eminent attack probability or so called aggressive incursion of Turkey, into Kurdistan Regional Government (KRG) .

As we remember , Turkey managed same unjustifiable tactic regarding Cyprus , which is an independent island state in Mediterranean See . At that time Turkey pretended , that in Northern Cyprus , there is a Turkish Minority and as they are under the extreme discrimination , depression and tribulation of Greece Majority of South Cyprus population , which are mostly Greek, it is entitled to intrude and occupy that part of North Cyprus ; and did it over night by military incursion . When we were awakened next morning , we heard from news medias , that Turkish Military has occupied North Cyprus .

It looks like the repetition of same tragic drama , in case of KRG , exclusively excited by fascistic approach and expansionism sadistic behavior , mostly for confiscation and occupation of Kerkuk oil fields , which is for long time , a nightmare dream of Turkey .

Turkey introduces four major reasons for its intention :

- 1- He claims , that PKK groups are located at KRG region . While unfortunately Turkey itself has some military bases , at KRG region , too .
- 2- Says , in (KRG) there are Turkish minorities and this is a right of Turkey, to intervene there . If that is justified , instead of 200,000 Turkmans at KRG , which are treated very humanely/friendly by Kurds ; in Turkey (TURKLAND) , there are around 20 million depressed Kurds . So , is KRG authorized to intervene in Turkey , too ?
- 3- Any group , who emigrates or flees from his/her homeland in fear of political prosecution , if crossed the boarder and settled in another country , will be immune and no government is authorized to cross the boarder to prosecute them . There are many examples of this circumstance , all over the world .
- 4- If Turkey is interested in prosecution of PKK , nearly 20 million Kurds in Turkey are either PKK or are its affiliates/sympathizers . So , he first shall complete his goal inside Turkey , then begin its

operation outside its borders .

Based on above explications , it seems that Turkey has a similar plan , like that of Cyprus in KRG , to occupy and adjoin it to present Turkey , other raised motives are only false military tricks .

Conclusion :

If UN , Security Council , EU , USA and other international bodies do not stop and punish Turkey severely , it starts implement genocide on others like Armenians and try to re-occupy some other regions , which were formerly under the corrupt realm of Ottomans Caliphate , who were their genetic predecessors and grand children of Genghis Khan , the Mongolian race brutal killer . If Turkey was able in performing its plan , other Kurdish leaders at KRG , will find same fate of Leader Ojalan in Immrally !!! , so they must struggle aggressively to safeguard their nation , including themselves , I am sure all the people of the world and 50 million Kurds, support them , (except sadists and dictators) .

A Recommendation For My Kurdish Compatriots Of Occupied Kurdistan In Turkey .

Tehran – June 24 , 2008

As we are aware , almost the leading important national rights and identity labels are : Language , Culture and Names . For example , French people are speaking in French , have French culture and mostly give French names to their children ; and this practice is prevailing all over the globe .

But due to Turkish government's fascism policy , among many other legitimate rights , three above rights have been confiscated in north Kurdistan , occupied by Turkey . As it is known all over the globe , they repeat a ridiculous claim and say " Kurds are mountainous Turks !!! " , if this joke is rational and justified , Turks are mountainous Arabs , too ;

because for centuries it was the epicenter of Islamic Ottoman Caliphate .
Or Kurdistan Turkmans are Plain(desert) Kurds .

Under approximately this half millennium pressure and despotism by Ottomans and their post modern quasi Kamalist caliphs , like Erdogan , Gol etc , three above Kurdish national identities have been forbidden or weakened .

Consequently , using Kurdish Language , Culture and Names have sever restrictions there .

For example , despite serious struggle of my Kurdish compatriots there , which is highly appreciated by human community , still some Kurds are not allowed to use Kurdish , Kurdish cultural issues and give Kurdish names to their children . Language and cultural issues restrictions in Turkey for Kurds are so clear and familiar for most of the people , they do not need to mention any example . But I point out to name of Turkish Kurds !!!!. For example you can hear many names such as : Demir , Aslan , Changiz and thousands of first and family names in Turkish , but rarely you can hear a Kurdish name , such as Roonak , Khebat , Rizgar etc or their Kirmanj dialect equivalents if any .

So , for this social pathology , I provide this proposal , which has been already successfully performed in other parts of great Kurdistan and had positive output .

- 1- At present situation , everyone teach Kurdish to their children at home.
- 2- They preserve Kurdish culture (ceremonies and behaviors etc) underground .
- 3- Give Kurdish names to all their children , in a de facto manner .

PS: Kurds are peaceful and friendly people , fond of peaceful coexistence ; they highly respect all other nations rights , and have same humanitarian expectation from all , in particular their neighbors .

KURDS CONTINUOUS BOYCOTT IN OLYMPICS

Sept . 8, 2004

At the global level , Olympics Games event is considered as an unquestionable historic athletic reunion , for enhancement of universal friendship , equality and multilateral understanding .

And it is the legitimate right of all nations of the world , without any type of ridiculous discrimination , to participate in Olympics and enjoy their appropriate share , there .

But with much regret , even in this athletic international arena , similar to “ United Nations membership and other fields” , Kurds are severely boycotted and consequently deprived from their rights . The name of around 50 million Kurds was missing , deleted and disappeared in Olympic 04 festival , as previous years . If one Kurd has participated indirectly in these magnificent games , he is surprisingly disguised as a Turk , Persian (Fars) , Arab etc, because the name of Kurd is metaphorically boycotted there ; while participation in Olympics does not depend entirely on having full independence , because as you know , Scottish team etc, are participating usually under their own separate national banner .

Now , I provide you with a very strange , but real story :

Once ; unexpectedly I was viewing a TV athletic championship event from Peoples Republic Of China . It was a serious boxing competition , between a Kurd from Turkey and an boxer from Thailand . When Chinese TV reporter , was reporting on the Kurd athlete for his achievement etc , he was shouting : “ Hi ! Now the Turk boxer is beating the Thai boxer severely and .. ” .While this false statement resulted in my severe indignation , I was shouting in a serious manner : Hi man ! he is not a Turk at all ! , he is a Kurd and even unjustifiably , some Turks look at him as a dangerous foe and malignant parasite !!! , which this act is considered as “A Hideous Distortion Of Facts” .

From other hand , unjustified and continuous horrible discrimination rules against Kurds , in Olympic Games , is expected to be amended by Olympic authorities and followed up by local Kurdish officials .

KURDS SHALL NOT SACRIFICE THEIR FATE ON PALESTINIAN ALTAR .

Tehran – Nov 5, 2005 .

At the very commencement of third millennium A. D (anno domini) , in order to cope the circumstances with national interests of respective nations , the pattern of international relation formulas , are either thoroughly altered or absolutely modified .

The Kurdish nation , as a significant de facto , but factual member of global community , either shall orientate and coordinate himself with those vital developments , or continue to suffer drastically, from adopting obsolete , odd and unnecessary attitudes .

One of these strange and outdated adopted attitudes , is the eminent and unconditional support for Palestinian cause , against Israel , only for Islamic religious reasons , which in fact it does not cope with present Kurdish national interests either .

As a rational reasoning for this view of mine , I ask you this question : “ If today , the Kurdish independence issue is referred to UN , for evaluation and subsequent approval by its members - is Israel supporting the Kurds or Palestinians ?” . I am sure , that Israel does it , because Israelis have many common grounds and interests with Kurds , one of which is the practical affiliation of both nations to Western Camp , but Palestinians do not have any , so they do not vote in our favor and do not care about our Islamic nature . Certainly , Arab world , Arab League , Kurdistan occupiers and even the Non-Western block powers , such as Russia and China , will vote against the Kurdish case in UN or at the best , they stay abstain .

So , if we consider ourselves as a nation , whom has its own heterogeneous particular interests and perspectives , we shall not repeat the traditional irrelevant old slogans , like an obsolete parrot .

Religion is a private and internal human metaphysical art , which shall be respected mutually on all levels , but it shall not interfere with vital issues such as international relations , national interests and other significant parameters , and must not encourage us to support anyone , at any place , just for the sake of our common religion and nothing else .

Kurds shall not sacrifice their fate , on Palestinian altar , particularly in Iraq - with Iraqi Arabs - which this act is considered as a national suicide for nothing , either by practice or by empty routine slogans . Arabs belong to Arab World , but Kurds pertain to KURD WORLD .

Kurdistan Reunification Task

July 23, 2008

As you may know , greater Kurdistan territory was for centuries an extensive vast colony , almost under corrupt Islamic Abbasid and Ottoman (Caliphate) Empire sovereignties , which was fragmented and divided ultimately among several countries in the political Big Bang of first world war . At this political Big Bang , which resulted in Ottoman Empire's total collapse and formation of several independent governments like Balkan states , Turkey , Iraq , Syria and many other countries , instead of establishing a Kurdish independent state , which nearly is 5 times greater than Syria, it was mostly divided between those states , which were formed from fragments of torn Ottoman political body , such as Turkey , Iraq , Syria , as well as Iran and Armenia (Note : those parts which are divided among Iran and Armenia , sometimes were alternatively under Ottoman occupation and some times were a place of dispute , between Ottomans from one side and Iran/Russia regimes from other side . In the meantime , during Ottoman regime's barbaric reign , in many parts of greater Kurdistan , local Kurdish Rulers were administering their district as a partial de facto confederation efficiently .

Greater Kurdistan consists of a geographically attached and compact region , with around 50 million Kurdish inhabitants , having a distinct and special history , language , culture , behavior and an ardent common aspiration to have their own independent state . To ascertain this expression and theme , we shall point out to this fact , that at any part of divided Kurdistan , when central occupying regimes become weak , paralyzed and crippled , immediately the Kurds begin to claim their right of independence and start a peaceful extensive democratic movement . We have experienced this fact in Iraq , Iran , Turkey etc , several times before . But later when central governments revitalize and regain previous energy , direct Kurdish democratic movements towards a bias situation and transform it into a sanguine suppression of them . To verify this Kurdish aspiration of independence , based on its charter, UN can deploy a fact finding mission to make a referendum in greater Kurdistan and discover the realty . Because Kurds are a NATION of around 50 million and United NATIONS , is United NATIONS , not United GOVERNMENTS !!! , so this is its task and obligation .

In fact we can compare ex Germany with contemporary greater Kurdistan . As you know , in second world war , Germany was divided among USA , Britain , France and Soviet Union ; exactly like present Kurdistan and a partition wall was constructed between West & East Berlin similar to present artificial boundaries which are unjustifiably drawn between Kurdish divided regions . For decades , Germany was divided in this catastrophic manner , similar to Kurdistan , but due to international supportive attitude and German people's strong endeavour , the Berlin Wall was demolished bravely ; then two divided parts of Germany were

reunified . In addition to Germany , in last one hundred years , more than 100 countries got their independence , for example many African colonial countries, some Common Wealth members , for example India , Bangladesh , Pakistan , remains of Ottoman , Soviet Union and Yugoslavia Regimes etc . The last land , which declared his legitimate independence was Kosovo . So , this independent process is practical and has no kind of problem at all . .

Now in order to maintain peace in Middle East , establish stability and justice , same process shall be carried out by UN and other international responsible bodies , backed by super powers support and Kurds' own perseverant multilateral serious effort ,to realize the Kurdistan Reunification Task , which will help effectively , in maintaining peace and stability of Middle East and the total globe . There is no other alternative , at all . This is a reunification emancipation process , not a separatism movement .

PS:

Kurds have proved to be a peaceful nation , fond of friendship and humanitarian lovely moral coexistence .They shall not be deprived from their legitimate rights ; such deprivations result in deterrent outcomes , as before ; which is not in favor of world peace and tranquility .

Saddam's Execution versus Life Imprisonment ?

Tehran - 15.11.2006

As the entire world knows , now the most ferocious and malignant tyrant of contemporary history , Saddam Hussein , the ex Arab president of Iraq , is in jail and faces a complicated judiciary hearing , in the court . He is incriminated for genocide , mass killing and heterogeneous torture etc , in particular against Kurds .

There are many different points of views , about the future fate of Saddam and what shall be the best verdict for this cursed prisoner of inhuman crimes ?

Certainly there are different choices , from different perspectives . But my Kurdish option in this regard is as follows :

Since as a Kurdish typical individual , am a diligent enthusiast of pardon , humanitarian interaction and amicable relationship , I think Sadam's execution is only the easiest and most straight forward way , but not the best alternative so far .

My motivation :

- **If Saddam is executed , he will leave the memories of all his past frightful crimes and consequently , this act is the most pleasant gift for him .**
- **If executed , all his respective secrets and hidden memories will be wiped out and there is no further access to them , for further retrieval .**
- **If he is executed , he will be relieved from all anxieties of his { inactive} instinctive conscience .**
- **By non execution of Saddam , we show to all the world , that we are not revenge takers and harsh people , rather we are a nice , gentle and kind people, who despite centuries of foreign multilateral oppression , we still are endowing grace and genuine fraternity , even to our worst enemies .**

Conclusion :

The best verdict is life imprisonment , not execution .

ECONOMIC SANCTIONS , AN OUTDATED PENALTY AGISNTS WHOM ?

Sept 29, 2004 .

At perplexed international diplomatic arena , at least in last recent decades , the economic sanction has been used by some world's preeminent powers , as a penalty against undemocratic and/or tyrant regional governments , in an attempt to exert some kind of pressure , for subduing them to :

- 1- Stop or lessen oppression and awful exploitation of their respective people.
- 2- Avoid violation of international and humanitarian de facto and de jour standards .
- 3- Respect multilateral rights etc .

But catastrophically , in most cases , this paradiplomatic obsolete and passive weaponry , is precisely targeting the interests and fates of the ordinary oppressed population of those countries , rather than the members of that oppressing government and its rulers ; i . e such sanctions , in that respective country (s) results in or aggravates the :

- 1- Inflation .
- 2- Unemployment .
- 3- Scarcity of goods and services ; or formidable famines .
- 4- Illness ; and in some tragic circumstances , epidemic outbreak of perilous diseases.
- 5- Economic recession , etc .

While , from other hand , the high ranking authorities of those sanctioned countries , its high level officials and decision makers , have a multipurpose strong personal and familial immunity shield , against the negative impacts of such kind of expected sanctions etc .

In other words , those kind of sanctions , only deteriorate and jeopardize the living conditions of those people , which in most cases are against their despotic and undemocratic government rulers .

From other hand , even some regressive authorities of such countries , may prefer their people to be in a more miserable condition , in order to

paralyze their opposition capacity and subsequently to prolong their own authoritative ruling life cycle , more and more .

So , economic sanction is not a bothering and worrying penalty for such authorities at all , because their individual life will not be affected seriously by sanction's negative impacts ; rather it is a tool against the ordinary people and innocent population of such countries .

History tells us : “ In most circumstances , the effective and justifiable life of economic sanctions , is already expired and outdated “ .

SARDASHT CHEMICAL BOMBARDMENT(The Third Hiroshima).

Tehran, 28.02.2003

Sardasht is a comparatively small town, located between Baneh, Mahabad and Piranshahr , at the western boarder of Iran. Sardasht is a pure kurdish town .

During Iran/Iraq war, Iraqi planes bombarded this town on 28.06.1987 , by mustard gas and other poisonous materials ferociously.

For this barbarous chemical bombardment, Sardast is referred to by some analysts as third Hiroshima of the world . But unfortunately , as this catastrophe is not publicized in the world, on a necessary scale ; most of the people do not know too much about it .

Now, at this critical moment of history, when the world community is preparing himself, to punish Saddam regime for such crimes against humanity and to exterminate his dangerous existence , I provide a brief account of this sad and continuous tragedy of Kurdish people in Sardasht .I hope, the world competent authorities , would attach this concise paper to Saddam's negative file, for taking due action , in this regard .

As it is indicted by observers and Sardasht population themselves ,in addition to other extraordinary sufferings , this chemical bombardment, resulted in the following catastrophes :

- 1- Dead : 200 persons. For example, from Vahidi family alone, 9 persons were died or injured .Ms.Parvin Vahidi was under medical treatment in Germany.
- 2- Injured : 10,000 persons, which some were sent abroad for medial treatment and still some of them are at Iran hospitals. Some are paralyzed or crippled ,at all .
- 3- Deterrent effect on buildings and city facilities .
- 4- Severe damage to city infrastructure .
- 5- Ever lasting damage to animal , plantation and ecosystem environment.

In such an extent, which even now, every year many people are die from it and more are affected by unknown mysterious diseases .

On 17.01.2003, a seminar was held on this occasion , in Tehran , at Ayneh Hall, in Shash-e-Bahman Complex , by Tehran Kurd Society (KKT)and Committee For Helping Those Which Are suffering from Sardasht Chemical Bombardment , in which many intellectuals , MPs etc gave their speech , in the commemoration of this tragedy.

One of my poems in English " Defenseless Kurdish Girl " , which I present it to all my oppressed compatriots :

Embracing the phantom of gentle sensations,
Her heart is knitting the silky dreams ,
Defenseless against rebellious nature ,
In chilling Jack Frost and hot sun beams .

POLITICAL “ SEPARATISM “ IS A CURATIVE MEDICINE .

Tehran - Nov 8 , 2004.

Nowadays , there are many diplomatic and/or political terms and expressions , which are misinterpreted by the old tools of outdated traditional terminology . But , when we retrieve and reprocess them by modern high precision microprocessors of our common sense , we

realize that their high positive advantages , dramatically override their minute negative ones .

A typical exemplification of such terms , is the word “ SEPARATISM “ , which it is more linguistically applied to the advocators and/or admirers of doctrine or belief of political separatism , who for some rational and necessary reason (reasons) , are seeking a political devolution , or rather an ultimate complete disintegration of a particular region of a country , from whole of its mainland structure .

For political misuse , those fanatic circles who exert some kind of short distance new colonialism ; in order to protect and preserve their new colonial role , secure integration of such an empire and continue the exploitation of those people , who are living in such quasi colonial districts , have malignantly specified the word “ SEPARATISM” and devolution of their colonies , as a mischief , treachery or rather a crime , while in general , “ SEPARATISM “ , is authenticated and duly endorsed by United Nations’ Charter , which in most circumstances , based on the will of respective population’s majority of those areas, who seek separation from a mainland ; “ SEPARATISM “ is the only viable , appropriate and practical alternative .

For example , only in 20th century , in accordance with the definite prerequisite of respective situations , the following independent countries have necessarily separated from their main lands :

Alabania , Bulgaria , Hungry , Rumania , Turkey , Jordan , Lebanon , Iraq, Saudi Arabia , Syria , Palestine , Israel and many other sovereign countries are disintegrated from the Otoman Empire . Ukraine , Azerbaijan, Tajikistan , Kirkizistan , Georgia , Uzbekstan , Turkemenstan , Kazakistan and many other countries have been separated from ex USSR . Yugoslavia have been disintegrated into a few countries . Present India as well as Pakistan and Bangladesh are separated from mainland of India ,etc.

Not to mention tens of countries , who got independence from their respective European colonial empires , in Africa , Asia , South America and so on diligently .

When we study these cases of separation carefully , we rarely find a negative subsequent result in these disintegration processes . Consider, for example , if still all of the quasi colonies of backward Ottoman Empire were under such a fanatic , satanic and barbarian rule of government , what would happen to those hopeless people ? How those blindfolded shortsighted caliphs , could manage such a heterogeneous and sophisticated society efficiently , who practice dozens of cultures ,

religions , behaviors , mentalities and so on, including their respective different subtitles and sub-subtitles ?

Now , still this potential trend is dynamically continuing . There are many countries of heterogenous natures , such as India , China , Belgium , Spain , Great Britain { not England } , Iran , Turkey , Iraq , Syria , Armenia and many other states , where ultimately a serious political disintegration is a must . This is already an established law in politics .

In many contemporary political pathologies , “ SEPARATISM “ is the only prescribed effective curative medicine - it is not a paganism sin . This is the natural passage of history .

Seven DOs and seven DO NOTs for success of the Kurds !

A - DOs :

- 1- Love Kurdistan and all the Kurds .
- 1- Seek independence for Kurdistan .
- 2- Keep unity .
- 3- Get specialized in a job.
- 4- Learn Kurdish language efficiently.
- 5- Think, then act accordingly .
- 6- Work very hard and precisely .
- 7- Include women in Kurdish society .

B- DO NOTs:

- 1- Do not follow the egoism principle .

- 2- Do not believe anyone ,unless you realize ,that he or she is telling the truth .
- 3- Do not decide , when you are nervous .
- 4- Do not leave Kurdistan .
- 5- Do not overlook any single item of interest .
- 6- Do not be jealous .
- 7- Do not prefer your own interest to social interest .

SMALL IS BEAUTIFUL !

Aug 17, 2004

As a substantial instinctive axiom , commencing from infantile age , human beings cherish and sometimes praise small objects cordially ; while in most cases, they abhor and even hate gigantic things .

For example , categorically a small 12 month darling baby is more beautiful than a big , tall and fatty old man in his eighties ; or a small train-shape toy , is prettier than a huge cargo wagon . Schematically , again a small concise modern village is far more beautiful than a big modern city of 10 million crowded inhabitants and in addition , a small company is more exquisite than a multinational giant cartel or conglomerate . This hypothesis is also metaphorically expressed by some global intellectuals and philosophers such as Buddha , Mahatma Gandhi and E .F . Schumacher (German American writer in his famous work) .

As a more relevant and orientated symmetric analogy , there is no doubt , that smaller countries such as Switzerland , Dubai , Qatar , Bahrain , Cyprus and Monaco etc, are almost administered and managed more efficiently , than for example , big Indian quasi (sub) continent country or colossal Peoples Republic Of China . Consequently , small countries will be and are more manageable , prosperous and beautiful in practice than big ones .

From other hand , there are comparatively larger countries such as Iran , Iraq , Turkey Pakistan , Sudan , Russia etc in the world , which are formed some how in a formidable Political BIG BANG collision , formulated by that time's super powers , with multiethnic and heteromorphic characteristics , which due to their vast extent of surface area , racial divergence , climatic discrepancy , sociopolitical differences , traditional and religious challenges , improper and unsuitable political administration , multiform apartheid and segregation issues etc , they have not undergone an expected and appropriate multilateral development process . In result , they are desperately kept backward - comparatively poor and miserable .

Now , after diagnosing this miserable global complication as analyzed above , I herein introduce the most appropriate remedy for this social calamity , in order to enable us to fix or at least to ameliorate its respective negative impacts .

First of all , we select a country like a paradigm , which in this case it is " Iraq " . This country , with an approximate surface area and population of 20 times more than Dubai , enjoys a far lower standard of living , less actual per capita income , little economic and commercial growth etc plus a half-century-old disorder , successive coups and terrible genocide actions , which it is even in process right now in a catastrophic manner and certainly will continue in future , if it is not fixed decisively . While , both countries (Dubai and Iraq) are oil producers , situated at the same proximate geographical location , devoted to Islam religion , are members of so called " Arab World " and share more common factors , except "Small " and "Big" attributes , i.e Iraq is far bigger , and Dubai is too small .

Why a big country is not successful ?

Iraq consists of at least three macro nationalities : Respectively Arabs , Kurds and Turkamns besides other ethnic micro minorities such as Assyrians , Chaldeans etc . This country consists of different climates : Dry and moderate ; mountainous and plain ; desert and marshland , etc . In Iraq , there are different significant religions and sects , such as Shiite & Sunni (Islam) , Christian , Jewish , Zoroastrian , Izadi , Kakayi (Ahle-e-Haq) etc . Consequently proper administration of

such a heterogeneous mess collection , with such varieties of languages , religious and sectarian cultures , is only a romantic dream , not an actual realization . And the most important point is : with such big extent of land (compared with Dubai) , based on a central planning in Baghdad , how one can manage such a strange society efficiently ? . A single unique central planning and regulations for all present Iraq , designed and directed remotely and theoretically from Baghdad , does not match the reality, rather it looks like a physician , sitting in Baghdad and writing same uniform prescriptions for millions of Iraqis , who are infected with different social viruses and illnesses propagated by SADDAM HUSSEIN . For sure, none would be cured in this treatment and such a system is not working at all . Note : If you argue that there are big successful countries in the world such as USA , I remind that this country is not managed as a single big country , rather it is administered as more than 50 small autonomous individual states .

To remedy this chronic malady in Iraq and other similar countries , we must forget about the illusive and misleading term of so called “ territorial integrity “ . And instead of such a big heterogeneous unmanageable country , it is quite advisable to reshuffle it , in at least three independent countries such as Southern Iraq (Arab Shiites) , Northern Iraq (Arab Sunnis) and Kurdistan ; and to disintegrate it in same similar way , which was pioneered by Mr. Gorbachev in ex Soviet Union .

This auspicious disintegration is in favor of all Iraqis . In the meantime , same formula matches for other similar bigger countries , too . Let us replace obsolete preconception of such a ridiculous and malignant “ territorial integrity” , with the nice virtual requirement , which consists of universal peaceful coexistence , sisterhood and brotherhood .

Yes , Small is Beautiful ! but we shall be brave enough , to cut the obsolete behavioral curtains by sharp blade of wisdom and intellectualism , in order to enjoy the bright and promising horizon of human life .

Some Hints About The Kurds In Syria

Friday, 06 March 2009

As you observe in the some maps , Kurdistan is shown as divided between Turkey , Iran , Iraq , Syria and Armenia , i.e it is 5 parts . Most of us know , in former Soviet Union , there was a small Kurdish Republic , called Red Kurdistan , which its formal map is at my disposal ,that map has been duly authenticated by ex Soviet Union authorities (I published it in a previous article in medias) .

But unfortunately due to complicated political gambling and negligence of Kurds over there themselves, now this part of Kurdistan , which according to size parameter , was referred to as fifth part of Kurdistan , is almost disappeared at a nebula of tricky events . Even in fragmentation of Soviet Union , this part was completely erased from the geographical maps and surprisingly ignored . While nearly more than 80 federal districts were created and a dozen of states got their independence after the unexpected collapse of Soviet Union . A lot of present federal districts of Russian Federation , are more smaller than disappeared Red Kurdistan !!!.

This was the miserable history of fifth part of Kurdistan ,which little attention is paid to it by global and even Kurdish community worldwide. Now ,by reading this sad actual anecdote, man becomes extremely anxious about the present fourth part of Kurdistan , which is under Syrian government's control . Because we observe the Kurds , are almost ignored and suppressed there as an ethnic minority etc , in particular I refer to Qamishloo catastrophic conflict and confrontation a few years ago .

This writing is a humanitarian stance and does not express any expression of Arab resentment or dislike by Kurds . Rather , Kurds respect and love their Arab neighbors in Syria diligently , but in the meantime are seriously looking to practice their rights and to preserve their ethnic existence , in order to avoid approximate annihilation and extermination, as has been experienced by their Kurdish compatriots in the fifth part of Kurdistan , at ex Soviet Union . Nevertheless , Syrian Kurds must stay at smart alert condition .

SUICIDE TERRORIST AND HIS INCENTIVE

Aug 18, 2004

The current prodigious conflict in Iraq , has surprisingly refuted many human ordinary interaction practices , and opened new bizarre windows , for planners of various security issues , to remodel their respective plans and coordinate themselves with new dangerous circumstances accordingly .

One of these points is "Suicide Terror " , which is considered as an unprecedented and unforeseen action in assassination , security issues and so on . In fact , classically little attention was focused on suicide terrorism , when security planners , were making their protection and safeguard plans ; because normally there is a very low probability for a person , to perish himself , for killing others .

Now Iraq , in particular the central Arab populated areas , has changed into a notorious pool of innocents blood , which mostly is caused by suicide terrorism operations. Suicide murdering is a very difficult attack to prevent or defuse it , because how one can know who intends to explode himself ?! Classic ordinary assassination intentions and such fatal attacks are in most cases preventable and detectable , but suicide ones are not .

With regard to above mentioned explications , another important issue is emerging , which is to discover the incentive of suicide terrorist . What is the motivation and impetus of a person , who kills himself to slaughter others ? By many justifications and motives , it can be mostly a metaphysical drive instead of physical one . That is , by physical standards it is unjustifiable for a person , to terminate others lives , by killing himself .

So, we can relate suicide terrorism to metaphysical justifications , because for a metaphysically dedicated person , the world will not terminate by death ; rather the soul will be reanimated and enhances if he is martyred . By this , we can say : those who make suicide attacks , mostly are metaphysically devoted people or religious fundamentalists who consider the foreign forces in Iraq as devils ,and who are already brain washed and prepared for suicide terror , hoping they enter the paradise immediately after martyrdom , receive a decorated elegant castle , in which they start to drink nectar and make heavenly loves with 72 virgin fairy nymphs at green grass lawns . But in fact, by this delirious illusion they are sacrificing the people of Iraq and gaining nothing .

KURDISH POPULATION OF TEHRAN !

Aug 18, 2004

As we know , Tehran , Istanbul , Baghdad and Damascus , are among those heterogeneous metropolitan cities of the world , which are not part of Great Kurdistan , but enormous concentrations of genuine Kurdish population are inhabiting there . As a very rough approximation , I dare to pronounce honestly , that in above mentioned cities and their surrounding outskirts together , at least there are five million Kurd residents .

It is reasonably perceptible, that almost the vast majority of above mentioned Kurdish nationals , have emigrated to this capital cities , from the respective main Kurdistan areas of respective country . For example , the Kurds who are residing in Tehran , have almost immigrated there , from main Kurdland (Kurdistan)_ of Iran .

Main prime movers for this huge exodus emigration from Kurdistan , which has schematically continued on a massive scale , from the second half of 20th century and culminated in the first half of eighties , were basically consisting of following points :

- 1- Additional unemployment in Kurdistan.
- 2- Relative low standard level of living .
- 3- Political prosecution and harassment .
- 4- Relative low level of educational and medical facilities .
- 5- Relative lack of security .
- 6- Lateral pressure exerted by neighboring Turks , especially in West Azerbaijan Province .
- 7- Multilateral discrimination .
- 8- Racial restrictions .
- 9- Indirect expulsion and exile .
- 10- Poverty .
- 11- General problems .

Severely affected by above-mentioned bothering factors , most of the Kurds in Iran , were forced to look for other alternatives , to rescue themselves and their families , in seeking survival refuge , at their only imaginative utopia of Tehran and to alleviate their tribulations in this way .

According to non-statistical rough estimations , the total number of Kurds in Tehran and its scattered outskirts , are around 2 million (20 percent from a total population of 10 million) , who are considered as legitimate citizens of this city , with expected equal multilateral rights of living ?! . But unfortunately, it is not so .

While in Tehran , for example , there are nearly 50 big and major cultural houses(Farhangsara) etc, devoted to Persian language programs , performances , concerts , seminars , movies , shows etc , Kurds have no single special cultural house (Farhangsara) or any similar facilities at all .

But instead of expected Kurdish cultural houses and other proper arrangements , about 2 million Kurds in Tehran , have rented a small , ruined and semi-demolished old building from an old woman , on their own tiny and insufficient expenses , with an approximate surface area of 200 m2 , which is so ruinous , that it looks like Uncle Tom's Hut ; and Tehran Kurds have no other alternative , except to perform their Kurdish gatherings , sessions etc (if any) , in this superannuated shattered old small cottage , without any necessary equipment and arrangements , because there are little national and governmental facilities at their disposal .

These Kurds mostly left Kurdistan , to flee from some kind of general discrimination , but again they are experiencing it in Tehran at cultural level , more comprehensively .

HOW TO PREVENT TERRORISM IN KURDISTAN ?

TEHRAN - June 8, 2007

As we know , Kurdistan Regional Government (KRG) , from the time of terrorist operations intensification - after scandalized collapse of Saddam's notorious regime in Iraq - ,was considered as a safe heaven and some type of utopia or better to say " another Iraq" , in such a promising way, that a lot of people from Arab populated areas , especially from central and southern Iraq , took arbitrary refuge there ,

to save their life . And for foreign visitors , who were traveling to Iraq , Kurdistan was considered as a quiet and ideal location , for business activities , investment , political missions , shopping and even recreation , in particular capital city of Erbil and Suleimanieh .

But , unfortunately in recent weeks , a malicious and threatening wave of fatal terrorism has intruded into KRG , in which a lot of casualties were recorded in Erbil , Makhmur etc , which is a big and nasty alarm for security forces , to introduce and implement a more efficient plan , for prevention or at least to lessen them , as " prevention is better than curing " .

For this purpose and realization of this goal , I propose some preventive/precautionary measures myself , which hope to be useful :

1- To forbid all books , newspapers and publications , which encourages Islamic fundamentalist and other acts of terrorism .

2- To prevent any speaker , who advocates and promotes Islamic terrorism , at any tribune .

3- To prevent any open or underground propaganda/activities by previous Ba'ath Party followers at all .

4- To check all human and machine traffics precisely and cautiously , in Particular from North to south (Note: In April 2007 , I was traveling from North of KRG to Suleimanieh , our car was not controlled at all , even for one time .

5- If any terrorist was arrested , the police through extensive investigation , shall try to find his/her network , colleagues , depots, warehouses etc and prosecute them .

6- To publish books , articles , publications and media programs , in which ugliness of terrorist acts , be introduced and denounced .

7- All international borders of the region , shall be strictly checked and controlled .

8- Considerable sums be allocated for those, who introduce terrorist bands and cliques and their respective activities .

9- To establish a more powerful secret police office , to find the terrorist groups .

10- To devise strict punishment , for those who hide , fund or help terrorists .

11- To follow and check any suspicious activities seriously .

12- To establish more disciplined checking points , at KRG entry borders from main land Iraq etc , for a precise and thorough control .

13- To establish special teams , responsible for checking the suspicious locations .

14- To devise secret listening devices , for monitoring the telephone and other communicational conspiracy conversations and messages .

15- To use the intelligence assistance of more advanced countries , who are dynamically a Kurdish friend ? .

16 – To check those people , who are suspicious from physiognomy point of view .

17- In the big cities , like Erbil , suleimanieh etc , buses and other public transport passengers be asked for authentic identity cards .

18 – To prosecute those who back the terrorist in their speeches and attitudes .

19- To denounce any terrorist activities culture .

20 – To distribute leaflets , in which a directive shall be provided regarding terrorism and its preventive procedures .

21- To introduce the terrorists , to public , by all medias such as TV etc, and to publish/broadcast their live pictures confessions .

I hope by respecting the above points and other respective precautions , acts of terrorism in KRG , be eradicated or at least reduced to a minimum level .

MAN AND UNIVERSE

{ A HYPOTHESIS INITIATED BY H . S. SORAN }

Tehran – May 16 , 2005

Hypothesis :

INTRODUCTION :

While nowadays , the intellectual human being hoists the prestigious victory banner of science and technology , above the highest apex of contemporary historical heights , and while the development rhythm of modern civilization progress wheel is accelerating its velocity incessantly ; yet with regret , the most important scientific dilemmas of man's mysterious life , are not resolved at all . These dilemmas mainly comprise such outstanding questions , as : { Who Is The Creator Of Universe ? Why And When Is Universe Created ? From What Fact The Origin Of LIFE Is Derived ? and many other heterogeneous and vital frequently asked questions , which this hypothesis tries to answer them , in an acceptable rationale manner.

JUSTIFICATION:

I believe, that every individual in Universal Metropolitan supermacrosociety , has been intrinsically assigned with a dynamic undeclared and de facto mission , to explore , discover , unveil and clarify , the above dilemmas and secrets , which after the fabulous astronomical BIG BANG , has created a factual philosophical BIG GAP , in the field of our proper and adequate knowledge and justifiable understanding of Facts & Figures , regarding our joint magnificent Universe .

For this reason , I - not as a physicist , philosopher or scrutinizing cosmopolitan - , but rather , as a diligent disciple of intellectual evolution doctrine , provide my hypothesis in this issue , which I think if it can attract the expected approval of global scholars and scientists , at least it would suffice for answering some significant and ancient pending questions , which have caused considerable uncertainty , confusion and hesitation , among human society of Universe Village , which in its turn , has resulted in multilateral chaos , creation of different obsolete religions concepts , strange philosophies and accustomed wrong beliefs as well as surprising superstitions , etc .

DESCRIPTION :

Human brain's central processing unit { CPU } , in a symmetric comparison context , is quite similar to a tiny and weak micro radio receiver set . Such radio receiver of almost the majority of human

beings of Universe , who are dwelling the Earth surface , only possess five receiving wave bands{ five senses } , on which, they can only receive inputs from five universal transmitters , by eye , ear , nose , mouth and touch receiver bands } and process the received data subsequently , i.e by our FIVE KNOWN SENSES , only . Certainly if we had more senses , we would sense more phenomena .

But , while there are thousands of other radio transmitters , all over the world , who are broadcasting their programs on a multilingual , multiracial and multicultural nature simultaneously , our above mentioned micro radio receiver set { brain} , is unable to receive , detect and consequently understand all those radio emission programs , while in fact their waves are physically passing in the proximity of our brain or better to say , across the five band antenna of that radio receiver . But this receiver has no appropriate sensor, even to detect them on a primary manner .

Here , as a typical comparison example , please consider an animalcule super micro bacteria , living at the kitchen basin of a giant and luxurious Airbus passenger plane , flying , for example , from Paris to New York City . If we compare a human being with this bacteria in some ways , we realize that such a bacteria , who has a more minimized , primitive and simplified biological structure , than man , even does not know, that it is living at the kitchen of a plane , or is flying at a sophisticated Airbus machine across Atlantic Ocean , also it does not know who are the crew and passengers of that plane or who has manufactured the plane . And other several similar issues , which with regard to human being in the universe , they are at the same respective ratio capacity level . In other words , when the bacteria who has a more simpler , weaker and undeveloped brain , does not understand the facts , on the board of the Airbus , it does not mean that there is no Airbus , but it means that the bacteria's brain is unable to receive and detect those phenomena , data and facts at all , and consequently it is unable to sense and process them . Even , maybe due to age limit of this bacteria , in this flight duration , some generations of it are extinguishing , so its life cycle is not adequate for such understanding , too .

CONCLUSION :

In addition to those items , which we can detect by our existing five sense sensors , there are a lot of other unlimited natural phenomena around us , in the Universe ,but we do not have more than five radio wave bands or sensors to receive all of them . So , our brain has no efficient data processor , to receive and process them , i.e. we are not aware about them , even we can not imagine and perceive them , on a general basis - like a congenital blind person , who has no known perception of colors .

PANACEA : Similar to computer technology development , in which , man's real brain has invented and developed such giant computers , which have more bigger memory capacities and performance , than his

brain itself , a technique can be developed by man , to augment and aggrandize the capacity and range of successive hierarchical processing computers , which can maximize the capacity and processing exponent power of human brain , step by step , in such a miraculous method , that it can detect , process and explore all unknown secrets and realities of Universe { Universes } efficiently . Then , for the first time , in Universal age , we really know who we are and can solve most of our existing problems efficiently , on realty basis !!!

Mr. Jay Garner! You Can Become A Hero Or Zero In Kurdistan

This letter was written , when Mr. Jay Garner , was official representative of USA , at Iraq , after the fall of Saddam .

There are exceptional and rare opportunities , in which it is possible for a person , to become a hero and register her or his name with bold golden letters , in the most bright front pages of human history .

The following parameters form such opportunities :

- 1- Situation .
- 2- Time .

Now both of two above parameters are prevailing in former Iraqi Kurdistan , because due to collapse of Saddam's Regime , it is the best situation in the history , to realize the Kurdish old and viable dream of having an independent country .From other hand , now it is the right time to do it .

Why an independent Kurdish country , is a viable and legitimate issue ?

- 1- It conforms with the Human Rights' Charter .
- 2- It stabilizes the region .
- 3- It ends the tragic exceptional long oppression, annihilation and genocide of Iraqi Kurds .
- 4- It does not violate any one's rights .
- 5- It encourages the realization of all other Kurd's reasonable expectations in all parts of the world (approximately from each 100 person in the world, one is a KURD) , which they do not have any independent state , too .
- 6- It is in the interest of Iraq mainland .
- 7- Any new Iraqi non-Kurdi leader, governing Kurdistan from Baghdad , 6 months later becomes a new Saddam again ,i.e the history repeats once more .

- 8- Decades of experience tells us , that it is impossible to integrate Kurds and Arabs democratically , in the framework of a single country .
- 9- A shared country , has no advantage neither for Arabs nor for Kurds .
- 10- It is the desire of almost all Kurds – you can testify it by a referendum.

Based on above justifications , in present circumstances and at this very occasional moment , Mr. Jay Garner , the US representative in Iraq, has this brilliant fantastic opportunity , to realize formation of an independent Kurdish state there and become a Human Hero of whole of the world in general and in Kurdistan in particular , like Mandella , Dr. A. Schweitzer and Gandhi , for Realization Of this Kurds' Legitimate And Viable Dream .

Then 50 million Kurds accompanied by all reasonable inhabitants of the globe , make his statue in the central square of their hearts , with sacred human marble stone , which no bulldozer can demolish it .

Dear Mr. J. Garner !This is a historial occasion for you -Time is short, sensible and precious !

TRANS-KURDISTAN RAILWAYS

Tehran – November 4, 2006

{ English proverb : seeing is believing , but touching is another thing }.

The great Kurdistan region , which is distributed unjustifiably among five countries and is situated at Middle East's conflict epicenter , due to its complicated geopolitical particulars , is deprived from many potential conventional privileges and routine advantages of third millennium , one of which is the lack of an competent railway network .

As we know , at all regions of great Kurdistan , the railway transportation facility is too incapacitated , in particular at Eastern Kurdistan , i.e. the part which is called Iranian Kurdistan , there is no railways at all , even a single linear meter . At Iraqi part of Kurdistan , there was a weak line northward to Kirkuk , the oil rich town , but now due to war damages and internal scuffles , it is more or less out of order . In turkey , Syria and Armenia situation is nearly the same .

As an overall development hypothesis , a region's social , technical and general furtherance , is mostly measured by the rate of respective railway network access there . For example in Germany , which is a far advanced and developed country , nearly for every town, there is sufficient railway services . Even for some villages , you can find special railway aces road . In the meantime , in Germany , at some important stations , there are train arrivals and departures for some destinations , once every 15 minutes ; and at peak rush hours , it is sometimes more frequent .

Based an above explication , we conclude that one of the obstacles in the development of Kurdistan region , is lack of an efficient railway network , while this region is located at a potential transit route of the globe .

For example , if two major transit railway routes are constructed - one from North to South , connecting Russia and Eastern Europe to Gulf ; another one , from West Europe , connecting Western countries to India , China and Far East ; in this case , Kurdish populated areas , change into a crossroad of international trade , export , import , and multilateral communication along with other kinds of positive interactions . This development , ultimately would result in progress , prosperity , and growth of Kurdish community and would end the deprivation era of Kurds .

Kurdish superstar poet , Mr. Ahmad Mukhtar Jaf , wrote in his poems last century :

Railway enters into HAWRAMA cliffs ,
We join Akra and Zakho with Boan

In fact , the above significant and vital goal will be realized , when an independent Great Kurdistan is established, which is the Kurdish dream of centuries .

ANY "TURKEY" IN "TURKEY", IS CONSIDERED A TERRORIST , TOO

Tehran – January 18, 2008

Linguistic Explanation :

The first" TURKEY" word, means a kind of bird and second TURKEY word , means a country with barbaric leaders .

At first glimpse, this concise article might look as an obsolete issue and outdated writing . But instead , it is an realistic symmetric situation , which is now prevailing in TURKEY ; which has attracted the astonishing attention of all universal village compatriots , created harsh and resentful reaction of all humans over the globe .

As was said , there is a country in east Mediterranean geographical area , called " TURKEY " , in which nearly about 20 million Kurds are living , with their own particular history ,language, culture and behaviors , which is occupied militarily by TURKEY . According to UN charter , every human being has the right and privilege to speak in his own language , choose his political system , exercise his culture and behave according to his traditions . But , surprisingly these Kurds, which both geographically and demographically are nearly 20 times bigger than the Republic OF Malta , are prevented by fascist leaders of TURKEY; to speak , read and write in their language and enjoy their rights . This Kurdish demand is considered by TURKEY government , as a political crime , which deserves prosecution and punishment and KURDS are labeled as terrorist for it .

By reading the above real story , we can argue ,that if Kurds are terrorists because they like to protect and preserve their language , so all birds in TURKEY which are called "TURKEY", also are terrorists and shall be slaughtered by air raids , bombardments and shelling etc , which is now underway by "TURKISH " government , against Kurds . Any way , "TURKEY" birds are not prepared to speak in Turkish , rather they like to speak and chant in their own language of " TURKEY" birds , which is called " GABLE/GABLE/GABLE language , they do not like to abandon their own language and speak TURKISH , they prefer their language .

If Turkey Dares To Explode A Suicide Bomb In KRG ???

TEHRAN: October 15 , 2007

For nearly 3 successive decades PKK , is resisting with astonishing gallantry against the ferocious Turkish army , inside geographical borders of so called Turkey (Turkea) , in an indefatigable fierce fighting , to acquire the legitimate rights of about 20 million Kurds there, which are deprived from the most primitive human prestige . In this persistent and diligent struggle ,Turkish fascistic army has utilized his most advanced weaponry and sophisticated military facilities viciously against Kurds ; and have massacred (annihilated)hem indiscriminately as per their preceding actual prototype (ARMENIANS) , including children , women , old people and ordinary

civilians etc . There is no precise casualty statistical figures , but roughly it exceeds hundreds of thousands .

But , in fact despite the modern Turkish military supremacy and classis well equipped army , it is dreadfully defeated by PKK , in such a formidable manner , that now in most of Turkish occupied Kurdistan , there is no security location and safe refuge for Turks . Turks became desperate and deficient in this battle against PKK guerillas , who are only using the most outdated warfare of a traditional partisan group . Counter proverb : **POWERFUL IS NOT VICTORIOUS , RIGHT ONE IS THE WINNER .**

In such a fatal circumstance , in order to divert the attention of Turkish nation from this catastrophe and transfer the war front to inside Kurdistan Regional Government (KRG) in so called Iraq , Turkey has spread the rumor of incursion ratification plan worldwide by his judiciary , and has prepared his army to attack KRG , to fulfill this political maneuver , by which he intends simultaneously to disorganize KRG , occupy Kurdistan , including the oil field of Kerkuk ; and thus provide oil for Turkey .

But in this unjustified repetitive barbaric practice , Turkey :

- 1- Excites the negative reaction of UN , European Union and people over the world , to join Nicolas Sarkozy doctrine , to deprive Turkey from joining EU and even ultimate expulsion from UN .
- 2- Engages in a fearful classic and partisan war , inside KRG, against Kurdistan Army and Peshmargeh forces , under the patriotic leadership of President M. Barzani .
- 3- Mobilization of 50 million Kurds , both physically and morally , throughout Great Kurdistan region and Diaspora , to defend KRG , which might result in revenging against Turkish interests and embassies abroad , extensive demonstrations , permanent picketing at front of Turkey's diplomatic missions , like those which was held at the front of South African Republic embassy , in Trafalgar Square of London , when Mr. Josef Mandela , was in jail and consequently , in total isolation of Turkey .
- 4- Misses both his close de jour & de facto Western allies , particularly USA .
- 5- Engages in an unwilling war with Arabs' of Iraq, too .
- 6- Enters in a cold war , with Arab World in general .

7- Finds no PKK there , because all of you know well , that PKKs are the majority of ordinary Kurdish people living in crossroads , streets , avenues , lanes , closes and outskirts of Amed , Wan , Mush , Dersim and other cities/towns/villages of Turkish occupied Kurdistan as well as in mountainous areas and country side – there

As an independent commentator , interested in solving Kurdish issues peacefully , I am sure PKK is not defeat able , rather it is far more better , its issue be solved in friendly debates around the negotiation tables and diplomatically , not by crazy and notorious hereditary Genghis Khan's military strategy .

So , if Turkey dares to attacks KRG , he explodes himself by a voluntary political suicide bomb , which results in a threatening big bang in Middle East , too . Turkey is not searching for lion , but for lion's foot fingerprints .

Note : In above context Turk or Turkey refers to Turkish Regime , not to ordinary Turks , which are considered as Kurd's potential friends and certainly are against such a barbaric move by Turkish Government .

UNITED NATIONS OR UNITED REGIMES ? !

September 12, 2005

There are many important and vital names and terminologies in national and international arena , which are desperately misused or misunderstood by their respective users .

One of this names is “ United Nations “, acronymed as UN , which in an explicit , normal and clear context , it means an organization , which includes the nations of the world and shall act to realize human rights , peace , freedom and dignity for all nations and communities all over the entire globe , on an equal level and without any type of discrimination.

But unfortunately , United Nations , in many fields , has been changed to United Regimes (RG) . So , instead of serving the nations of the world in a sincere manner , UN has been converted to a fatal and terrible tool , which is under the complete control of world regimes .

We see many regimes of the world , who are not elected by their respective people in a democratic way ; while they are representing their nations in this important world forum in a wrong manner . For example , we are witnessing so many genocides , annihilations , mass killings , executions etc in global scale by such type of regimes , but UN is not interfering in ending , stopping or prevention of such formal crimes , by this pretext that “ UN can not interfere in internal affairs of any government “ .

Now , in order to enable UN , to practice its expected equitable role , as protector of all nations and an active sponsor of their rights , improving of UN charter , is considered as a must .

UN must protect the oppressed and deprived nations of the world against their oppressive regimes , not to simply confine itself to protect those illegitimate regimes , against their respective oppressed nations and exclusively to assume the role of a mediator for solving those regimes' conflicts .

At least , the first expected rational step in this regard for UN , can be :

- 1- Non admission of those regimes as UN members .
- 2- Their immediate expulsion from UN organization .
- 3- Punishment and ousting of them .

Or to change its name to “ United Regimes Organization” .

Kurdistan , And Some Of Its Particulars

Tehran – 21.11.2006

When we look at the geographical map of the world , there is no sign of an independent Kurdistan country . But , in fact according to following rough calculation , from each 120 person at the world , one is a Kurd .

$$6,000,000,000 : 50,000,000 = 120$$

It is obvious , why there is no trace of Kurdistan over the political atlases - because it is confiscated by other people . It may seem strange , that such a huge population and geographical extent , about 10 times greater than Lebanon , is absent on the demographic , political and statistic arena of the globe !!! .

Kurdistan has special specification , some of which are as follows :

- The richest oil field of the world , are situated here .
- It has comparatively a very intellectual people .
- They hate religious extremism .
- The people have a nice democratic taste .
- It is divided between five antagonist powers forcefully .
- Almost has no ample access to international water ways .
- Is a multi-religious community .
- They speak different dialects , sub-dialects and even sub sub-dialects .
- Despite political frontiers , the people have a potential solidarity .
- Patriotism enthusiasm is extremely very high .
- It has a four season climate ; it means: simultaneously you can find spring , summer , autumn and winter at particular regions .
- It has a splendid national music .
- Possesses an extensive and rich folklore .
- It has a very old and genuine history .
- It has good friends , but dangerous enemies .
- Its ancient religions are suppressed .
- They have the nicest women's dresses of the world .
- It has the most picturesque landscapes of the earth .
- Many important archeological sites are located there.

But from other hand , Kurdistan is almost the biggest land and nation of the world , which is deprived from independence .

USA Is Expected To Revise His Bias Terrorism Concept

Tehran- March 23 , 2008

As a Kurdish free writer and commentator , without affiliation to any political party and/or group ; in this week, in World Medias, I was observing extensive Nowruz festival ceremonies in Kurdish populated areas of the world , which is a Kurdish new year feast , on March 21 each year and lasts almost 7 days .

In almost all of these mentioned festivities , " Long Live APO " slogan , was overshadowing the occasion and transformed it into a political demonstration , in which around 50 million Kurds in Turkey , Syria , Iraq , Iran , Armenia and Kurdish Diaspora, were supporting Abdullah Ujlan (APO) , the detained leader of Kurdish PKK Party , which is jailed by Turkey .They were asking for his immediate release . In some occasions , we saw more than one million demonstrators , chanting " Long Live Apo " .

This means almost around 50 million Kurds are supporting APO and Apopism policy , which is trying for obtainment of 50 million Kurds' rights peacefully ; but unfortunately due to a political miscalculation and bias tactic , has been included in USA terrorist group , mainly under Turkey's pressure and strategic influence .

Because USA is proclaimed as a democratic system and human rights protector , how it is possible to label 50 million peaceful people as a terrorist group ??? If PKK and Apo are isolated and/or unpopular or were discarded by the world community , USA's attitude could be considered as a correct and rational mood ; but now with these actual situations and overwhelming support , I am sure such a gesture of USA , will raise this question " How it is possible to introduce 50 million peaceful people as terrorists ? how USA can justify this policy ? Why these 50 million people are terrorists and what is its reason ? .

As I said , we know this policy of USA , has been induced by Turkey , which is reigned by AKP party and R.T. Erdogan clique , which right now is even under the pressure of Turkish Court and nation to resign , because they are blamed for reviving religious extremist ideas and fundamentalism , which certainly leads to Islamic fanaticism , and consequently to enhancement of Middle East terrorism movement .

Consequently , USA is expected to revise his terrorism labeling concept , or better to say : he shall adhere this terrorism label , instead of PKK and Apo to AKP and Erdogan , which I am sure , it shall be appreciated by all rational people of the world and reshapes his prestige profile, in a positive manner .

UNITED STATES OF KURDISTAN , A KURDISH UTOPIA :

Tehran – October 1, 2005 .

Kurdistan , KURDLAND or KURDIA , is the ancient homeland of about fifty million wonderful Kurds , in Middle East epicenter . This genuine nation has an old continuous history in this important region of the world , which goes back to more than 25 centuries ago , when their glorious monarch DIA'KO , was ruling their country , at this area .

As one of one of most intellectual , ancient and honest nations of the world , Kurds had a significant potential to continue their existing progress and development on a large scale and to maintain their own independence . But , due to their homeland's geographical location , persistent political turmoil , frequent foreign intervention , numerous invasions by surrounding countries and tribes , their country " Kurdistan " , soon lost its real independence , except on a sporadic and alternate basis , on small scales in the form of emirates , general governorships , townships etc for several centuries .

As the most important thrilling shocks to existence of Kurdistan destiny or serious restraining factors of Kurdish independence , I can point out to a few historical instances , as following :

- 1- Greek invasion under Alexander The Great .**
- 2- Arab Islamic occupation , in 7th century A.D .**
- 3- Mongol invasion , under Changiz Khan and Teymur etc .**
- 4- Presence of religious Abbasid Caliphate , in Baghdad for about 5 centuries , who were colonizing Kurdistan , in the name of God .**
- 5- Presence of Turk Saljuqi dynasty for several centuries , in many areas of Kurdistan , particularly in Eastern Anatolia , present part of Kurdistan , which is under Turkish oppressive occupation .**
- 6- Presence of Ottoman Empire in Istanbul for several centuries , who were reigning most of Great Kurdistan , under the banner of Sunni Muslim .**
- 7- And ultimately, fragmentation of Great Kurdistan upon disintegration of Ottoman Regime , in World War I .**

In addition to above mentioned historic facts , there were other factors , who inhibited the realization of Kurds' dream to regain independence , which had heterogeneous characters , such as geographical , social , psychological and strategic reasons etc .

But despite all above obstacles and impediments , disappointments , foreign occupations etc , always Kurds have retained their aspiration for full independence ; and as we recall from reciting pages of historical events , they have utilized every opportunity and prospect , to establish their self rule , in particular during any weakness of central powers of all

regimes , who are occupying Great Kurdistan ; and I am sure that a free referendum , will confirm this pretext by an overwhelming majority of polls .

Based on above analysis , and according to present political perspectives , Kurds look at a United States Of Kurdistan { USK } , as an utopia for their political solution aspiration , in which all regional states of Great Kurdistan should be reunited together again . And , realization of this viable wish , is the main duty of a future real United Nations Organization - not present United Regimes Organization , which is a suppressive tool in the hands of present regimes .

WEAPONS ARE NOT REQUIRED , THEY MUST BE COMPLETELY DESTROYED

Tehran- August 11, 2008

Unfortunately nearly every year , almost unexpectedly at a corner of this disturbed world, conflagration of a conflict begins to blaze , in which a lot of civilians and innocent people are injured , become homeless , killed or massacred indiscriminately , in addition results in an enormous and vast devastation of environment etc, through utilizing miscellaneous and heterogeneous weapons and armaments by irresponsible and wicked politicians .

These mess of homicide weaponries nowadays are continuing to be more and more fatally sophisticated and dangerous than before . For instance if in Middle Ages ,there were some fighting erupted between different tribes with using bow , arrow , ballista , catapult , marginal, stone and sticks , now they have transformed into most advanced deterrent kinds of man animal and plant killers , such as atomic , hydrogen type , chemical , microbial and more other dangerous types , which are able to massacre millions of people in densely populated cities and towns in a few minuets time . For example , we have read about atomic bombardments of Japan and chemical bombardments of so called

Iraqi Kurdistan at Halabjeh and so called Iranian Kurdistan at Sardasht , in which altogether thousand were crippled , handicapped , injured and killed in a few minutes .

As I mentioned , besides the ferocious and cruel bombardment of Japan (Hiroshima , Nagasaki etc) by USA , we have witnessed the ridiculous and unexpected chemical bombardment of Halabjeh town by Mustard gas etc , which is located inside the geographical territory of Iraq , by Iraq itself !!! .

For instance now at this same moment , a fierce fighting is going on between Russia and Georgia , on the soil of South Ottesia , which may expand and flare into Abkhazia , too . This fighting is neither initiated by Ottesia nor by Aphasia . As far as we understand from news medias , they both are asking for their rights of autonomy or some kind of independence , which is their absolute right . But Russian & Georgian politicians , have converted it to an immense and dangerous conflict , in which thousands of innocent civilians are killed , injured , became homeless and have fled to safe places . Apparently Russias have been assigned as Peace Keepers in advance in this dispute , but have catastrophically disguised as War Mongers !!! . This is the absolute right of South Ottesia and Aphasia people , to decide on their fate and future destiny according to UN Charter , not others .

When we see such conflicts regularly on the globe , which are exclusively created by adventurous politicians and their barbaric ambitions , we desire enthusiastically and diligently to destroy and eradicate all military bases and garrisons etc by same weapons upon the globe and ruin all , then transform their aftermaths and remains into academies , universities , laboratories , colleges , schools , nice recreation parks and similar places , which are desperately needed by world population .

We approximately 7 billion people on the globe , have no kind of dispute and war with each other in general , at all there is no serious conflict between us , we love each other, hate war and antagonism . If politicians themselves are competing warlords by nature , they can kick and kill each other personally by physical personal contacts , such as karate , wrestling etc . But , even we do not recommend them to do such ugly act .

PS:

WEAPONRIES ARE NOT REQUIRED IN GENERAL BY WORLD POPULATION , THEY ARE SOME POLITICIANS' KILLING TOOLS FOR REALIZING THEIR BARBARIC AMBITIONS .

Long live a real disarmed world and peaceful coexistence .

KURDISH XENOPHILIA PHENOMENON !

Aug. 10, 2004

The word “ XENOPHILIA “ is a synonym for “ admiration of foreign/alien people “ and a type of antonym for expressive word “nationalism” . Meanwhile we shall bear in mind this certitude , that linguistically ” nationalism” must not be necessarily misunderstood with sociopolitical terms “ racism ” or “ falangism ” , rather it is closely akin with the auspicious and prestigious word “ patriotism “ .

But , unfortunately among us (The Kurds) , there is a keen and chronic tendency towards “ Xenophilia “ , which virtually in most critical circumstances , it exerts a formidable negative impact on our cultural , social and political endurance , etc .

As an example from many cases , few years ago , a young French girl visited Eastern Kurdistan , in Iran , who obviously was an ordinary student in a French university . In fact , she came to collect respective informative material , for writing her dissertation about the Kurds and Kurdistan .

As a foreigner and expatriate savant person !!! , she was welcomed earnestly here ; and was hospitalized by writers , poets , researchers , artists , intellectuals and almost all elite sectors of the Kurdish society lavishly . She attended many seminars , conferences etc , in most of the Kurdish towns and communities, here . Now , if we consider this fact , as a traditional sense of old Kurdish hospitality , it is a superb and elegant positive point . But , if we see it as a form of Xenophilia , it is the most negative face of the Kurdish social coin .

From other hand , the great and famous Kurd scientist , linguist and academician , late Professor Shukur Mustafa , from Aril city , visited Eastern Kurdistan , following the visit of above mentioned young French lady ; but surprisingly , he was not welcomed as warm as it should be , although he was a guest , too .

In the meantime , all of us are certainly aware ,that late Professor Shukur Mustafa’s visit had a much higher scientific load , quite uncomparable with that French young student and could yield a more lucrative outcome , if he was welcomed and understood appropriately and properly .

LET US ERADICATE XENOPHILIA PERILOUS PHENOMENON IN GREAT KURDISTAN SOCIETY UNCOMPROMISINGLY . We shall not continue to underestimate ourselves anymore !!!

HAS WHITE HOUSE SHOWED GREEN LIGHT TO YELLOW (1) LEADER

Tehran – Nov 3, 2005

The official momentous visit of President Masoud Barzani , elected leader of Iraqi Kurdistan to White House , has attracted ardent attention of many inquisitive political , diplomatic and journalism circles of the world and consequently has resulted in emerging heterogeneous analytic views of interested kurdologists etc in this regard .

Besides the positive potential load of this splendid visit and other related issues , the following points have also attracted my particular attention in this field :

- 1- President Barzani's justifiable presence at White house , with his glorious Kurdish yellowish national clothing , was a condemnation message by USA for those ignorant occupiers of Great Kurdistan , whom for many years have prohibited the Kurdish dress .
- 2- Barzani's speech in Kurdish , has given an official tone to this language , that humiliates those dictators who stubbornly deny the Kurdish language , which is historically spoken by about fifty million Kurds .
- 3- This meeting was an explicit confirmation of USA government to recognize Kurdistan Regional Government { KRG } directly in particular and Kurdish case indirectly , in Great Kurdistan , in general .
- 4- The dignified and polite gesture of President Barzani , standing by President Bush , was symbolizing the genuine ethics and prestigious personality of a typical Kurd .
- 5- President Bush's sincere staring and gentle attentive smiles at Barzani , conveyed a moral message of USA's deep appreciation and sincere gratitude toward Kurds .

Based on above undeniable factual signs along with Mr. Tony Blair's subsequent attitude , it can be understood , that White House has given Green Light to Yellow leader , to move gradually , step by step and conservatively for establishing an independent Kurdish government , not before long , which can duly expand into a Great Kurdistan Government {GKG} framework .

(1) Yellow Leader : Msoud Barzani , who has inherited Yellow ,
as his administration's favored color .

KURDS ARE NOT NOMADS ,THEY ARE CIVILIZED UVOLUNTARY EMIGRANTS.

July 1, 2004 .

When last time I visited United States , I stayed in the outskirts of Baltimore , in State Of Mary Land for approximately a period of one month .

In order to continue my research on my “ Kurdish Bibliography Project “ , I was visiting some libraries there , such as Ernest Pratt Library in Baltimore , Library Of Congress , in Washington DC , etc .

I was quite surprised , when I observed in some books which were published in the USA , it was indicated that “ KURDS ARE A NOMADIC PEOPLE ...!!! “ . Unfortunately , I saw some similar expressions in general knowledge books, too . In addition to this issue , still now , in some USA and European encyclopedias and reference books (even in on online ones) , such similar false details are indicated about the Kurds .

As a Kurd , I like to clarify, that at present time (2004) , almost all the Kurds are settled , they are living in big cities , towns and villages and there is no general nomadic life in THE GREAT KURDISTAN , except very little groups of sheep and got owners , dispersed sporadically in some remote areas , who are less than half percent of the total population , i. e approximately 99.5 percent of the Kurds are not nomads and they have never lived in the tents etc . For example , there are more than 10 cities in different parts of Kurdistan , in which around one million people or less are living ; such as : Erbil , Kermanshah , Ilam , Duhok , Amed , Sanandaj , Suleimany , Van , Zakho , Mahabad , not to mention around

200 medium size populated towns and tens of thousands of prosperous villages .

I hope seriously , that the USA/European publishers and writers would pay their diligent attention to this significant issue and to improve the texts of such erroneous books , in order to match with the current prevailing demographic realities in THE GREAT KURDISTAN and to avoid such important sociological misinterpretations .

Meanwhile , I request all my sympathetic compatriots who are living in USA and western countries , to coordinate their efforts in improving such ironic undesirable manipulation of realities .

Conclusion:

This is a misunderstanding . Kurds are not nomads , if you see they are wandering all over the world , they are civilized involuntary emigrants , who are frequently expelled from their native homeland forcefully , either directly or indirectly

MUSTAFA BARZANI'S HEROIC MILITARY EXODUS OF 1947

Aug 16, 2004

In the annals of every potential nation , there are phenomenal and extraordinary significant passages , which like the magnificent lofty peaks of a glorious skyscraping mountain , adorns the picturesque scenery of that nation's existence with the honorary insignia of perpetual pride .

When we study the meaningful pages of history , there were many eminent military expeditions , which are considered by their respective nations , as an eternal patriotic token of pride and dignity . For example: The successful military expedition of Alexander The Great , the Greece conqueror , in Asia , Africa and Europe and the overwhelming victory of British Army , at Waterloo sanguinary battle

field in Belgium , which resulted in fatal collapse of Napoleon Bonaparte's forces .

But , in Kurdish History , there was an exceptional case of highly outstanding military exodus expedition , that is a unique and marvelous one in the entire world , about which , I provide a general and succinct narrative as follows :

Late Mala Mustafa Barzani , the prominent and popular Kurdish leader , a native Kurdish compatriot from Iraqi Kurdistan , came to Iranian side of Great Kurdistan , to join the newly established Republic of Kurdistan , at Mahabad city , in 1946 , along with thousands of his ardent Kurd followers from Iraqi Kurdistan ; whom was welcomed by late Qazi Mohammad , the president of that Republic diligently , where the rank of " general " was granted to him and he contributed his earnest multilateral collaboration there .

Unfortunately, 11 months after its formation , The Kurdish Republic of Mahabad was dissolved by trilateral compromise of allied forces , in December 11, 1946 , i. e . Soviet Union , USA and Great Britain , at Teheran Conference , after the World War II , which was attended by Josef Stalin , President Archibald Roosevelt and Winston Churchill as well as young Mohammad Reza Shah of Iran . Subsequently , President Qazi Mohammad was ousted from power and was hanged along with his colleagues in Mahabad , Bokan and Saqiz towns , at Iranian Kurdistan , in a barbaric manner , by Shah's regime .

Explanation : Even 11 members of my family , were among those who were executed in 1947 - H. S. Soran .

After the collapse of The Kurdish Republic and execution of its leaders , Late Mala Mustafa Barzani had no choice , except either to fight the Iranian army or to subdue to execution in Iran . Consequently , as a first alternative , he began to combat the regular military machine of Shah , using his traditional guerilla tactic and warfare .

But after some sporadic skirmishes mostly at Naghadeh region, in North West Iran and inflicting minor casualties on Iranian Army , Mustafa Barzani decided to summon all respective families who were accompanying him to Iran , remobilize them , and by passing over the impassible mountains of Iran-Iraq border , to repatriate them to Iraqi Kurdistan ; and thus to rescue them from an imminent annihilation threat by Shah .

Upon his return , after resettling his followers in Barzan region and other areas of the Iraqi Kurdistan , as he was under a tremendous threat of

Iraqi government , Leader Mustafa Basrzani , selected the most clever , brave and elite men among the central core of his loyal followers , all armed with light weaponry , such as Berno rifles , Colt revolvers and other similar primary weapons of that time and began his legendary military exodus from his birth place area of Barzan , in order to save the Kurdish national movement , from Iraq threat .

With an efficiently tailored strategic itinerary plan , he launched his patriotic exodus mission , accompanied by approximately 500 of his smart entourage , by reentering into Iranian side of Kurdistan soil .

His ultimate goal was to enter the Soviet Union , and get some kind of political asylum there - the only left alternative to survive . So, he started his historical march , by fighting back Iranian , Iraqi and Turkish military forces as required , through nearly 350 km ragged and rocky mountain passes , peaks , foothills and valleys of Kurdistan , under the adversary control of Iranian , Iraqi and Turkish governments , towards The Soviet Union . It took approximately 7 days to traverse this hazardous distance and reach The Soviet Union . This was a very inconceivable exodus march , because from every section of the occupied Kurdistan , he was under continuous heavy fire of artillery and other mortal weapons , by above-mentioned antagonist forces , zigzagging the path for safeguard of his passage when necessary . I. e , for example , when they were jeopardized in Iranian side of Kurdistan , he reentered the Iraqi or Turkish side of the territory . When they were attacked by Iraqi forces , he counterattacked them , inflicted considerable casualty on them , reentered Iran and so on up to end of his exodus march . In this astonishing marvelous manner - fighting and counterattacking 3 regional regular armies simultaneously - he arrived on the gate of ex Iron Curtain , by Araxes river , at Iran-Soviet Union frontier , without a considerable loss or injury of his exodus expedition members .

At that critical moment , passing the Iron Curtain was only a fabulous and epic legendary dream . But this savant , valiant and patriotic Kurdish leader , managed this extraordinary task practically . He was admitted there unwillingly , and remained in Soviet Union for nearly a period of 11 years , under the severe pessimism of Stalin's Regime and dubious strict inspection of KGB ; till finally he came back to Iraq in 1958 , upon the official invitation of President Abdulkarim Qasem , who had recently led a military coup successfully and had replaced the Iraqi despotic monarchy regime , with an apparently democratic Republic Of Iraq .

But , his findings in Baghdad , during his short residence , did not suffice his high aspiration for forming a GREAT KURDISTAN INDEPENDENT STATE , so he left Baghdad again overnight and

continued his blessed and indefatigable campaign , aimed at liberation and independence of all Kurds up to end of his auspicious life , which finally terminated in California , USA , in 1979 , when his magnificent coffin was returned to Kurdistan and buried there triumphantly , as a patriotic and historic Kurdish hero .

Kurdish Poem : Those who are living at the heart of their nation , are immortal .

IS APO A GLORIOUS EMANCIPATOR OR A TERRORIST ?

Tehran - September 19 , 2005 .

Nowadays , in politically orientated lexicons of micro global village , some words , terms and expressions , are utilized in more than one distinct and clear way , i.e. they have multifunctional applications and are applied and interpreted in various manners , by different people and groups , on the basis of their own special tastes , interests , approaches and perspectives . But in fact , as a mathematic rule ; always , at all circumstances and occasions , $2 \times 2 = 4$. So, such bias orientated interpretations and applications do not change the real and actual character of those words and respective bodies , to whom they are applied .

One of those frequently misapplied terms , is the word “ terrorist “ , which from a linguistic point of view , it means a “ frightener “ or a person/group who terrifies others .

As I stipulated before , this ugly and notorious word , has been applied to many persons and groups etc , on the choice basis of its users , writers and expressers , rather than on a rational principle .

For example , the word “terrorist” , has been applied to Abdullah Ujalan=Ojalan (APO) , the eminent leader of Turkey’s occupied Kurdistan , for which he has been accused and placed in a nasty prison now , by Turkish government , for several years .

We shall confess , that as a matter of undeniable fact , from Turkey’s fascism point of view , Leader APO is a real terrorist , because by his comprehensive heterogeneous peaceful emancipation activities and operations , he was terrifying and frightening Turkey’s tyrant and dictatorial regime , in trying to liberate his Kurdish compatriots in Turkey , who are around 20 million people and as big as four times of Lebanon , from the oppressive yoke of Turkey .

But from Human Right’s point of view and by all respective international norms , a person who is struggling honestly against a tyrant body and tries to secure freedom and liberty for his nation , is not labeled as terrorist ; rather such a person is considered by all regulations and common senses , as a glorious liberator , who is dedicating his magnificent life to serve freedom and equality for his oppressed compatriots , while respecting the equal rights of Turkey’ s Turks as well .

If Apo is a terrorist , world great leaders and heroes such as Jeanne D,Arch , Mahatma Gandhi , Mala Musafa Barzani , Mandela etc , all were terrorists , too ; because there is no basic discrepancies between the behavior , nature and ultimate aim of Apo , with them .

General Hypothesis :

A person or group , who terrifies and subdues a terrorist regime , is a brave hero and glorious emancipator - not a terrorist .

TURKOCRATS AND DEMOCRACY

Tehran – September 17 , 2005

In the beginning of 1980s , for fulfillment of my quarter-century research project on KURD BIBLIOGRAPHY , I spent some months in Turkey , to implement the respective field work on said study , by using Turkish libraries and scientific centers .

But , unfortunately in Turkey , my futile search for Kurdish books or any book about Kurds and/or Kurdistan , resembled looking for Prophet Suleiman's Small Carpet , which is a super mythological mirage and is too far from realization .

Consequently , neither I found any trace of 20 million Kurds , nor I saw the name of vast Kurdistan region , in any Turkish books , magazines , periodicals , newspapers etc , except the famous forged term of “ mountainous Turks “ . Of course , in such drastic circumstances , finding any book in Kurdish language , was completely out of question . So , my mission there , resulted in nothing , except getting some terrible memories .

One day , I was dining at a Kebab House , in Aksaray quarter , at Istanbul . The waiter came to me curiously . While getting the meal order from me , he asked : “ From where are you ? “ . I answered : “ I am a Kurd , from Iranian part of occupied Kurdistan “ . He continued anxiously : “ Keep silent , term KURD is a political violation of Turkish law ; you may be prosecuted for this offense severely . You shall not pronounce word { KURD } at all “ .

I was quite frustrated , because anyway I was a Kurd and I could not disguise my real identity . Noticing my surprise , he continued : “ Here if you claim , that you are a Kurd , even you may jeopardize your life . Then , in order to convince me , that he is right in his approach , he related the following real , but strange story for me :

As a Kurd , I was living at a remote village , in Dyarbakir { AMED } district in Turkey . One day , when my father was died , we began to mourn for him . At the funeral service of my father , two Turkish gendarmes came to me in an angry manner and wanted me to pay a certain amount of Turkish Lira to them as a penalty . I asked them : “ Why you fine me and for what offense ? “ . They answered : “ For weeping in Kurdish language for your dead father !!! “ .

I protested against their command and told them , that I can not speak Turkish at all , so how can I weep in Turkish . They said : “ we will teach you how to weep for your deceased father in Turkish language and make your Turkish lamentations properly , after payment of your respective fine “ . And they did it exactly .

Really , when in this days , at the beginning of third millennium , we hear that Turkish leaders are instructing Kurdistan Regional Government , not to hoist their flag at their own soil in KRG , they protest against USA , on President Masoud Barzani’s visit to White House and ask Danish Government , to close Kurdish ROJ TV broadcasting in Denmark , it reminds us of above tragic story of that man who was fined for weeping in Kurdish language , in the death of his deceased father . And Even as it was stated in a forum at ZAGROS TV last night ; pronouncing , writing and hearing of word KURDISTAN , still is strictly forbidden in Turkey !!!

These are the prototypes of TURKOCRACY OR CENGIZISM behavior , which must be seriously noticed by European Union , United Nations USA Government and world community in General .

KURDS' SEVEN MOST SIGNIFICANT EXPECTATIONS

Tehran - Oct.24 , 2006

In order to alleviate Kurd's present chronic sufferings comparatively , at least the following emergency treatments , are highly advocated :

1- The United Nations and other world authorities shall carry out a field referendum , under their strict supervision and sponsorship , all over the Kurdish populated areas of the globe , on a probable political devolution task and ask the Kurds : if they prefer to enjoy their own independent

state or yet they wish to continue to be part of another country . If they voted for separation , the international authorities , including UN , superpowers and relevant circles , shall perform it ; and provide the Kurds with independence gift and/or anything they vote for themselves .

2- The international authorities must not presume or assume Kurds , as Turk , Persian , Arab or Armenian individuals , the colonial powers , who are currently occupying the respective parts of Great Kurdistan . Rather , they shall recognize them as Kurds , a separate nation , with a different psychology , culture , history and human aspiration .

3- The United Nations shall not act as United Governments apparatus , toward Kurds ; rather UN shall recognize Kurds as a separate nation with legitimate rights and shall protect them against any oppression and/or subsequent multilateral discrimination .

4- If we assume the world population to be six thousand million people { 6 billion } , and while Kurds are estimated at around fifty million , so by this rough calculation , from every 120 individual of the globe , one is a Kurd . It means : $6,000,000,000.- : 50,000,000.- = 120$. So Kurds shall be allowed to enjoy their legitimate rights from universal resources and facilities on the basis of above ratio , i. e 1 from each 120 .

5- Before establishing a genuine independent Kurdish state , the international authorities including UN and superpowers etc , shall protect the Kurds against any violation and aggression .

6- Kurds shall be allowed to have a seat at UN , to protect their legitimate humanitarian rights . This point looks quite licit , because currently , there are many micro and medium size nations , who have a seat at UN , while they have a population less than 10 percent of Kurdistan , the ancient homeland of Kurds .

7- An international committee shall be incorporated at world level , consisting of effective , appropriate and intellectual bodies of miscellaneous nationalities , called Kurd's Rights Protection Committee { KRPC } with sufficient powers of authority performance and practice , to protect and sponsor the Kurdish vulnerable case , at all parts of the world .

Otherwise , we shall expect seriously the repetition of terrible fatal catastrophes such as : Halabjeh chemical bombardment in Iraq , Kurdish total denial and their systematic racial genocide at Turkey , gradual ethnic melting and discrimination at Iran , as well as their progressive disappearance in Armenia , along with demographic dispersion/degradation in the form of Kurdish diaspora all over the world etc .

SUICIDE TERRORIST AND HIS INCENTIVE

Tehran - 18.11.2006

The current prodigious conflict in Iraq , has surprisingly refuted many human ordinary interaction practices , and opened new bizarre windows , for planners of various security issues , to remodel their respective plans and coordinate themselves with new dangerous circumstances accordingly .

One of these points is "Suicide Terror " , which is considered as an unprecedented and unforeseen action in assassination , security issues and so on . In fact , classically little attention was focused on suicide terrorism , when security planners , were making their protection and safeguard plans ; because normally there is a very low probability for a person , to perish himself , for killing others .

Now Iraq , in particular the central Arab populated areas , has changed into a notorious pool of innocents blood , which mostly is caused by suicide terrorism operations. Suicide murdering is a very difficult attack to prevent or defuse it , because how one can know who intends to explode himself ?! Classic ordinary assassination intentions and such fatal attacks are in most cases preventable and detectable , but suicide ones are not .

With regard to above mentioned explications , another important issue is emerging , which is to discover the incentive of suicide terrorist . What is the motivation and impetus of a person , who kills himself to slaughter others ? By many justifications and motives , it can be mostly a metaphysical drive instead of physical one . That is , by physical standards it is unjustifiable for a person , to terminate others lives , by killing himself .

So, we can relate suicide terrorism to metaphysical justifications , because for a metaphysically dedicated person , the world will not terminate by death ; rather the soul will be reanimated and enhances if he is martyred . By this , we can say : those who make suicide attacks , mostly are metaphysically devoted people or religious fundamentalists who consider the foreign forces in Iraq as devils ,and who are already brain washed and prepared for suicide terror , hoping they enter the paradise immediately after martyrdom , receive a decorated elegant castle , in which they start to drink nectar and make heavenly loves with 72 virgin fairy nymphs at green grass lawns . But in fact, by this delirious illusion they are sacrificing the people of Iraq and gaining nothing .

A Kurdish Writer Has Been Nominated For Nobel Peace Prize 2008

KurdishMedia.com - By Kamal Chomani 30.08.2008 00:00:00

Erbil , Kurdistan (KurdistanMedia.com) 30 August , 2008 :

Hassan Salah Soran , a Kurdish writer , poet , intellectual and linguist , who is settled in Tehran , Iranian capital , is nominated as a candidate for Nobel Peace Prize , 2008 .

Hassan Salah Soran , who writes under the surname H.S. Soran , has commented about this great prize candidacy in an interview with KurdishMedia.com " You are aware if a person is chosen for this candidacy , he must be recommended and introduced by others . No one can nominate herself/himself for this prize . So , in previous years , I heard that they tried to nominate me , but it seemed ,the conditions were too difficult , so I was not qualified . However , as you have read in various news medias ,ultimately they were able to register my name this year . I have to thank for this " .

" I have to say , that Kurdish people almost all over the world and in parts of Kurdistan , welcomed this news cordially .They advocated and welcomed this news " he added .

H.S.Soran confirmed , " It is not very important for me , whether I can obtain this prize or not . While winning this prize , by a Kurdish person is too difficult , because as a Kurd one can get no political sponsorship . However , the moral support , which I have received from my fellow Kurds , is more important that any international prize " .

He stated , that even if he wins the prize , it does not mean that H.S.Soran has won it, in fact Kurds win it .

" Some other Kurdish intellectuals , scholars and writers are more qualified for this prize than me ; but , anyway they nominated me . I thank them cordially " H. S. Soran added .

H.S. Soran , besides attending educational centers in Eastern Kurdistan . also he studied in " Trinity , St. George and Stanford Colleges" in UK .

He studied English and English literature . He is teaching Kurdish (on extraordinary basis) occasionally at Tehran's Universities . For the last 5 decades , H.S. Soran , has been writing as a poet , writer , translator , intellectual and historian .

He has written more than 28 books and booklets in several languages , which some of them are translated .

The selection of Nobel Peace Prize winner will take place in October, 2008

Mankind Shall Learn Peaceful Coexistence From Animals

September 23 , 2008

In 1970s I had an exceptional opportunity to spend some of my rare leisure time , at Holland Park , London , England , located at High Street Kensington , just opposite Earls Court Road .At first glimpse , one might deem this park's denomination is affiliated to Netherlands (Holland) country , but it is not so . As I have read in said park's historic records and anecdotes , it belonged to an English aristocratic authority , who according to his written will , this park has been donated to London city municipalities .

Holland Park is a classic , natural , picturesque large garden , populated by old trees . This park has almost no leveled or plain surface , rather it is full of small hills and tiny miniature valleys , which resembles a minimized natural forest at Zagros mountain range . In this park , several species of heterogeneous birds were living : Hundreds of peacocks , pigeons , pheasants , swallows , Turkeys , nightingales , doves , hens , storks , ducks , pelicans etc .

They had an attractive peaceful , hygienic and healthy life . There was no police at all , despite this fact , during this field study of one month , I saw no slaughter , genocide , assassination , dispute , war , skirmish , fighting and antagonism trend among them . For example , Turkeys which are supposed to be of Turkish origin , despite their relatively bold larger bodies , did not impose their " Gable Gable" language on small nightingales . There was no racial and religious discrimination/segregation , all of them were living in a peaceful and friendship environment according to rules and regulations of Universal Creation System , so they had no

miscellaneous imaginary strange gods . They did not require any type of weaponry , if fact there was an automatic and voluntary disarmament . From other side , I rarely saw a seriously ill or suffering bird , in particular there was no depression at all , all were chanting/singing in their languages and according to their racial culture , particularly at dawn ,all were performing their own chorus without the permission of others , especially the small nightingales were performing such orchestras , which you could not hear such an elegant performance at Albert Hall concerts or Vienna Philharmonic orchestra .

I compared our human catastrophic life environment with their civilized and peaceful community and uttered this impressive sentence at a monologue : Mankind Shall Learn Peaceful Coexistence From Animals .

Message For Mr M. Ahtissari, Nobel Peace Prize Winner

Tuesday, 06 January 2009

Message For Mr M. Ahtissari, Nobel Peace Prize Winner .

His Excellency Mr. Martti Ahtissari ,

First of all, I shall indicate, that as you might be aware, I was nominated as one of the Nobel Peace Prize candidates in 2008 , too ; but I failed to succeed in this international contest .

So , I feel it as my moral duty to congratulate you cordially for receiving the Nobel Peace Prize for 2008 and appreciate the Norway Nobel Peace Prize Institute for this right, justified and appropriate selection .

In the meantime , I utilize this rare opportunity to remind you , that as a

successful winner of this significant title award , at least from my point of view , you are expected to pay special diligent attention(among other things) to following points , as priorities of your obligations :

1- Trying to implement actual "modification" or better to say" reform" ,in UN organization , which instead of United Nations , it has been converted miserably to United Governments (UG) . And to abolish the Veto right , which is considered as a formidable breach of democracy and justice . United Nations shall be an efficient organization to protect the rights of nations not the rights of governments alone , which almost more of them are not elected democratically , but have taken power in military coups or political games and gambling etc .

2- Trying to advocate and restore the " peace" worldwide , which is deplorably undermined by war and in most continents , the human race is burning inside dangerous and cruel flames of heterogeneous conflicts . I can say nowadays , animal community is enjoying more "PEACE", than human communities .

3- Trying to protect human rights , instead of governments' bias and unjustified aspirations .

4- Trying to advocate the rights of depressed and deprived nations of the globe , among them : 50 million Kurds , Tibetans , Kashmir people , Bask nation in Spain , Tamils etc . Which mostly are surprisingly ignored at world arena .

5- Serious follow-up and persistent condemnation of significant extraordinary human catastrophes created by MAN - at least in recent times such as : Armenians' genocide by Ottoman Turks ;Hitler Holocaust; Hiroshima/Nagasaki atomic bombardment, Halabjah & Sardasht Chemical Bombardments by Saddam's regime at Greater Kurdistan region etc .

I sincerely wish you preeminent success in the performance of this important and outstanding humanitarian mission .

Best Regards,
H.S.Soarn

US HAS A MORE IMPORTANT TASK IN AFGHANISTAN

For nearly a decade, US forces assisted by their military allies, have invaded Afghanistan in apparent pursuit of Taliban and eradication of terrorism. This is a complicated political task and military operation, which requires an extensive analysis by specialists and experts. Nevertheless, I do not concentrate on this topic and leave it to be handled by respective professionals .

But, I like to concentrate on another dirty kind of terrorism, which is quite apparent and widespread there ; and does not require any complicated justification, counter justification and heterogeneous strategic, historic and political calculation. It is extremely a simple and straight forward issue :

As you know, a high percentage of opium plant (khashkhash) and other narcotics production fields are located at Afghanistan and it can be categorized as first country in this dangerous agriculture or better to say mischievous trade at least at Middle East. I am sure this type of so-called agriculture and ugly business , is more harmful, fatal and terrorizing than present contemporary Taliban terrorism . If classic terrorists demolishes New York Trade Center Buildings, opium and narcotics producers along with their affiliated drug traffickers network , ruin and spoil the world population's dignity, soul, moral, health and even economy, in their favor. So, this universal type of terrorism is more dangerous than self exploding, suicide bombing and so on , which might kill a limited number of innocent people .

Let me to say, this is better for US and his allied forces in Afghanistan, to eradicate this dangerous plantation and trade business, prior to other terrorisms. This needs a more easy operation. That is : to level and ruin opium and other narcotics plantation fields and instead of it, begin to cultivate and harvest necessary and useful grains, cereals, oil seeds, gardens, fruits etc ; then the next campaign against dangerous normal terrorism, will be more easier, more justified and more practical .

How those opium and other narcotics producers can convince their conscience , to do this unclean job , which jeopardizes the whole humanity, from other hand they persistently claim their sincere devotion to GOD? What kind of GOD ?
